

MOHAMMED HYDER

UI/UX DEVELOPER

224-442-3089

IL,60193

hyderm1125@gmail.com

PROFESSIONAL SUMMARY:

- Results-driven **UI Developer** with **8+ years** of experience in designing and developing dynamic, user-friendly web applications.
- Proficient in **HTML5, CSS3, JavaScript, ReactJS, Angular (2-12), Redux, JSON, AJAX, Express.js** and **NodeJS**.
- Adept at building **Single Page Applications (SPAs)** and working with **RESTful APIs**.
- Strong understanding of **Agile methodologies, version control, and performance optimization** to deliver high-quality applications.
- Collaborated with UI/UX designers and product managers to translate user needs into responsive and accessible interfaces.
- Experienced in **SaaS platform** UI development and full lifecycle cloud applications using AWS.
- Well-versed in **responsive design, accessibility (WCAG), and debugging UI issues**.
- Passionate about learning new technologies and staying updated with industry trends.
- Skilled in **code refactoring, performance tuning, and best practices** to maintain high-quality applications.
- Experienced in **unit and integration** testing to ensure application reliability.
- Strong knowledge of **version control systems like Git** to manage and streamline codebases efficiently.
- Capable of handling **end-to-end development** from requirement gathering to deployment.
- Hands-on experience with **CI/CD pipelines** and **automated deployment**.
- Extensive experience in testing frameworks like **Jest, Cypress, and Jasmine**.
- Expertise in integrating cloud technologies such as **AWS S3** and **Pivotal Cloud Foundry (PCF)** for scalable application development.
- Skilled in using design handoff tools like **Figma** to implement pixel-perfect UIs from mockups and wireframes.
- Knowledgeable in **optimizing API consumption** using **GraphQL**, reducing unnecessary data fetches and improving app performance.

TECHNICAL SKILLS:

Frontend	HTML5, CSS3, JavaScript, TypeScript, ReactJS, Angular (2-12), Redux, JSON, AJAX
Backend	Node.js, Express.js, RESTful APIs
Design & Collaboration	Figma, Adobe XD
Cloud & Deployment	AWS S3, Pivotal Cloud Foundry (PCF), GitLab CI/CD, Jenkins, Azure DevOps
Development Tools & IDEs	Visual Studio Code, WebStorm, Sublime Text
Databases	MySQL, MongoDB
Version Control & CI/CD	Git, SVN, Jenkins, GitLab CI/CD, Azure DevOps
Testing	Jest, Cypress, Jasmine, Mocha, Selenium
Build Tools	Webpack, Babel, Gulp, Grunt
Security & Authentication	OAuth2, JWT, Role-Based Access Control (RBAC)
Performance Optimization	Lazy Loading, Code Splitting, Server-Side Rendering (SSR), Webpack, Babel
Methodologies	Agile (Scrum), Kanban, DevOps

PROFESSIONAL EXPERIENCE:

CVS Pharmacy, USA

UI Developer | Nov 2023 – Present

- Developing and enhancing **ReactJS-based** web applications for retail and pharmacy services.
- Collaborating with backend teams to integrate **RESTful APIs** and ensure seamless data flow.
- Implementing **state management with Redux** to handle complex data interactions.
- Optimizing UI performance and ensuring compliance with **accessibility standards**.
- Writing reusable **React components** and improving code modularity for scalability.
- Enhancing website responsiveness and mobile compatibility to improve user experience.
- Conducting **code reviews and debugging sessions** to maintain high-quality standards.
- Working closely with UX/UI designers to ensure **consistent and engaging user experience**.
- Integrated **GraphQL** APIs to improve data fetching efficiency, reducing API over-fetching and improving response times by 30%.
- Leveraged TypeScript to enhance **code reliability, catching errors during development and reducing runtime issues**.
- Implemented **lazy loading** strategies and **route-based code splitting**, improving page **load speed by 25%**.
- Developed custom hooks in React for **reusable logic**, improving development efficiency across multiple projects.
- Integrated **Google Analytics** and **Tag Manager** for better user interaction **tracking and insights**.
- Built reusable form validation components using **React Hook Form** to standardize data input across the application.
- Implemented **dark mode** and **theme toggling** features to enhance user personalization.
- Developed a real-time notification system using **WebSockets** for improved user engagement.
- Worked closely with **UI/UX designers** to implement Figma-based mockups into responsive, production-ready components.
- Collaborated with product managers to define and iterate on UI requirements based on business goals.
- Contributed to **cloud-based SaaS application** development and deployments using AWS and CI/CD pipelines.

Environment: ReactJS, Redux, TypeScript, JavaScript, HTML5, CSS3, Node.js, RESTful APIs, GraphQL, React Hook Form, WebSockets, Google Analytics, Tag Manager, Git, GitLab CI/CD, Agile, WCAG Accessibility Standards, Jest, Cypress, Responsive Design, Dark Mode Implementation, CI/CD Pipelines, Visual Studio Code

Cisco, San Jose, CA

UI Developer | Sep 2021 – Oct 2023

- Built a **partner platform UI** using **Angular 12, TypeScript, and Node.js**.
- Integrated **RESTful API services** and implemented **secure authentication**.
- Developed and maintained **responsive UI components** with **Bootstrap and SCSS**.
- Utilized **Git for version control** and followed Agile development practices.
- Worked on **performance optimization**, reducing page load time by 30%.
- Implemented **lazy loading and code splitting** to improve application efficiency.
- Created **unit and integration tests** using Jest and Jasmine to ensure code reliability.
- Designed and developed **custom reusable components** to improve development efficiency.
- Conducted **code reviews and mentoring** junior developers to maintain high coding standards.
- Integrated third-party analytics tools such as **Splunk** and **Tealium** to track user interactions and improve usability insights.
- Developed automated testing pipelines using **Jenkins, improving test coverage and deployment reliability**.

- Worked with Pivotal Cloud Foundry (PCF) to manage and deploy microservices-based front-end **applications**.
- Enhanced application security by implementing **OAuth 2.0 authentication** and **role-based access control**.
- Collaborated with UX teams to redesign core UI flows, reducing user friction and improving satisfaction scores.
- Developed **reusable Angular components** with an emphasis on performance, usability, and accessibility.

Environment: Angular 12, TypeScript, JavaScript, Node.js, HTML5, CSS3, Bootstrap, SCSS, RESTful APIs, OAuth2, RBAC, Jenkins, Git, PCF (Pivotal Cloud Foundry), Splunk, Tealium, Jasmine, Jest, Responsive Design, Agile, WebStorm, Performance Optimization

Copart, TX, USA

UI Developer | Sep 2019 – Aug 2021

- Developed **high-performance web applications** for vehicle auctions using **ReactJS** and **Node.js**.
- Optimized **web applications** for **speed** and **scalability**, reducing load times by 40%.
- Integrated **GraphQL** APIs to enhance **data management** and **streamline UI interactions**.
- Implemented user authentication and authorization using **JWT** and **OAuth2**.
- Developed **dynamic dashboards** and **analytics features** for real-time vehicle tracking.
- Designed and implemented mobile-first responsive web applications using **Bootstrap** and **CSS3**.
- Automated unit and integration testing with **Cypress** and **Jest** to ensure application stability.
- Conducted **code reviews** and **knowledge-sharing sessions** to improve development best practices.
- Integrated cloud storage solutions (AWS S3) to manage vehicle image uploads efficiently.
- Enhanced **SEO performance** by implementing **server-side rendering (SSR)** techniques using Next.js.
- Built **WebSocket-based** real-time bidding features, improving auction interactivity and reducing lag.
- Worked closely with Product Owners and Designers in Agile sprints to deliver key auction features on time.
- Integrated with **Jenkins** and **GitLab CI pipelines** for automated deployment and testing of React apps.
- Participated in cross-functional agile teams, contributing to **UI/UX decision-making** and **sprint planning**.

Environment: ReactJS, Redux, TypeScript, JavaScript, Node.js, GraphQL, HTML5, CSS3, Bootstrap, JWT, OAuth2, AWS S3, Cypress, Jest, Next.js (for SSR), WebSockets, Performance Optimization, Visual Studio Code, Git, DevOps Practices

SiriusXM, FL, USA

UI Developer | April 2017 – Aug 2019

- Designed and developed **interactive UI** components for **music** and **podcast streaming applications**.
- Worked extensively with **ReactJS**, **Redux**, and **Node.js** to build scalable web applications.
- Developed dynamic dashboards using **D3.js** for **data visualization** and **analytics**.
- Implemented **progressive web app (PWA)** features to enhance mobile user experience.
- Participated in code reviews and ensured compliance with industry coding standards.
- Automated testing with **Cypress** and **Jest** to maintain application stability.
- Worked on a microservices architecture to improve **system scalability**.
- Implemented **dark mode UI** switch for an enhanced user experience.
- Collaborated with UX/UI teams and product managers in Agile sprints to deliver new features biweekly.
- Ensured compliance with **WCAG 2.1** standards, enhancing accessibility for a broader user base.
- Implemented podcast playlist drag-and-drop feature using **React DnD**, improving user engagement.

Environment: ReactJS, Redux, TypeScript, JavaScript, Node.js, D3.js, REST APIs, HTML5, CSS3, Cypress, Jest, PWA, Microservices Architecture, Dark Mode UI, Git, Agile/Scrum, Visual Studio Code

PROJECT HIGHLIGHTS:

- **Developed a modular React dashboard**, reducing load time by **40%**.
- **Optimized Angular application performance**, **cutting API** response time by **30%**.
- **Implemented secure authentication** in a SaaS-based web application, enhancing data security.
- **Redesigned existing UI components**, leading to a **25%** increase in user engagement.
- **Translated Figma prototypes** into scalable Angular and React components for a **SaaS financial platform**.
- **Developed a dark mode feature** for improved user experience and accessibility.
- Built a **PWA** for a streaming platform, improving load speeds and offline capabilities.

EDUCATION:

Master of Science (M.S.) in Computer Science - 2017

Campbellsville University | Kentucky

Bachelors in Electronics and communication engineering - 2015

Jawaharlal Nehru Technological University Hyderabad (JNTUH) | India
