- Results-driven Senior Software Developer with 15+ years of experience in designing and implementing complex software systems.
- Proven track record of leading cross-functional teams and delivering high-impact, scalable, user-centric solutions that drive customer satisfaction and loyalty.
- Expertise in full-stack development, cloud services, and Agile methodologies. Skilled in optimizing system performance, reducing operational costs, and mentoring junior developers.
- Passionate about continuous improvement, collaborative teamwork and fostering a learning environment.

TECHNICAL SKILLS

Development Technologies

- **.NET Core, .NET Framework 4.x, ASP.NET, C#, MVC, RESTful APIs, WCF Services**
- **Cloud:** Azure PaaS SaaS, Azure Functions, Web Apps, Monitoring, Service Bus, Redis, Storages, AWS
- **Programming Paradigms & Methodologies:** Object Oriented Programming (OOP), N-tier, Service Oriented Architecture (SOA), Microservices, SDLC, SOLID principles, Design Patterns, Dependency Injections
- **Mocking & Tools:** MOQ, Swagger, JSON, Docker,
- **Database: Relational:** SQL Server, SSMS, ADO.NET, Entity Framework, LINQ, T-SQL, **NoSQL:** MongoDB

Front-End Technologies: **Angular, TypeScript, React.js, Vue.js** Sencha **ExtJS**, RxJS, PrimeNG, JavaScript, HTML, CSS

Testing and Quality Assurance: MS Test, X-Unit, N-Unit, Jasmine.js, Playwright Behavioral Test, Postman

Tools, Analytics & Integrations

- **3rd Party Integrations:** Data prefill, Email and SMS providers, VGS Payment Gateway
- **Analytics & Monitoring:** Google Tag Manager, New Relic, Dynatrace, Suricata, LogRocket, GlassBox

Code Repositories & Project Management

- **Version Control and CI/CD:** Azure DevOps, Team Foundation Server (TFS), Git, GitHub
- **Development Environments:** Visual Studio, VS Code, Windows & iOS
- **Project Management Tools:** Agile (Scrum & Kanban), Atlassian Jira, Asana, Notion, Tetra Documentation

WORK EXPERIENCE

Senior Software Developer (IT Consultant), NJM Insurance Group, Richmond, VA – 11/2023 to Present

NJM Insurance Group (www.njm.com) is an American mutual insurance group of companies, offering personal auto, commercial, homeowners, condo, and renters' insurance.

- **Development:** Developing and maintaining both internal and customer-facing applications, ensuring optimal performance and functionality.
- **Platform Enhancement:** Significantly enhanced core insurance platforms (Quote & Bind, Customer Self-Service) by adding new line of business in existing product family.
- **Modernization:** Drove modernization efforts by upgrading APIs and services to .NET Core v8, **refactoring** monolithic services to modular RESTful APIs and serverless Microservices, utilizing AWS and Azure cloud, resulting in independent **scaling** and faster response.

- **Performance improvements:** Led the initiatives to identify and resolve performance bottlenecks in web apps and APIs, enhancing user experience and system efficiency, resulting in ~30% reduction in load time.
 - **Task Management:** Handling various tasks, including new development, bug fixes, troubleshooting, logs review, code reviews, mentoring junior team members, and **adhering to best practices and standards**.
 - **Agile Methodologies:** Excelled in Agile development (Sprints, Kanban).
 - **Technical Proficiency:** Demonstrated expertise in a wide range of technologies, including Dot Net Core, ASP.NET, C#, RESTful APIs, Azure & AWS Cloud, Microservices, SQL & NoSQL Databases, Ext.js, Angular, React.js, TypeScript, RxJS, Playwright, TFS and GitHub
-

Senior Software Developer, Compare.com AKA Insurify Inc., Richmond, VA – 01/2013 to 11/2023

[Insurify Inc](#) is an online insurance price comparison website and acquired [Compare.com](#) in March 2023.

- Held a senior full-stack software developer role within the same group of companies.
 - **Web Applications**
 - Developed web applications for auto insurance price comparison, including question collections and A/B test capabilities.
 - Led the development of a price comparison customer journey single page application (SPA) using Angular, TypeScript, ASP.NET MVC, C#, SQL and Azure
 - **Migrated** insurance comparison business logic from Angular to React.js app for Insurify.
 - Built a **white-label** customer journey to support multiple brands for the same web application.
 - **Modernized** existing web application by upgrading from Angular v2 to Angular v12, resulting in reduced build size and optimizing performance.
 - **Back-end Development**
 - Implemented **RESTful APIs** and **Azure Cloud** solutions to provide accurate quotes and ads from multiple insurance carriers
 - Developed Email and SMS core delivery engines web API in **Azure Functions** (Http and Timer Triggers)
 - Created user session management capabilities using **RESTful APIs** to process data in multiple formats (JSON, XML)
 - Implemented Web API and WCF Service endpoints for real-time customer **data prefilling**
 - Built Web API to integrate with brokers for processing customer data and displaying appropriate ads
 - **Integrations and Features**
 - Integrated with insurance providers, vendors, A/B testing tools, Email & SMS providers, LogRocket, Sentry.io, and GlassBox session recording
 - Implemented **SignalR** for **asynchronous** real-time communication between client and server
 - Developed a payment page with vendor payment gateway integration
 - Implemented WCF service and APIs to manage vehicle and policy coverage look-up data
 - **Project Management & Leadership**
 - Engaged in task analysis, brainstorming, planning, review meetings, and design discussions
 - **Led development** efforts and coordinated communication between teams in multiple geo locations
 - **Managed** a product development team including developers, testers, database, and DevOps personnel
 - **Mentored** junior team members and conducted **code reviews**
 - Collaborated with cross-functional teams and communicated with clients
 - **Tools and Technologies:** C#, ASP.NET, .NET Core & Framework, MVC, Azure Cloud, Azure Functions, AWS, Python, RESTful APIs, WCF Service, Entity Framework, Redis, SQL Server, T-SQL, Design patterns, Service Bus, Docker, DevOps, CI/CD, X-Unit, TFS, Git and GitHub
-

Software Developer, Secure Energy Services Ltd., India – 03/2011 to 01/2013

- Spearheaded the development of web applications and **B2B integrations** for the energy industry, resulting in streamlined data processing and enhanced operational efficiency.
 - Developed web applications to collect and process utility customers' data effectively using **ASP.NET, C#**.
 - Implemented B2B Integration Data Exchange Service for energy partners, facilitating the exchange of electrical transformers data using **T-SQL, EF, SOAP, WCF Services**.
 - Created an Alarm dispatcher service and email system on Windows server.
-

Software Developer, Dot Squares Technologies, India – 10/2010 to 03/2011

- Developed multiple web apps for e-commerce shopping carts (iDeals, Alpha-cart, Tryoutkonsamui) using Microsoft technologies, ASP.NET 2.0, C#, **LINQ to SQL**, HTML, CSS, jQuery, SQL Server
 - Implemented a customer frontend and admin portal web application for FAQs and reviews.
 - Collaborated closely with UX and testing teams to ensure seamless functionality.
 - Documented requirements and conducted development reviews with clients.
-

Software Developer, Acme Embedded Technologies, India – 06/2008 to 09/2010

- Developed web and windows applications using .NET, C#, WinForms, ASP.NET, and SQL Server.
 - Conducted unit testing, task analysis, and collaborated cross-functionally to ensure project success.
 - Utilized WinForms, ASP.NET, and SQL Server Database to create user-friendly applications.
 - Contributed to the growth of the company by delivering high-quality software solutions.
-

EDUCATION AND FORMAL TRAINING

- **Masters in Computer Application**, University of Rajasthan, 2004 to 2007
 - **Bachelor in Commerce**, University of Bikaner, 2001 to 2004
 - **Certified Scrum Master**, Scrum Alliance, 12/2017 to present
-
