

MANOJ NALLAMOTHULA

Connecticut, USA | +1 (203)-673-4807 | manoj.nallamothula@aogjob.com

Summary

Proactive and detail-oriented Salesforce Developer with 3+ years of hands-on experience delivering scalable, high-impact CRM solutions for clients in both the U.S. and India. Skilled in Apex, LWC, Flows, and integrations with ERP and marketing platforms. Known for taking ownership of key modules, leading feature development, and mentoring junior team members in collaborative, agile environments. Successfully managed data migrations, UI enhancements, and workflow automation that improved business productivity and user adoption. Passionate about building clean, efficient solutions that solve real business problems and create measurable value.

Technical Skills

Salesforce Platform & CRM: Sales Cloud | Service Cloud | Custom Objects | Validation Rules | Workflows | Approval Processes | Record Types | Page Layouts | Roles | Profiles | Permission Sets | Process Builder | Lightning App Builder | Flows | Reports | Dashboards | Platform Events

Development & Customization: Apex (Triggers, Classes, Batch, Schedule, Queueable) | LWC | Aura Components | Visualforce | SOQL | SOSL | JavaScript | HTML | CSS

Data Management & Migration: Data Loader | Workbench | Import Wizard | Apex Batch Jobs | External ID Matching | Large Data Volume Handling

Integrations & APIs: REST APIs | SOAP APIs | Named Credentials | External Object Integration | MuleSoft | Salesforce Connect | Callouts

DevOps & Deployment: GitHub | Copado | Salesforce CLI | Salesforce DX | Change Sets | VS Code

Security & Access Control: Role Hierarchies | Field-Level Security | Sharing Rules | Login IP Ranges | Two-Factor Authentication

Project Tools & Collaboration: Jira | Confluence | Agile/Scrum | Microsoft Teams

Additional Tools & Utilities: Informatica Cloud | Adobe Sign | Conga Composer | S-Docs | Postman | Microsoft Office Suite

Professional Experience

Salesforce Developer | PTC, USA | Mar 2023 – Present

Project: *Salesforce CRM Modernization for Tungsten Automation*

Environment: Salesforce Sales Cloud, LWC, Apex, MuleSoft, Copado, Informatica Cloud

- Led the end-to-end implementation of a scalable Salesforce CRM solution tailored for over 500 users across Sales, Marketing, and Service departments.
- Successfully migrated from a legacy CRM platform to Salesforce with **zero downtime** and **100% data accuracy**, ensuring business continuity.
- Developed and deployed **custom Lightning Web Components (LWC)** to build dynamic, responsive UIs that increased user engagement by 25%.
- Integrated Salesforce with external ERP and marketing automation tools using **MuleSoft and REST APIs**, automating data synchronization and reducing manual intervention by 60%.
- Designed and automated key sales and support workflows using **Flows and Process Builder**, improving team efficiency and reducing operational delays by 40%.
- Established robust **role-based security and data access controls**, ensuring compliance with both internal policies and industry regulations.
- Utilized **Copado and GitHub** for DevOps and release management, cutting deployment timelines by over 50%.
- Delivered tailored training to 100+ end-users, leading to rapid adoption and improved CRM proficiency across teams.
- Built real-time dashboards and reports for executives, offering insights into sales performance, pipeline metrics, and lead conversion trends.
- Collaborated with cross-functional stakeholders including BAs, QA teams, and IT leads to continuously refine and enhance Salesforce features based on business feedback.

Salesforce Developer | Tata Consultancy Services (TCS), India | May 2020 – Feb 2022

Project: *Salesforce Field Operations Optimization for a Global Manufacturing Client*

Environment: Salesforce Service Cloud, LWC, Apex, REST APIs, Data Loader, Jira, GitHub

- Delivered a robust Salesforce Service Cloud solution to streamline field operations across 5 global regions for a Fortune 500 manufacturing client.
- Built custom **Lightning Web Components (LWC)** to enhance case handling, enabling faster service agent response and improving resolution time by 30%.
- Integrated Salesforce with the client's internal asset and inventory systems via **REST APIs**, enabling real-time data sync and reducing manual tracking by 60%.
- Automated service workflows using **Flows and Process Builder**, cutting case handling times from 3 days to under 1.5 days.
- Led the data migration of over **1.2 million historical service records** from legacy systems into Salesforce using **Data Loader** and **Apex Batch jobs**, ensuring high accuracy and minimal downtime.
- Enforced granular **role-based security models** to restrict access by geography and department, aligning with global compliance requirements.
- Developed performance dashboards and custom reports for field supervisors, tracking SLA adherence, agent productivity, and service backlog.
- Conducted UAT and delivered Salesforce training sessions to 100+ field agents and business users, increasing adoption and reducing support tickets.
- Followed **Agile methodology** with Jira for sprint planning, collaborating across developers, QA, and product owners to deliver continuous enhancements.
