

Manvik Namala
Sr Network Security Engineer
manviknamala11@gmail.com
+1 214 935 4545

SUMMARY:

- **8.1 years** of experience in testing, troubleshooting, implementing and maintaining enterprise data network and service provider system
- Skilled in configuring Palo Alto Networks firewalls across various models, including PA-2K, PA-3K, and PA-5K series.
- Developed and enforced customized security policies on FortiGate 7081F and 7121F firewalls, ensuring compliance with industry best practices and organizational security requirements.
- Designed and implemented Cisco network architectures utilizing Nexus 7K, 5K, and 2K series switches, with a strong understanding of Nexus hardware and inter-module traffic flow.
- Hands-on experience with Cisco 7200, 3800, 3600, 2800, 2600, and 1800 series routers, as well as Cisco 2900, 3500, 4500, and 5500 series switches.
- Configured and maintained Juniper devices, including MX-80, MX-480, SRX-100, SRX-110, SRX-550, and EX-4200 series.
- Extensive experience in designing, deploying, and troubleshooting LAN and WAN environments, including Frame-Relay, EtherChannel, and IP routing protocols such as RIPV2, OSPF, EIGRP, and BGP, along with implementing ACLs, VLANs, STP, VTP, HSRP, and GLBP.

TECHNICAL SKILLS:

Firewalls	Palo Alto (PA-5000, PA-3000, PA-1000 series), Fortinet firewalls (FortiGate1000, FortiGate60E, FortiGate200E, FortiGate1000F, FortiManager, FortiAnalyzer), Cisco Firepower (4115, 4125, 4145 series), Cisco ASA 5506-X, 5508-X series, Checkpoint R77.30 and R80.0
Data Center	Nexus (9300, 7000, 5000 series), Arista 7050SX3 and Juniper EX2200, EX2500, and EX3200 series
Cloud	AWS EC2, VPC, IAM, S3, CloudFront, RDS, Elastic Cache, Route53, CloudWatch, Cloud Formation, Amazon Elastic Map Reduce (EMR), and Azure Network Security Groups NSGs, VPC, Azure Firewall, Express Route.
Network Monitoring Tools	Solarwinds, Nagios, Wireshark.
Load Balancers	F5 BIG-IP i5000, r4000, r2000 series LTM, GTM and Load Balancers
SD WAN Technology	Cisco Viptela (vEdge, vManage, vSmart & vBond) Aruba S2500, 3800 and Meraki MR30H technology. PRISMA SD-WAN

Professional Experience:

University of Vermont Health, Vermont, NY
Sr. Network security Engineer

April 2024 - Present

Responsibilities:

- Implemented security approach, layout, and tracking for distributed IPv4 and IPv6 connection using **Palo Alto Networks Panorama**.
- Worked extensively with **Palo Alto PA-3430, PA-5250, PAN-PA-7000-DPC-A**, and Panorama **100, 500 series** devices running **PAN-OS 8.6**.
- Managed and optimized **Palo Alto Panorama** environments to maintain high performance and strengthen network security operations.
- Configured and deployed **Panorama** to centralize firewall management, ensuring uniform security policies across multiple **Palo Alto** firewalls.
- Configured and managed firewall policies on **FortiGate 3000F** devices, ensuring secure handling of inbound and outbound traffic to protect enterprise networks.
- Deployed **FortiGate 3200F** firewalls across various network architectures, including standalone setups, high-availability clusters, and virtualized environments.
- Established and optimized **VPN** connections on **FortiGate** firewalls to enable secure remote access for users and branch offices.
- Hands-on experience in deploying and troubleshooting **Juniper SRX 4300 and SRX 2300** firewalls while providing direct customer support in service environments.
- Designed and implemented complex network infrastructures incorporating **Cisco 7600, 7200, and 3800 series routers, along with GSR 12k routers and Cisco 2950, 3500, 3550, 3750, 5000, 6500, 9300, and 9500 series switches**.
- Installed and fine-tuned **Cisco Firepower 4115 and 1120** Next-Generation Intrusion Prevention Systems (NGIPS) for real-time threat mitigation.
- Designed and deployed highly scalable and resilient **Cisco ISE** solutions to support dynamic network security requirements.
- Configured and enforced **DNS Security Extensions (DNSSEC)** through **Infoblox** to safeguard against DNS spoofing and cache poisoning threats.
- Established and maintained access control policies in compliance with **ISEC standards**, ensuring least privilege access across network resources.
- Managed configuration, maintenance, and upgrade processes for data center infrastructure, including **Nexus 7k, 6k, 5k, 2k, and UCS** platforms.
- Configured and optimized **LAN MDF-to-IDF connectivity** using **Nexus 5000** series switches for seamless network communication.
- Enhanced high availability of **Cisco Nexus** switches by deploying **Hot Standby Router Protocol (HSRP)** and **Virtual Router Redundancy Protocol (VRRP)**.
- Conducted disaster recovery testing and fine-tuned **Active Directory** backup strategies to minimize downtime and data loss during security incidents.
- Designed, implemented, and managed **SD-WAN** solutions using Viptela architecture to improve network efficiency and streamline operations.
- Utilized **vManage** to monitor **Viptela SD-WAN** infrastructure, **track vEdge router and vSmart controller performance**, and generate analytical reports.

- Integrated **Viptela SD-WAN** with cloud services to facilitate seamless connectivity for branch offices and remote users accessing cloud-hosted applications.
- Leveraged **Cisco ACI's** dynamic policy enforcement capabilities to adapt contract filters for evolving network and application requirements.
- Configured and deployed **Cisco ACI Multi-Pod architecture** to extend **ACI fabric** across multiple data center pods.
- Designed and implemented contract filters within **Cisco ACI** to regulate communication between **Endpoint Groups (EPGs)** for enhanced network security.
- Deployed **Arista** switches for network telemetry and real-time performance monitoring, proactively identifying and resolving potential issues.
- Configured and managed **AWS Network Load Balancers (NLB)** to efficiently distribute application traffic across multiple targets.
- Hands-on experience with network automation and firewall migration, including FTD and FMC configuration for seamless on-premises-to-cloud connectivity via AWS.
- Implemented **Aruba ClearPass** Policy Manager and **ClearPass Guest Access Manager** to authenticate wireless users, integrating with Aruba Virtual Mobility Controllers and APs such as **Aruba 6000 controllers, AP65, AP70, AP124, and AP125.**

Charter Communications, Charlotte, NC
Sr. Network security Engineer

Oct 2022 – March 2024

Responsibilities:

- Implemented **a shared-services architecture in Cisco ACI** to facilitate communication across multiple **VRFs (Virtual Routing and Forwarding)**, improving network efficiency.
- **Configured VMM domains within ACI** to enable seamless **dynamic policy enforcement** in virtualized environments.
- Defined and enforced **security policies in Cisco ACI**, ensuring compliance with **predefined security controls.**
- Deployed and managed **FortiManager** for streamlined **policy enforcement and administration** of a multi-site network with **FortiGate 7081F and 7121F firewalls.**
- **Secured wireless connectivity** by integrating **FortiAP access points** with FortiGate firewalls, ensuring a **robust and protected wireless network.**
- Worked on **FortiAnalyzer for in-depth security log analysis**, generating actionable reports to proactively detect and mitigate security threats.
- **Implemented Fortinet's threat prevention mechanisms**, including **intrusion prevention, antivirus, and application control**, for enhanced security posture.
- **Stayed up to date with Cisco Nexus software updates and features**, integrating them seamlessly into network designs to enhance **performance and security.**
- Designed and deployed **Cisco network solutions** leveraging **Nexus 7K, 5K, and 2K series**, optimizing **hardware utilization and traffic flow** across network modules.
- Configured **advanced networking protocols such as OSPF, BGP, and VXLAN on Cisco Nexus switches**, ensuring optimized routing and alignment with **modern data center standards.**

- Provisioned and configured **Juniper SRX 1500 and SRX 1600 firewalls** for remote site deployments.
- Worked on **troubleshooting tools and commands on Cisco routers**, conducting **maintenance and diagnostics** across Cisco 2500, 4000, and 6500 series routers.
- **Implemented HSRP on dual Cisco 7206 routers** to enable high availability and **hot standby routing**.
- **Led incident response initiatives using Cisco Firepower SM-56**, investigating and mitigating security breaches through **advanced threat detection and forensic analysis**.
- **Monitored and applied security updates for Cisco Secure Firewall 3105**, ensuring protection against **emerging cyber threats**.
- **Deployed and managed Palo Alto PA-7020 firewalls**, securing **data center infrastructure**, including **routers, switches, and firewalls**.
- **Collaborated with teams to analyze Palo Alto firewall logs and reports**, resolving **complex network security challenges**.
- **Configured, monitored, and troubleshot Palo Alto 5400 and 3220 firewalls**, using **Panorama M500** for centralized management.
- **Reviewed and optimized Palo Alto firewall security policies**, eliminating unnecessary rules to **improve lookup efficiency**.
- **Performed regular network scans using ISEC tools (or vulnerability scanners)** to proactively identify and remediate security weaknesses.
- **Monitored Cisco ISE reports and audits**, coordinating with security teams to authorize or secure **unauthorized devices detected on the network**.
- **Strengthened incident response strategies using Infoblox Threat Intelligence**, swiftly detecting and mitigating potential **DNS-related security threats**.
- **Ensured compliance with industry standards by integrating security controls within Active Directory**, maintaining regulatory adherence.
- **Designed and deployed Leaf-Spine topologies using Arista switches**, creating a **high-bandwidth, low-latency network infrastructure** for data centers.
- **Extended SD-WAN capabilities to cloud applications** by integrating **Viptela SD-WAN with cloud services**.
- **Optimized SD-WAN Viptela deployments** using insights from **vAnalytics reports** to enhance **network performance and efficiency**.
- **Designed and implemented hybrid WAN connectivity via Viptela SD-WAN**, seamlessly integrating **MPLS, broadband, and LTE transport links**.
- **Established BGP peering between an on-site data center in Newark and AWS cloud**, ensuring efficient interconnectivity.
- **Configured AWS network architecture**, including **VPC, subnets, Internet Gateway, NAT, and Route Tables**, to enable secure and scalable cloud operations.
- **Implemented AWS networking components**, such as **subnets, Access Control Lists (ACLs), peering connections, and VPN tunnels**, supporting **EC2, VPCs, S3, and Route 53**.
- **Collaborated with vendors to verify the compatibility of security solutions with Active Directory**, ensuring seamless integration.

- **Extensive experience in deploying, configuring, and troubleshooting Cisco Meraki Layer 2 and Layer 3 switches**, including **MS225, MS250, and MS350 models**.
- Involved in maintaining **F5 BIG-IP GTM** for **DNS-based traffic distribution**, ensuring high availability and optimal performance across geographically dispersed data centers.
- Deployed and managed high availability (HA) clusters using **F5 BIG-IP i7000** series devices to ensure seamless failover and minimize downtime.

Lancaster General Health, Lancaster, PA
Network security Engineer

March 2019 – Aug 2022

Responsibilities:

- **Configured Access Control Lists (ACLs) on ASA firewalls** to enhance network security.
- Hands-on experience **with Palo Alto Panorama, UI version 8.0.2, and VM-300 series firewalls** for centralized security management.
- Proficient **in creating** High-Level Design (HLD) and Low-Level Design (LLD) **diagrams using Microsoft Visio**.
- Experienced the identifying and fixing security events and network connectivity issues by utilizing technologies such as packet capture, logging, and real-time monitoring while troubleshooting firewall-related issues on **Cisco ASA**.
- Monitored and maintained client firewall, intrusion detection systems and **VPN** systems including **Checkpoint Firewall 21k, 13k, R77.30, VPN-1, Secure VPN, Secure IDS**.
- Worked on Check Point NGFW policies were created and put into place to guarantee a large enterprise network's application-level visibility, threat prevention, and granular access controls.
- **Reviewed, analyzed, prioritized, approved, and executed** network infrastructure changes, including **configuration modifications on Cisco Catalyst 4500, Nexus 5K switches, and Juniper EX2200/2300 switches**.
- **Configured ASR 9001, 9010, and Catalyst 6509 routers** with **HSRP** for network advertisement in BGP and OSPF.
- **Involved in the configuration and deployment** of **Cisco 7600, 7200, 3800 series routers**, as well as **Cisco 2950, 3500, 5000, 6500 series switches, and Nexus 5K, 7K, and 9K**.
- **Implemented Cisco 3750, 4500, and 6500 switches** in a **multi-VLAN environment**, utilizing **inter-VLAN routing, HSRP, ISL trunking, and EtherChannel**.
- Experienced in **deploying** Meraki wireless access points, including **MR20, MR33, MR42, and MR52 models**.
- Designed and implemented **Silver Peak SD-WAN solutions**, migrating from **traditional MPLS to SD-WAN technologies**.
- Installed and configured **Cisco Meraki wireless access points** (MR66, MR74, and MR84) in **warehouse environments**.
- Deployed and **configured Meraki appliances (MX80, MX60) via Meraki MX400 Cloud**.
- Managed **Cisco wireless access points** through **Cisco Wireless Controllers (5508 and 5520)**.
- Implemented and configured **F5 BIG-IP LTM-6400 load balancers**, including **profile and iRule configurations**.

Zolon Tech, India
Network Analyst

Dec 2016 – Feb 2019

Responsibilities:

- Troubleshooting end-user reported problems, thoroughly and accurately documenting problem in trouble management tool.
- Analyzing and resolving a high percentage of initial customer contact in the areas of **PC/LAN**.
- Built several **Red Hat Linux** servers to provide file storage, system backups and UPS monitoring.
- Troubleshooting network issues like by pinging the host by pinging the default gateway. **Contacting ISP (PerunaNet)** for assistance.
- Setting up VOIP network in the engineering building. Check for **DNS issues** by pinging the server's name. Experience with **Wireshark, TestTCP & OPNET**. Managing & Troubleshooting **DHCP** issues.
