SUMMARY

Senior software engineer with 8+ years of hands-on experience in C#, ASP.NET Core, Azure, AWS and React, specialized in developing solutions for finance and retail industries. Delivered 3 enterprise-level applications that met both business objectives and customer-orientation principle.

SKILLS

C#	.NET	ASP.NET	ASP.NET Core	ASP.NET MVC	JavaScript	TypeScript	C	C++	Node.js
React	Angular	Next.js	Vue.js	Blazor	Azure	Azure DevOps	AWS	EKS	
MS SQL Server	PostgreSQL	MongoDB	LINQ	Entity Framework	EF Core	Terraform			
Datadog	Git	GitHub	GitLab	Apache Kafka	RabbitMQ	CI/CD	xUnit	NUnit	
SonarQube	Microservices								

EXPERIENCE

Lead Software Engineer

Kyte

📅 08/2024 - 08/2025 📍 San Francisco, CA

- Architected a resilient microservices-based payment processing platform using C#, ASP.NET Core 7, React, MS SQL Server, and RabbitMQ, incorporating Saga, and Event Sourcing patterns to ensure PCI-DSS compliance, reliable transaction processing, and fault tolerance for payroll deductions and financial workflows.
- Led API integrations with third-party logistics systems through Azure API Management, implementing rate limiting, API versioning, and caching to improve scalability and reliability.
- Configured performance monitoring with Kusto queries in Azure Application Insights, enhancing Azure Function app reliability and reducing troubleshooting time by 40%.
- Optimized database operations with advanced indexing, partitioning, and caching strategies in SQL Server and Redis, while improving query performance by 30% under high transaction loads.
- Built advanced monitoring solutions using Datadog APM, OpenTelemetry, and Azure Monitor, implementing distributed tracing for microservices, identifying bottlenecks, and achieving a 25% performance improvement.
- Developed secure and scalable infrastructure using Terraform for provisioning, resource management, and creating custom IAM roles and policies to ensure robust access control for cloud-hosted services.
- Collaborated with product managers and stakeholders to align technical solutions with business goals, delivering features with customer satisfaction and operational efficiency.

Senior Software Engineer

Kyte

📅 06/2021 - 07/2024 📍 San Francisco, CA

- Deployed a Store-and-Forward system by adding an auxiliary bank server to temporarily store failed transactions and automatically reprocess after 1 min.
- Enhanced backend API security by implementing OAuth 2.0, JWT authentication, IP whitelisting, and secure token storage, ensuring compliance with financial regulations and safeguarding sensitive data.
- Streamlined end-to-end loan processing by implementing automated risk assessments and reconciliation controls, reducing cycle time by 25% and improving compliance accuracy across retail banking operations.
- Deployed NGINX Reverse proxy within AKS cluster to manage internal service traffic, support path-based routing, and enforce security policies.
- Implemented feature flags in CI/CD pipelines via Azure DevOps (ADO), enabling microservices configuration without impacting live workflows, achieving 80% testing coverage and reducing testing time by 50% through automated testing with xUnit and Cypress.
- Conducted A/B testing for React microfrontend features using Adobe Target, increasing conversion rates by 10% and contributing to a 10% revenue growth in 2023.
- Enabled interactive financial data visualization by integrating Power BI and Tableau dashboards, improving analysis of transaction trends, payroll summaries, and payment analytics, driving a 30% improvement in decision-making efficiency.

EXPERIENCE

Full Stack Developer

Yakabod

📅 07/2018 - 05/2021 📍 Frederick, MD

- Migrated legacy ASP.NET Web Forms physician management platform backend to a modern ASP.NET Core-based microservices architecture, leveraging AWS Lambda and Step Functions to enhance scalability and reduce cloud costs by 17%.
 - Built a scalable Web API template using vertical slice architecture and the MediatR library, incorporating CQRS and Domain-Driven Design (DDD) principles to define domain models and bounded contexts, improving modularity and reducing API response times by 15%.
 - Designed a data access layer using ADO.NET to interact with Amazon RDS, crafting T-SQL stored procedures to streamline transaction tracking and reporting, reducing operational errors by 20%.
 - Automated testing processes with Selenium WebDriver, ensuring seamless integration for patient portals, billing systems, and provider interfaces while enhancing with integration and load testing using Postman and JMeter, ensuring API stability under high transaction volumes.
 - Spearheaded development of a React + Next.js client and serverless backend with AWS Lambda, optimizing performance and reducing infrastructure costs by 10%.
 - Designed a multi-stage API Gateway to manage high-volume transactions, incorporating VPC Endpoints, by developing .NET & Node.js Lambdas to handle authorization, and proxying of requests to the services hosted in EKS Cluster.
 - Streamlined backend workflows by transitioning legacy ETL processes to microservices and serverless architectures with EKS, and AWS Lambdas, reducing infrastructure costs by 70% and improving reliability for claims and records processing.
 - Enhanced database performance using Entity Framework Core with advanced LINQ queries, lazy/eager loading strategies, and seamless database migrations, reducing query times by 30% and ensuring reliability during schema updates.
-

Software Engineer Intern

Ace Info Solutions

📅 07/2015 - 06/2018 📍 Reston, VA

- Developed RESTful APIs with well-defined JSON schemas and API versioning to support evolving business requirements for ACH transfers, reducing development time by 25%.
- Executed the integration and testing of more than 10 distinct Web Services coupled with WCF services, ensuring accurate transaction handling for ACH transfers validated through SoapUI, which improved overall system efficiency.
- Performed ASP.NET Web Forms validations using .NET Validation Controls and Razor for client-side validation, leveraging Telerik controls for interactive data visualization to enhance user experience and ensure data accuracy.

EDUCATION

Bachelor of Science, Computer and Information Technology

Shepherd University

📅 08/2014 - 05/2018 📍 Shepherdstown, WV
