

MERHAWI NEGASH

☎ 702-517-9979 | ✉ meramegash@gmail.com | Las Vegas, Nevada

PROFESSIONAL SUMMARY

Dedicated and highly skilled SQL Database Administrator with over 6 years of experience in database management, optimization, and security. Proficient in designing, implementing, and maintaining complex on-premises and cloud-based database systems, including Azure SQL Database. Adept at improving database performance, ensuring high availability, and implementing robust disaster recovery solutions. Excels in collaborating with cross-functional teams to enhance application efficiency and secure database environments.

SKILLS

- **Databases:** SQL Server, Azure SQL Database, MySQL, Oracle
- **Tools:** SQL Profiler, Performance Monitor, SSMS, Redgate, Azure Data Studio
- **Scripting Languages:** T-SQL, PowerShell, Python (for automation)
- **Operating Systems:** Windows Server, Linux
- **Other Skills:** Database design, query optimization, disaster recovery planning, high availability (AlwaysOn, Clustering), security management, continuous process improvement, data migration, and Azure resource management.

EXPERIENCE

SQL Server Database Administrator, Resort World Inc.

Las Vegas, Nevada, Hybrid | Jan 2022 – Current

- Managed and optimized over 50 production databases, ensuring 99.9% availability and peak performance.
- Successfully upgraded SQL server 2014 to SQL server 2019 across multiple environments.
- Designed and implemented Extract, Pump, and Replicate processes to capture, transfer, and apply real-time transactional data across platforms.
- Implemented automated monitoring systems, decreasing database-related incidents by 20%.
- Provided full support, configuration, and management of power BI Report Server, ensuring high availability and security.
- Administered and optimized SQL Server Reporting Services (SSRS), including report-deployment, permissions management, and troubleshooting.
- Supported Power BI on SQL Server by managing data source connections, report publishing, and access control.
- Configured and maintained SQL Server Analysis Services (SSAS) for tabular/cube model deployment.
- Enhanced system reliability by optimizing Goldengate processes for scalability and performance.

- Developed and enforced database security protocols, resulting in a 15% reduction in security incidents.
- Collaborated with development teams to optimize SQL queries and stored procedures, improving application performance by 25%.
- Designed disaster recovery strategies using Azure Site Recovery and Geo-Replication.
- Reduced security incidents by 15% by developing and enforcing robust database security protocols.
- Safeguarded assets by planning and implementing disaster recovery strategies leveraging azure site Recovery and Geo-Replication.
- Supported application deployments by creating appropriate staging environments for testing purposes.
- Assisted with troubleshooting application-related issues by analyzing SQL queries and providing recommendations for improvement.
- Maintained consistency and managed integration with existing structure through decisive leadership of new development.
- Implemented backup and recovery strategies, ensuring data availability in case of system failures or disasters.
- Participated in capacity planning exercises, forecasting future storage requirements based on current trends.
- Monitored database performance metrics, identifying potential bottlenecks and tuning system accordingly.
- Developed and implemented database maintenance plans to ensure data integrity and optimal performance.

SQL Server Database Administrator, ABC Supply Co. Inc.

Jun 2019 - Dec 2021 | San Francisco, California, Remote

- Administered SQL Server databases, including backup/recovery, performance tuning, and security management.
- Monitored database performance using tools like SQL Profiler and Azure Monitor, identifying and resolving bottlenecks.
- Supported developers in database design and query optimization, contributing to the development of robust applications.
- Conducted regular database health checks to proactively identify issues before they impact users.
- Developed and maintained comprehensive documentation for database systems, procedures, and configurations, promoting team collaboration and streamlined operations.
- Assisted in the integration of on-premises databases with Azure SQL, streamlining operations and enhancing scalability.
- Monitored database performance using tools such as SQL Profiler, Azure Monitor, and Performance Monitor, identifying and resolving bottlenecks to maintain optimal system operation.
- Automated routine administrative tasks using PowerShell scripts and Azure automation, reducing manual intervention and improving efficiency.

- Created and maintained detailed documentation for database systems and procedures, enhancing team collaboration and knowledge sharing.
- Managed database access controls, security measures, and backup processes in alignment with organizational policies and project requirements.
- Migrated on-premises SQL Server databases to Azure SQL Database, ensuring minimal downtime and data integrity during transitions.
- Managed database access, security and backups in line with project plans.

Junior SQL Database Administrator, CapB InfoteK

Mar 2018 - May 2019 | Denver, CO, Remote

- Assisted in managing SQL Server databases, including backups, recovery, and performance tuning.
- Participated in database migration projects, including transitions to Azure SQL environments.
- Conducted routine database maintenance tasks, such as indexing and integrity checks.
- Gained hands-on experience with SQL Server tools and Azure Data Studio, establishing a strong foundation for future growth.
- Created and maintained documentation for database systems, procedures, and configurations.
- Achieved operational objectives by testing and modifying existing databases.
- Improved query response times through effective index management and database optimization techniques.

EDUCATION

- Bachelor of Science in Computer Information Systems: Computer Science, University of Nevada, Las Vegas, Dec 2022
- Associate in Arts (A.A.) in Communications, College of Southern Nevada, Nov 2018

CERTIFICATIONS

- Microsoft Certified: Azure Database Administrator Associate
- Microsoft Certified: SQL Server Database Administrator

PROFESSIONAL DEVELOPMENT

- SQL Server Performance Tuning Workshop (2021)
- Advanced T-SQL Programming Course (2020)
- Azure SQL Database for DBAs (2019)
