SUMMARY

Senior Engineering Lead with 10+ years of experience in .NET development, specializing in scalable platforms using C#, .NET Core, ASP.NET Core, and Angular. Skilled in cloud technologies (Azure), CI/CD pipelines, and mentoring junior developers. Adept at applying design patterns like SOLID and DRY to create efficient, maintainable solutions.

SKILLS

VB.NET, C# 9/10/11/12, Javascript, Typescript, HTML, CSS, .NET 5/7/8, .NET Framework, .NET Core, ASP.NET, ASP.NET Core, ASP.NET MVC, ASP.NET Web Forms, Entity Framework, Entity Framework Core, ADO.NET, ServiceStack, GraphQL, REST API, Angular, AngularJS, Blazor, jQuery, Bootstrap, Materialize, Svelte, Foundation, D3.js, Azure, AWS, CI/CD Pipelines, Docker, Kubernetes, Git, Github, Gitlab, RabbitMQ, Jenkins, Jira, MySQL, MSSQL, NoSQL, SQL Server 2019/2022, PostgreSQL 9.2/9.3/9.4, MongoDB, T-SQL, LINQ, NUnit, xUnit, MSTest, Playwright, Cypress, Jasmine, Agile, Scrum, Waterfall, MVC/MVVM, OOD/OOAD, SDLC, Windows 10/11, MacOS 10.9/11, Visual Studio, VS Code.

EDUCATION

Bachelor of Science in Computer Science

Brigham Young University | Provo, UT 84602

August 2011 - August 2015

EXPERIENCE

Software Engineering Lead

Cross River

October 2023 – Present | Teaneck, NJ 07666

- Led development of high-performance platforms using ASP.NET Core 5 & .NET 8, optimizing transaction processing and customer satisfaction.
- Architected microservices with .NET 8 & Docker, improving scalability and reducing downtime.
- Developed and optimized GraphQL APIs for flexible and efficient data retrieval.
- Built responsive UIs with Angular 16 & Bootstrap 5 for a consistent experience across platforms.
- Improved backend performance with SQL Server 2019, optimizing complex queries.
- Integrated secure authentication with OAuth 2.0 and ASP.NET Identity to protect sensitive data.
- Used Blazor for interactive web components to enhance user engagement.
- Automated testing with xUnit & Playwright, improving application reliability.
- Mentored junior developers, fostering best practices in .NET 6 development.
- Collaborated with DevOps teams on Azure DevOps & Kubernetes to streamline CI/CD pipelines.
- Developed high-availability solutions with Azure Services and ServiceBus.
- Built real-time analytics dashboards with SignalR & Angular for actionable insights.
- Integrated third-party services like RabbitMQ & AWS Lambda to extend platform functionality.

- Executed database migrations with EF Core, ensuring smooth transitions.
- Applied C# 9 features to modernize code and improve data encapsulation.
- Enhanced application security using OWASP best practices and ASP.NET Core Security.
- Participated in Agile ceremonies and facilitated workshops on modern development practices.

Senior Software Engineer

CCC Intelligent Solutions

April 2020 - September 2023 | Chicago, IL 60607

- Developed scalable backend services with ASP.NET MVC 5 & .NET Framework, improving performance and reliability.
- Built and optimized RESTful APIs with ASP.NET Web API 2 for efficient data exchange.
- Designed dynamic UIs with AngularJS & Bootstrap, enhancing user experience.
- Improved database efficiency with Entity Framework 6 & SQL Server 2016.
- Integrated real-time data with SignalR & WebSockets, reducing latency.
- Strengthened security with OAuth 2.0 & JWT authentication.
- Conducted testing with xUnit & NUnit, minimizing post-deployment issues.
- Participated in Agile sprints, enhancing project delivery.
- Architected healthcare app with .NET technologies, improving system efficiency.
- Led data optimization with SQL Server and T-SQL for actionable insights.

Software Engineer

Voice Systems Engineering

September 2017 – March 2020 | Feasterville, PA 19053

- Engineered backend services using ASP.NET MVC 5 & .NET Framework, improving scalability and performance.
- Developed and integrated RESTful APIs with ASP.NET Web API 2 for efficient front-end communication.
- Collaborated with front-end teams to implement real-time updates with AngularJS.
- Enhanced application security by implementing OAuth 2.0 and token-based authentication.
- Optimized SQL Server 2014 database performance through query tuning and stored procedures.
- Led the migration of legacy components to .NET Framework 4.6, reducing technical debt.
- Conducted unit and integration testing with xUnit & NUnit, decreasing post-deployment issues.
- Actively participated in Agile sprints, improving project timelines and delivery.
- Documented technical processes to support knowledge transfer and ongoing development.

Senior Software Developer

Utah Tech Labs

September 2015 – August 2017 | Draper, UT 84020

- Developed new features for web applications using C# 5, ASP.NET 4.5, and Entity Framework.
- Collaborated with senior developers to design and implement RESTful APIs, improving performance and user satisfaction.
- Optimized SQL Server 2012 queries, reducing data retrieval times and improving application efficiency.
- Participated in peer code reviews, enhancing code quality and reducing errors.
- Presented findings and proposed solutions during sprint meetings to align the team with project goals.
- Authored technical documentation to support ongoing projects and ensure knowledge transfer.
- Facilitated the deployment of .NET applications on Azure, enhancing scalability and reliability.
- Evaluated and tested new tools, recommending improvements to the development process.
