

Misgana Tefera

Indianapolis, IN (317)457-0093| misgtefera@outlook.com

PROFESSIONAL SUMMARY

Database administrator with 7 years of experience managing SQL Server databases in high-stakes environments. Skilled in designing and implementing complex systems for optimal performance and data recovery. Expert in performance optimization, disaster recovery planning, and security measures. Known for implementing High Availability and Disaster Recovery solutions like Always On, Replication, and Log Shipping. Proficient in database maintenance, monitoring, and security protocols to ensure system health, availability, and robust data protection.

TECHNICAL SKILLS

- **Database Management:** MS SQL Server 2014, 2016, 2017, 2019, 2019,2022, MySQL, Oracle, PostgreSQL, Azure SQL Database.
- **Operating Systems:** Windows Server, Linux.
- **Performance Tuning:** Database tuning, Database security, Maintenance tasks, Performance metrics, Query optimization, Indexing Strategies, Execution plans, Profiler and Dynamic management views (DMV).
- **High Availability & Disaster Recovery:** Always on Availability Groups, Database Mirroring, Log Shipping, Replication, Backups and Restore Strategies, Standby Configurations, Failover Clustering..
- **Backup & Recovery:** Full, Differential, Transaction log backups, Disaster recovery planning.
- **Security:** Database security, Security Policies, User Authentication, Authorization, Data Encryption, Roles, Permissions, Auditing, Compliance, Vulnerability Management.
- **Scripting and Automation:** Python, T-SQL, PowerShell, SSIS.
- **Monitoring tools:** SQL Server Management Studio, Extended Events, Activity Monitor, SQL Server profiler, Performance Monitor.
- **Cloud & Virtualization:** Azure SQL Database, AWS RDS, AWS EC2, AWS S3, Lambda, Storage Gateway, VMware, Hyper-V.
- **ETL & Reporting:** SSIS, SSRS, Power BI, Tableau, Power Automate, Data Warehousing

PROFESSIONAL EXPERIENCE

DOLLAR GENERAL

Nov 2021- Present

Senior SQL Server DBA, Indianapolis, IN(Remote)

- Installed, managed and administered SQL Server 2014/2016/2017/2019/2022 instances.
- Experienced in Database Administration on Production Servers with server configuration, performance tuning and maintenance with outstanding troubleshooting capabilities.
- Extensive experience in implementing HADR solutions like Replication, Log shipping, Clustering and mirroring on physical and virtual machines.
- Experienced in Database health Check, Indexing, Updating Statistics.
- Experience working with Azure Data Factory and Azure data warehouse and Tuning ETL Jobs – SSIS.
- Extensive experience in Creating Users and assign/manage permissions based on the level of access the user would need; ensure robust and full proof security of assets.
- Implemented data security by using Transparent Data Encryption (TDE) to secure client's sensitive data and assigning permissions to users based on the principle of least privilege.
- Stay up to date on the latest SQL Server features and functionalities to optimize database performance and leverage new capabilities.
- Experienced with disaster recovery planning and ensured the plan is well-documented and tested regularly.
- Experienced in Refine and automate regular processes, track issues, and document changes.
- Collaborated effectively with IT colleagues and other departments to ensure seamless database integration within the broader infrastructure.
- Skilled in analyzing and assessing query execution plans and DMVs; expertise in assessing and implementing indexes and partitioning.
- Implemented isolation levels, concurrency effects and different levels of blockings for data integrity.
- Managed SQL server databases, Azure SQL databases and Managed Instances.
- Implemented Backup and restore on-prem and Azure SQL databases, Managed Instances.
- Experienced in Monitoring SQL Agent jobs and responding to critical job notifications on failure.
- Upgraded/Migrated SQL Server Instances/Databases from older version SQL Server to new version of SQL Server.

- Strong analytical and problem-solving skills to diagnose and resolve database-related issues.
- Configured the DB SMTP mail for the notification purposes.
- Used DBCC Utilities to maintain the consistency and integrity of each database in the production server.
- Experience in using native tools like index tuning wizard, database tuning advisor, profiler, performance monitor, activity monitor, Event Viewer for performance analysis.
- Experience in using SSIS tools like Import/ Export Wizard, Package Installation, and Package Designer.
- Used third party tools like Redgate and Jira.

JPMorgan CHASE BANK

Feb 2019 – Nov 2021

SQL Server DBA, Cincinnati, OH(Remote)

- Managed and supported High Availability and Disaster Recovery restores with Always ON, Replication, Log-Shipping.
- Used DMVs and Functions for server performance monitoring
- Implemented database recovery models, backup strategies, and restore jobs.
- Applied Security Patches, Service packs, and evaluated performance.
- Created database objects like Views, UDFs, and Triggers for Business Logic.
- Created SSIS Packages for data import/export.
- Conducted side by side and in-place upgrades for system enhancements.
- Designed database recovery plans, participated in disaster recovery drills, and managed storage space efficiently.
- Used shrinking/compression options in backup and restore jobs for storage space management.
- Performed database consistency checks using DBCC Utilities and handling data corruption.
- Experience in Rebuilding/ Reorganizing Indexes based on Index fragmentation levels.
- Implemented SQL server logins, Roles and Authentication modes as a part of security policies.
- Configured the DB SMTP mail and Alert system for notification purposes.
- Created and scheduled maintenance plans for jobs like checking fragmentation and backup plans.
- Used Monitoring tools like Extended events, Database Tuning Advisor, Execution plans Performance Monitor and Activity Monitor for performance tuning.

- Configured Transparent Data Encryption (TDE) and Auditing.
- Used Redgate, SQL Compare and Data Compare tools to compare SQL Database Schemas.
- Able to adapt to new technologies and keep up with industry trends and best practices.
- Worked beyond regular hours based on business demands. Provided 24x7 on-call production support.

HOME DEPOT

Mar 2017 - Feb 2019

SQL Server DBA, Indianapolis, IN (Remote)

- Strong experience in designing and implementing backup and disaster recovery strategies depending on the RPO & RTO.
- Implementing SQL Server security and Object permissions like creation of users, granting permissions, and assigning roles to users.
- Experience implementing and troubleshooting High Availability of database servers using Replication, Log Shipping, and Always On AG.
- Configuring and Scheduling SQL Server agent Jobs, Alerts, operators, Maintenance plans, Database Mail Configuration, and Transparent Data Encryption.
- Strong experience in designing and implementing backup and disaster recovery strategies depending on the RPO & RTO.
- Experience in identifying and troubleshooting database health, integrity checks and fixing them.
- Experience in Database Refresh from production to lower environments as per business requirements.
- Managed and involved in SQL performance tuning, identifying locking, and blocking issues using Native and third-party tools to enhance and boost performance and SQL Databases.
- Experience in Performance Tuning/Query tuning, execution plans, trace flags and SQL Profiler.
- Applied Patches and Service packs, hot fixes to update different versions of MS SQL server.

EDUCATION

- Bachelor's degree.
