EDUCATION

B.S. In Healthcare Administration

Florida Memorial University

Specialization: Governance, Risk & Compliance (GRC) & Information Security

Certifications: Security+, Network+, Cybersecurity Compliance & Frameworks, Data Engineering Basics, Cloud Computing, AZ-500 Cloud Security, AZ-104 Azure Administrator, Applied Scrum for Agile Project Management

TECHNICAL SKILLS

Systems & Infrastructure: Windows 10/11, Active Directory (ADUC, GPO, OU Management), DNS/DHCP

Networking: LAN/WAN support, VLAN configuration, IP troubleshooting, Router/Switch setup, VPN connectivity

Cloud & Security: Microsoft Entra ID (Azure AD), Defender for Cloud, RBAC, Azure Key Vault, PIM

Programming & Automation: PowerShell, Python (automation), Splunk, Microsoft Sentinel, CIS-CAT Lite, Nessus

Project & Process Management: Agile/Scrum, ITSM, Risk Registers, Documentation, Playbooks

WORK EXPERIENCE

System Administrator

Jun 2025 – Nov 2025

(Contract – via CompuCom/Apex Systems)

- Accomplished enterprise-wide **Windows 11 OS deployments**, as measured by a **100% success rate and zero critical downtime**, by **imaging and configuring 50+ financial branches**, **verifying connectivity**, and **enforcing encryption standards**.
- Achieved **90% first-time resolution of network device issues**, by performing root-cause analysis, implementing preventive configuration updates, and **troubleshooting connectivity problems on the spot**.
- Reduced repeat tickets by 60%**, as measured by fewer login and access errors, by **resetting permissions**, **provisioning devices**, and **applying consistent encryption policies**.

Cloud Security Analyst

Jan 2020 – Feb 2021

Haven (Contract)

- Accomplished **secure migration of protected health information (PHI)** to Microsoft Azure by **full encryption-at-rest validation and zero audit findings**, by configuring **RBAC, Azure Key Vault, and Defender for Cloud** policies to maintain regulatory compliance.
- Accomplished stronger identity security, as **measured by a 70% reduction** in unauthorized access attempts, by **implementing MFA, Conditional Access, and least-privilege RBAC** configurations across Azure AD identities.

PROFESSIONAL DEVELOPMENT

Azure Infrastructure

- Accomplished secure segmentation of cloud resources, as measured by zero unauthorized traffic, by deploying NSGs, Azure Firewall, and private endpoints.

Network Troubleshooting Playbook

- Achieved faster network incident resolution, as measured by a 40% reduction in troubleshooting time, by documenting DNS, DHCP, and VLAN root-cause procedures for Tier 2 and field technicians.

Redstone Infrastructure Group Audit

- Achieved stronger control governance, as measured by closing 10 identified compliance gaps, by aligning policies with NIST SP 800-53 and CMMC standards during an internal audit.
- Delivered an enterprise-ready risk register, as measured by improved tracking of vulnerabilities and remediation efforts, by categorizing risks by severity and prioritizing action plans for stakeholders.

Horizon Valley Medical Center Audit

- Achieved improved HIPAA compliance readiness, as measured by resolving 8 data-access and encryption issues, by reviewing incident response and encryption practices across clinical systems.

Active Directory Security & Hardening

- Executed user and group access hardening, as measured by zero unauthorized access events during testing, by enforcing Group Policy Objects (GPOs), password complexity, and MFA integration.

Role-Based Access Control (RBAC)

- Accomplished improved identity and access management, as measured by successful enforcement of least-privilege permissions across test environments, by creating and assigning custom Azure roles, managing service principals, and auditing access logs through Entra ID (Azure AD).

Privileged Identity Management (PIM)

- Accomplished stronger administrative control, as measured by full visibility into privileged user actions, by implementing just-in-time access and approval workflows within Microsoft Entra ID (Azure AD)

FraudDetector (ShellHacks 2025 by INIT FIU)

- Implemented a web-based PCI DSS compliance dashboard, as measured by accurate identification of non-compliant transactions in simulated environments, by analyzing payment and storage logs for encryption and access control violations.

ACTIVITIES & LEADERSHIP

National Society of Black Engineers Member - South Florida Professionals Chapter

Board Member – Washington Park Recreation Board (Community Leadership)

IT Audit and Governance - Community Member
