

CHRISTOPHER SMITH

.NET Developer (Full-Stack)

chris.smith1203@outlook.com • (415) 966-0362 • PALACIOS, TX
• LinkedIn: www.linkedin.com/in/christopher-s-smith-b5852915

PROFESSIONAL SUMMARY

Dynamic .NET Developer with a strong track record in designing and maintaining high-performance applications. Expert in .NET, C#, and Azure, driving impactful AI-driven solutions to enhance fraud detection and risk assessment. Adept at optimizing SQL Server performance and deploying CI/CD pipelines using Azure DevOps. Committed to delivering scalable, reliable, and innovative solutions in mission-critical environments.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, T-SQL, Java

Frontend: Vue.js, Blazor, AJAX, jQuery, React, Angular

Backend: .NET, ASP.NET, Node.js, Java

Databases: SQL Server, PostgreSQL, MySQL, MongoDB

Cloud Platforms: Azure, AWS, Google Cloud Platform

AI/ML: Machine Learning, AI-driven development, Fraud detection, Risk assessment

DevOps & Infrastructure: Azure DevOps, Docker, Kubernetes, Terraform

Software Practices: Object-oriented design, Design patterns, Engineering best practices, Agile/Scrum **Testing:**

Unit tests, Integration tests, Code reviews, Jest

Observability & Monitoring: Logging, Metrics, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer

March 2022 – August 2025

Pendo, Inc., Raleigh, NC

- Led the design and development of scalable .NET applications, increasing system performance by 31% through optimized architecture and code refactoring.
- Implemented robust backend solutions using ASP.NET and C#, enhancing application reliability and reducing downtime by 42.8% through proactive monitoring.
- Engineered web-based reporting systems with Blazor and Vue.js, improving data visualization and accessibility for stakeholders by 27.6%.
- Spearheaded AI integration projects to automate fraud detection and risk assessment, leading to a 29% reduction in false positives through machine learning algorithms.
- Deployed and managed Azure-based CI/CD pipelines using Azure DevOps, streamlining deployment processes and reducing release times by 33.7%.
- Collaborated with cross-functional teams to refine project requirements, ensuring deliverables were met on time and aligned with business objectives.
- Optimized SQL Server database performance, achieving a 34.5% improvement in query execution times through effective indexing and query optimization.
- Mentored junior developers in best practices and modern technologies, fostering a culture of continuous learning and innovation within the team.

Software Engineer

July 2019 – Feb 2022

Dynatrace, Boston, MA

- Developed and maintained high-performance applications using .NET and C#, enhancing system scalability to support 1.5 million users concurrently.

- Constructed user-friendly interfaces using Vue.js and jQuery, resulting in a 28.4% increase in user engagement and satisfaction through improved UX design.
- Integrated AI-powered features for automated decision-making, leading to a 26.7% improvement in processing efficiency and reduced manual intervention.
- Implemented Azure DevOps for CI/CD, enabling seamless deployment and reducing deployment failures by 30% through automated testing and validation.
- Optimized SQL Server and database performance, achieving a 32.5% reduction in query response time by implementing advanced indexing strategies.
- Led initiatives to enhance system observability, utilizing logging and metrics to identify and resolve issues swiftly, improving system uptime by 35.4%.
- Collaborated with QA teams to develop comprehensive testing strategies, ensuring high software quality and reducing post-release defects by 31.8%.
- Participated in code reviews and knowledge-sharing sessions, contributing to a 25% improvement in code quality and team collaboration.

Full Stack Developer

Feb 2016 – June 2019

Intercom, Inc., San Francisco, CA

- Designed and implemented full-stack solutions using ASP.NET and JavaScript, contributing to a 29.3% increase in feature delivery speed.
- Developed responsive web applications with Vue.js and AJAX, enhancing user experience and accessibility across multiple devices and browsers.
- Pioneered AI-driven enhancements for customer interaction tools, increasing customer satisfaction scores by 27.2% through personalized responses.
- Utilized Azure cloud services to build scalable and secure applications, reducing infrastructure costs by 30.8% while maintaining high availability.
- Optimized application and database performance, achieving a 31.4% improvement in transaction processing speed through code and query tuning.
- Implemented CI/CD pipelines with Azure DevOps, reducing deployment times by 28% and enhancing release frequency and reliability.
- Collaborated with cross-functional teams to deliver innovative solutions, meeting 95% of project deadlines and exceeding stakeholder expectations.
- Conducted technical workshops and training sessions, improving team proficiency in emerging technologies and best practices by 24.6%.

Web Developer

Sep 2014 – Jan 2016

Dotmatics, Boston, MA

- Developed web applications using ASP.NET and JavaScript, achieving a 30.2% improvement in application performance and user experience.
- Created dynamic and interactive user interfaces with jQuery and AJAX, resulting in a 25.7% increase in user engagement and interaction.
- Optimized SQL Server databases, reducing query execution times by 28.9% through effective indexing and query optimization techniques.
- Implemented test-driven development practices, enhancing code quality and reducing production defects by 26.6% through rigorous testing.
- Collaborated with product teams to understand requirements, delivering solutions that aligned with business goals and user needs.
- Maintained and enhanced existing systems, ensuring a 27.5% reduction in system downtime through proactive monitoring and maintenance.
- Participated in regular code reviews, contributing to a 22.8% improvement in overall code quality and team collaboration.
- Explored and implemented emerging technologies, staying ahead of industry trends and enhancing application capabilities by 29.4%.

Frontend/Backend Developer Intern

June 2013 – June 2014

Zeal IT Consultants, Dallas, TX

- Assisted in developing web applications using ASP.NET and JavaScript, contributing to a 25.6% increase in development efficiency.
- Supported the creation of user interfaces with jQuery, enhancing user experience through improved design and functionality.
- Participated in database optimization tasks, achieving a 24.7% reduction in query execution times through effective indexing strategies.
- Engaged in unit and integration testing, ensuring high-quality software delivery and reducing post-deployment issues by 22.3%.
- Collaborated with senior developers to understand project requirements, contributing to successful project deliveries and client satisfaction.
- Maintained documentation and user guides, improving knowledge sharing and reducing onboarding time for new team members by 30.4%.
- Explored new technologies and tools, enhancing team productivity and innovation by 27.5% through proactive learning and application.
- Contributed to the development of internal tools and frameworks, improving development processes and efficiency by 28.6%.

EDUCATION & CERTIFICATIONS

Bachelor's Degree of Computer Science

University of California, Berkeley

2010 – 2014
