Beaverton, Oregon, 97007 / (Green Card Holder) / <https://www.linkedin.com/in/nikhil-r-1a68224b/>

EXECUTIVE SUMMARY:

Certified Salesforce Administrator, Sales Cloud, and Salesforce AI Associate with 7 years of progressive experience in the IT industry, specializing in Salesforce Business Analysis, platform administration, and cross-functional project delivery. Proven track record of supporting business-critical operations across Service Cloud, Sales Cloud, and integrated fraud and payment systems. A confident communicator and trusted liaison between business and technical teams, skilled in backlog prioritization, user story grooming, workflow automation, and stakeholder engagement. Experienced in Case Management, Access Management, and Fraud Monitoring across systems like CMSe, FIS (IBS Insight), Tsys, and MTS Payment Recovery. Reduced average **Treasury case resolution** time by **30%** by automating intake, triage, and escalation processes for time-sensitive financial transactions.

Strong core competencies include process optimization, risk identification & mitigation, user training & onboarding, UAT coordination, production support, and root cause analysis. Adept in Agile environments with hands-on experience in DevOps, JIRA, API testing (Postman), and reporting/dashboard development. Recognized for bringing order to chaos, empowering teams, and maintaining composure under pressure. Passionate about continuous learning, making meaningful contributions, and driving long-term business value through scalable, user-focused solutions.

CERTIFICATION'S:

- Sales cloud certified | Salesforce Admin Certificate | Salesforce Associate AI | Scrum Master Accredited Certified

AREA OF EXPERTISE:

Salesforce Cloud	Sales Cloud, Service Cloud, Marketing Cloud
Reporting Tools	Tableau and Power BI
Project Management and Tools	Asana, Google Suite, Slack, Visio, Lucid Chart, Snagit, Jira, Devops and Monday.com
Database	SQL Server, MySQL, Work Bench

WORK EXPERIENCE:

City National Bank (Los Angeles), CA Jan 2022 – Jan 2025

Salesforce Business Analyst, AVP

Project:

As a Salesforce Business Analyst and Administrator at City National Bank, I played a key role in implementing and managing **Salesforce Service Cloud** solutions tailored for **Fraud Operations, ACH Disputes, Credit Card Servicing, Claims Management**, and the **Payment Recovery team**. I was responsible for setting up dedicated Salesforce instances for the **ACH and Fraud teams**, aligning platform capabilities with operational workflows, compliance standards, and user experience goals. Led the end-to-end delivery of business requirements—owning the process from user story creation and backlog grooming to test planning, UAT coordination, and post-deployment support. I configured Salesforce environments by managing **user roles, profiles, sharing rules, and record types**, while customizing **standard and custom objects, junction objects, page layouts, validation rules, and Flow automation**. Working closely with cross-functional stakeholders in strategic planning, operations, QA, and development, I helped design and optimize workflows for **fraud detection, ACH dispute handling, claims processing, and payment recovery**. I also supported seamless system integrations with **CMSe, FIS (IBS Insight), Tsys, and MTS Payment Recovery**, enabling secure and reliable data exchange across platforms. Utilizing **JIRA and DevOps**, I managed deployment pipelines, tracked user stories and defects, and supported production go-lives with **pre-release validation and root cause analysis**. Additionally, I developed and maintained **dashboards and reports** to track SLA compliance, fraud volumes, dispute aging, and payment recovery KPIs—empowering leadership with actionable insights.

- Leading requirement-gathering sessions with clients to determine project requirements and documenting current and future business processes to understand the business strategy and recommend technology solutions that meet a business unit's overall vision
- Involved in creating gap analysis documents, business process and workflows of the organization with respect to Salesforce.com implementations.
- Worked as Salesforce Business analyst governing user account creation, personal information setup, password reset, Roles & Profile creation, user group creation, updating company profile, Network access setup.
- Preparing project-related documents including training courses, job aids, flow diagrams, BDR, root cause analysis reports, use case diagrams, benefit decks, and other project-related artifacts.
- Writing Test Plans / Test Scripts and performing UAT regression unit testing and smoke testing also leading meetings with clients including System Demos, UAT Kickoff sessions, and end-user training.
- Performing Salesforce Admin tasks including configuration of the Approval process, custom objects/ fields, user setup, user account maintenance, platform development, process automation using flows, email alerts, web-to-case, email-to-case, workflow rule, classic email templates, API Integration, 3rd party

application Integration.

- Managing business security requirements through Organization-Wide Defaults(OWD) settings, profiles, roles, role hierarchy, permission sets, groups, field-level security, and sharing rules.
- Created a report to categorize fraud cases by root cases, enabling teams to prioritize process improvement and mitigation strategies.
- Implemented and customized Salesforce Service Cloud for **Treasury Management teams**, supporting ACH disputes, wire exceptions, RTP case handling, and payment recovery workflows.
- Designed **custom ACH case management workflows** in **Salesforce Service Cloud**, integrating with **payment recovery systems (MTS, APIs)** to **automate tracking and dispute resolution**, reducing manual processing time by **30%**
- Collaborated with fraud and payments teams to integrate **ACH chargeback and return codes into Salesforce**, enabling automated **fund recovery tracking**, reducing unauthorized transactions by **25%**.
- Defined **real-time ACH fraud monitoring rules**, integrating **Salesforce with fraud detection APIs** to flag suspicious transactions, improving fraud detection rates by **20%**.
- Designed **automated workflows in Service Cloud** for **credit card disputes and chargebacks**, integrating with **TSYS/FIS for real-time transaction data**, reducing dispute resolution time by **35%**.
- Defined business logic for **automated fraud case creation** based on **suspicious credit card transactions**, ensuring **high-risk cases were prioritized via Omni-Channel routing**, reducing fraud resolution backlog by **25%**.
- Designed **Salesforce workflows for lost/stolen card replacement requests**, integrating with **card issuance APIs** to automate processing, reducing manual efforts by **40%**.
- Worked with risk teams to integrate **fraud scoring APIs with Service Cloud**, enabling real-time **risk assessment for transactions**, improving fraud prevention by **25%**.
- Led the implementation of **fraud case workflows** for **ACH, Wire, and Card fraud**, integrating with **Falcon & TSYS fraud detection systems**, reducing fraud resolution time by **35%**.
- Designed **Service Cloud Flows** to **automate fraud case escalations and SLA tracking**, ensuring high-priority cases were addressed **30% faster** and reducing **manual workload for agents**.
- Led integration of **Service Cloud with fraud monitoring platforms (Falcon, TSYS, ACH systems)**, enabling real-time fraud alerts within cases, reducing fraud investigation time by **25%**.
- Configured **Service Cloud Email & SMS alerts** for case status updates, reducing **customer follow-up inquiries by 30%** and improving **customer experience**.
- Worked with developers to integrate **Salesforce with fraud monitoring APIs (Falcon, TSYS, ACH fraud systems)**, enabling **real-time fraud risk scoring and alerts within Salesforce cases**, reducing fraud response time by **35%**.
- Defined business requirements for **Salesforce integration with credit card processing systems (FIS, TSYS, Visa, Mastercard APIs)** to enable automatic **transaction retrieval and dispute validation**, reducing manual processing time by **40%**
- Define Use cases for integration of **ACH and Wire transfer APIs** with Salesforce to track **payment reversals, chargebacks, and reimbursements**, reducing the time to recover fraudulent transactions by **30%**.
- Built and customized **Flow automations, validation rules, and record types** tailored to Treasury Ops, ensuring KYC compliance and approval routing for high-value disputes.
- Collaborated with developers to design **custom Visualforce pages** for fraud dispute case management, enabling **dynamic field population** and improving agent efficiency by **30%**
- Designed **Visualforce-based dispute submission forms** with **pre-populated fields, validation checks, and real-time transaction lookup**, reducing **submission errors by 50%** and enhancing compliance.
- Led the integration of **Service Cloud with external financial systems (FIS, TSYS, ACH platforms)** to provide real-time transaction visibility within **customer records**, enabling proactive client engagement.
- Partnered with developers to design a **custom Lightning Web Component (LWC) for fraud case tracking**, integrating **real-time transaction details, case status updates, and risk scoring**, improving fraud resolution time by **35%**.
- Mapped and automated **case workflows for transaction research, exceptions, and RTP failures**, ensuring SLA alignment and standardized procedures across teams.
- **Proactive Customer Communication via AI Chat**
When a claim was escalated and linked to a broader fraud investigation, the chatbot updated the customer on next steps, documents needed and expected resolution timelines. This proactive communication helped reduce anxiety, call volume, and **increased CSAT scores by 18%**.
- Collaborate with Tableau team to define **real-time fraud monitoring dashboards in Tableau**, integrating **Salesforce case data and external fraud detection sources**, improving fraud trend visibility and enabling proactive decision-making, reducing fraud losses by **30%**.
- **Automated Linking Between Claims & Fraud Cases**
The **AI chatbot** intelligently recognized when a customer-submitted claim (e.g., an unauthorized transaction) required linkage to an existing or new fraud monitoring case. It automatically associated the claim with the correct fraud case using identifiers like transaction ID, card number, or account activity pattern—eliminating the need for manual cross-referencing by agents.

Truckstop.com, Chicago, (Remote), Jan 2021- Dec 2021
Salesforce Business Analyst

Project: Truckstop.com, a leading freight and logistics platform, sought to enhance its **Salesforce ecosystem** to improve efficiency in **lead management, contract renewals, freight tracking, and customer support**. The objective was to **automate processes, enhance system integrations, and drive AI-powered analytics** to reduce manual efforts and increase operational effectiveness. The initiative focused on **real-time data accessibility, streamlined workflows, and automation-driven decision-making** to improve sales pipeline efficiency, optimize case management, and enhance marketing automation.

- Created Business Requirement Documents, File Interface Agreements, System Requirement Documents in Confluence along with creating User Stories and maintaining agile boards in JIRA and salesforce custom build app called stars for ticketing system related to salesforce issues.

- Ensured data integrity through the appropriate use of de-duping, loading, and exporting tools, for bulk of data using Data Loader.
- Involved in creating gap analysis documents, business process and workflows of the organization with respect to Salesforce.com implementations.
- Prioritize the backlog based on parameters such as 'frequency of use', impact on business and easy of development.
- Gathered requirements and worked with developers to implement **Lightning Web Components for contract management**, allowing sales reps to **view pricing adjustments, historical transactions, and contract renewal details in real-time**, increasing renewal efficiency by **30%**.
- Defined business rules for an **Apex Trigger to automatically reassign unresponsive leads** based on inactivity and priority, ensuring **faster follow-ups and increasing conversion rates by 20%**.
- Designed and optimized **custom Lightning record pages with conditional visibility**, improving **data accessibility for sales and customer support teams**, increasing productivity by **25%**.
- Facilitated the business stakeholder meeting for requirement elicitation.
- Implemented **Omni-Channel routing for live chat and email cases**, ensuring faster responses to high-priority trucking and brokerage inquiries, leading to **25% improvement in response time**.
- Worked with developers to deploy **Einstein Bots in Service Cloud**, automating responses to common support queries, reducing agent workload and **improving first-contact resolution by 20%**.
- Defined business requirements for **Service Cloud integration with freight tracking and logistics systems**, enabling **real-time shipment tracking within cases**, improving case resolution efficiency by **30%**.
- Implemented lead capture workflows using Salesforce **Web-to-Lead** and automation.
- Optimized **lead capture processes** integrating Salesforce with **Pardot and Marketing Cloud**.
- Defined **lead qualification criteria (BANT)** and implemented **lead scoring models** to improve conversion rates.
- Configured **subscription renewal tracking in Sales Cloud**, integrating automated **reminders for contract renewals and upsell opportunities**, boosting **customer retention by 20%**.
- Automated **lead assignment rules** using Salesforce **Omni-Channel and workflow rules**, ensuring **real-time lead distribution** based on geography, industry, and product interest.
- Defined API integration strategy to **connect Salesforce with carrier tracking systems (FourKites)** allowing **automated shipment status updates within customer service cases**, improving tracking efficiency by **40%**.
- Developed lead scoring models to prioritize high-potential customers.
- Defined business requirements for **Visualforce-enabled carrier onboarding forms**, integrating **automated verification workflows**, which **reduced onboarding time from 3 days to 1 day**.
- Assisted in revamping **Visualforce-based invoice reports**, integrating **custom filters for billing cycles**, leading to **faster invoice reconciliation** and a **20% reduction in customer disputes**.
- Streamlined lead conversion into opportunities with product and service bundling.
- Defined **real-time event-triggered marketing journeys** (e.g., abandoned cart, webinar registrations, contract renewals) in Marketing Cloud, increasing **customer retention by 20%**.
- Created **custom audience segments based on user behaviour, demographics, and purchase history**, enabling **hyper-personalized campaigns**, boosting **click-through rates by 40%**.
- Created **real-time logistics dashboards in Tableau**, tracking **carrier performance, freight load success rates, and delivery delays**, helping operations teams reduce **shipment inefficiencies by 30%**.
- Configured **Tableau reports integrating Service Cloud case data**, providing insights into **ticket resolution times, SLA compliance, and customer satisfaction trends**, leading to a **15% increase in first-contact resolution rates**.
- Enabled trucking companies to log support cases via a Customer Community portal.
- Partnered with data engineering teams to **optimize freight transaction data storage**, improving **query performance and reducing report generation time by 30%** for operational dashboards.
- Defined **database integration strategies** to sync Salesforce with **logistics and carrier databases**, enabling **real-time shipment tracking, automated status updates, and improved carrier performance analytics**.
- Developed several Custom Reports & Dashboards to better assist managers and report folder to provide report accessibility to appropriate personnel.
- Designed custom formula fields, field dependencies, validation rules, workflows and approval processes for automated alerts, field updates and email generation according to application requirements.

LPL Financial, Fort Mill, SC Aug 2019 – Dec 2020
Salesforce Business Analyst

Project: Developed Salesforce Applications to build Portals for the users where the Portals are used by Business user /Stakeholder who can schedule/ manage their project and sales life of product and investment, developed the portal as user friendly for the system.

- Created Business Requirement Documents, File Interface Agreements, System Requirement Documents in Confluence along with creating User Stories and maintaining agile boards in JIRA.
- Defined project scope and schedule while focusing on regular timely delivery of project.
- Assisted in team development while holding the teams accountable for their commitments and leveraging organizational resource to improve the capacity for project work, increasing the average time to deliver the new features by 15%.
- Support the product owner in managing the customer expectation for project deliverables and managing stakeholder communication resulting in a 21% increase in customer engagement with new feature.
- Designed **Salesforce-based loan origination workflows** to streamline **loan application intake, credit risk evaluation, and approval processes**.
- Integrated Salesforce with **credit bureau APIs (Experian)** to automate **credit score retrieval and risk profiling**, reducing loan processing time by **30%**.
- Designed **Salesforce-based portfolio tracking and risk assessment dashboards**, integrating with **financial advisory platforms**, improving portfolio

management efficiency by **30%**.

- Defined workflows for **automated KYC verification & onboarding for high-net-worth clients**, integrating with **third-party compliance tools**, reducing onboarding delays by **25%**.
- Defined **business requirements and functional specifications** for integrating **Salesforce Loan Management System with external banking platforms**, such as **FIS and Ellie Mae Encompass**.
- Ensured **seamless synchronization of borrower data, loan applications, approvals, and funding status** across multiple financial systems
- Enabled **automated payment reconciliation by integrating with ACH & Wire payment systems**, reducing **manual errors in loan repayment tracking by 30%**
- Integrated **third-party credit risk analytics tools (Experian)** to fetch **real-time credit scores, debt-to-income ratios, and payment history** for underwriting teams.
- Collaborated with legal and compliance teams to integrate **regulatory reporting tools (e.g., CFPB, FDIC compliance frameworks)** within Salesforce.
- Provided advisors with **automated risk scores for clients based on historical investment performance, market trends, and financial goals**, improving **investment decision-making accuracy by 40%**.
- Perform **business-to-systems** analysis and **problem-solving** analysis of complex functional issues and enhancements.
- Worked on supporting tickets in the following areas: Roles, Profiles, Access Settings, Workflow Rules, Validations, creation and modification of fields and page layouts, upload of data.

Guaranteed Returns, Long Island, NY, Jun 2018 – Jun 2019
Salesforce Business Analyst

- Designed, setup and maintained Salesforce standard objects, custom objects, and junction objects, while also structuring user roles, security profiles and workflow rules.
- Ensured data integrity through the appropriate use of de-duping, loading, and exporting tools, for bulk of data using Data Loader.
- Developed reports, dashboards, and processes to continuously monitor data quality and integrity. Onsite point of contact for Salesforce for the inside sales team.
- Responsible for configuration activities for Salesforce.com which includes Sales, Service and Communities applications, including new areas of configuration, analyzing, and fixing assigned faults, peer-to-peer reviews and testing.
- Developed User Stories Traceability Matrix using Jira to trace each software requirement to test case.
- Adapted team's process to validate user stories in a scrum model.
- Used the change sets to deploy code between the sandbox and production environments for final implementations and prepared Deployment documents.
- Worked as Salesforce Admin support governing user account creation, personal information setup, password reset, Roles & Profile creation, user group creation, updating company profile, Network access setup.
- Designed custom formula fields, field dependencies, validation rules, workflows and approval processes for automated alerts, field updates and email generation according to application requirements.
- Used import wizard for insert, update, of data from Salesforce.com. Used it to read, extract and load data from comma separated values (CSV) files.
- Imported excel based customer information records into accounts, contacts and assets using Data Loader and import wizard.
- Maintained and configured Users, Roles, Page Layouts, custom objects, picklists to support vital business functions and requirements.
- Gathered requirements and had a thorough understanding of interpreting customer/client's business needs and process flows to translate them into operational requirements.
- Involved in gathering customer requirements from business user teams spread over customer service.
- Assisted Production Support Team, solve the user raised cases on daily basis.
- Created various reports (Summary reports, matrix reports, and joint reports), pie charts, dashboards.

Moody's Analytics, New York, NY, Jul 2017 - May 2018 (Internship)
Salesforce Analyst

- Regular meeting coordination with business users, stakeholders, and technical team to understand and deliver required BRDs.
- Creating, upgrading, and maintaining functional requirements and designing documents in close coordination with Solution Architect designing a solution.
- Configuring and building Salesforce CRM solution based on design document.
- Coordinate and resolve issues and defects raised by QA and UAT team.
- Designed and executed test plans based on the functional requirement scenarios to test the customizations or developments that were done throughout the implementation.
- Offshore coordination with development and QA team.
- Created and configured custom reports and dashboards generating data for business managers to better utilize SFDC as a service tool.
- Created record types and configured respective page layouts for SObjects to hold different customer segments.
- Used SharePoint to communicate document updates with the implementation team and business users.
- Meeting milestones under extreme tight deadlines and deliverables.
- Responsible for configuration activities for Salesforce.com which include Sales, Service and Communities applications, including new areas of configuration, analyzing, and fixing assigned faults, peer-to-peer reviews, and testing.

EDUCATION

- Bachelor of engineering in **electronics and communication** (2015), VTU University (India)
- Master's in **computer science** (2018), Monroe College (New York)
