

NAVEED SALEEM

PYTHON DEVELOPER

White house station, NJ | +1 201-335-8498 | naveed.saleem2040@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- **4+ years** of experience in Web/Application Development as a **Python Developer** in analytical programming using python with skills in analysis, design, development, testing, and deploying software applications.
- Knowledge of all phases of **SDLC** like Requirement Analysis, Implementation and Maintenance, and good experience with Agile and Waterfall.
- Knowledge of various Python Integrated Development Environments like various IDEs like **PyCharm** and **Jupyter Notebook**.
- Good Knowledge of developing web applications in **Python** implementing MVC/MVT architecture using **Django**, and **Flask**.
- Proficient in relational databases like **SQLite** and **MySQL** databases and wrote and executed various **MySQL** database queries from **Python MySQL** connector and **MySQL dB** package.
- Worked with **Git** makes projects more organized while preventing data loss when changes are made to source code.
- Considerable Experience in working on different Operating Systems like **Windows** and **Mac-OS**.

EXPERIENCE

AIG, New York, NY-USA

Jan 2022 – Present

Python Developer

- Collaborated with **Agile** teams to deliver features aligned with sprint goals, conducting peer code reviews to ensure adherence to best practices.
- Migrated legacy systems to **Python-based microservices**, improving scalability and reducing server downtime by **40%**.
- Working with various Python Integrated Development Environments like Visual Studio Code, PyCharm, and Jupyter Notebook.
- Developed **real-time data processing scripts** to monitor and collect live data from APIs, ensuring up-to-date insights.
- Designed and maintained **SQLite** databases for high-traffic applications, ensuring data integrity and security compliance.
- Fetched and processed **JSON data from REST APIs**, normalizing and transforming it into structured datasets for data analysis.
- Conducted **regular security audits and code reviews**, improving overall application security compliance.
- Mentored junior developers on **unit testing with PyTest** and **Git workflows**, fostering team productivity.

Science Soft, Dallas, TX- USA

Jan 2021 – Dec 2021

Python Developer

- Implemented **Agile Methodology** for building an internal application while adhering to the **Software Development Life Cycle (SDLC)**.
- Developed **scalable, high-performance Python applications** using **Core & Advanced Python**, optimizing execution speed by **30%**.
- Developed and maintained **scalable, modular Python applications** using **Django**.
- Designed and implemented **RESTful APIs** to support web and mobile applications, ensuring seamless data exchange.
- Designed efficient data structures and algorithms to optimize **Python applications**, reducing time complexity in key operations.
- Migrated the **Django** database from **SQLite** to **Postgres SQL** with complete data integrity.
- Automated testing processes with **PyTest** and **Unit Test**, increasing test coverage and reducing production defects.
- Managed version control workflows with **Git** and **GitHub** ensuring smooth collaboration and code quality.

SKILLS

Methodologies:	SDLC, Agile, Scrum, Kanban
Programming Languages:	Python (Core & Advanced), Shell Scripting, SQL
Frameworks and Libraries:	Django, Flask, FastAPI, Pandas, NumPy
IDE's:	PyCharm, Jupyter Notebook
Web Development:	RESTful APIs, HTML, CSS, JavaScript, jQuery, Ajax, Json
Databases	PostgreSQL, MySQL, SQLite
Cloud & DevOps:	AWS (Lambda, EC2, S3, RDS), Docker
Version Control & CI/CD:	Git, GitHub/GitLab, Jenkins, Bitbucket
Testing & Debugging:	PyTest, Unit Test, Postman
Soft Skills:	Problem-solving and debugging, Code optimization & performance tuning, Effective communication & collaboration, Mentorship & peer code reviews

EDUCATION

Master in Computer Science - Punjab University, Lahore, Pakistan

Bachelor in Computer Science - National College of Business Administration & Economics, Lahore, Pakistan
