<i>Performance Testing</i>	<i>Security Testing</i>	<i>API Automation</i>
<i>Client Server, Desktop automation</i>	<i>Service Virtualization</i>	<i>Mobile SaaS Solutions</i>
<i>Remote workforce management</i>	<i>Continuous Integration</i>	<i>Test Data Management</i>
<i>Test Lifecycle Management</i>	<i>IT Architecture</i>	<i>Big Data</i>
<i>Identity and Access Management</i>	<i>Azure DevOps</i>	<i>Atlassian Tools</i>
<i>Application, Tool Support, and Training</i>	<i>Accessibility ADA Testing</i>	<i>Web and RWD automation</i>
<i>Retail, Investment banking, Insurance domain expert</i>	<i>Selenium, Appium, Playwright</i>	<i>IVR, CRM</i>

PROFESSIONAL EXPERIENCE

Toshiba Global Commerce Solutions, Durham, NC

Manager Quality Engineering

February 2022 to January 2025

- Led a dynamic team of 15-18 software test automation and L2 Support engineers, providing mentorship, setting performance goals, and individual development plans (IDP). Achieving team success by consistently exceeding project goals and deadlines.
- Develop and implement a comprehensive QA strategy aligned with company goals.
- Establish and maintain QA processes, policies, and procedures to ensure product/service quality.
- Monitor and report on key quality metrics, providing insights and recommendations for improvement.
- Consistently delivered world-class Quality releases on time and budget for leading Toshiba clients – Costco, CVS, Albertsons, Kroger, BJ's, Wegmans, and many more for retail giants.
- Successfully implemented automation across front UI using Selenium, Cypress and API layer using Postbot Postman, resulting in daily savings of 725K.
- Increased automation coverage for professional services test team from 20% to 75% across different clients like Costco, Kroger, Wegman, Way Fair, Alex Lee
- Reduced L2 support tickets by 10% in 3 months by reducing defect leakage.
- Designed and implemented microservices automation using Postman, Newman, and Jenkins tools for API Layer.
- Implemented Produce Recognition automation solution in Azure Blob storage for Integrated computer vision and Artificial Intelligence – AI.
- Developed robust automation strategy for the Professional Services test team across different product lines.
- POC on robotic arm automation solutions for handling pin pads, credit card operations for ELERA cloud agnostic product, and ACE legacy automation framework.
- Designing and implementing a cloud-agnostic CI/CD DevOps pipeline for ELERA cloud product, enabling seamless deployment across Azure, AWS, and GCP for leading retail enterprises.
- Developed a self-checkout automation tool for different client solutions.
- Developed an automation dashboard and quality process dashboard using Microsoft Power BI for management reporting and identifying areas for improvement across different clients and releases.

MetLife, Cary, NC

Quality Engineering Leader

October 2016 to November 2021

- Led and delivered cross-functional large-scale applications over a 2-million-dollar budget for global end users with complex distributed multi-layer architecture, working closely with international and regional teams across diverse team cultures in a SAFe Agile and Lean IT model.
- Implemented Oracle ERP migration to Oracle Cloud Infrastructure for all the modules with robust automation.
- Provide Technical Leadership and Strategic Direction for Quality Engineering

- Organization towards Test automation strategy, Digital Transformation, solution implementation for Multi-layer Automation Architecture, Azure DevOps, Mobile
- Architect automation with a pyramid model and savings of over half a million for CRM Salesforce SaaS application and Integration with IVR call center application aligning Digital Transformation.
- Implemented CI—Continuous Integration automation in the Atlassian stack, including JIRA, Bamboo, Bitbucket, and Azure DevOps transformation technologies.
- Reduced overall testing time by 50% by developing RWD - Responsive web design automation for hybrid customer-facing applications, reusing Selenium web automation scripts for mobile browsers, and enhancing the best customer experience.
- Onboarded Mobile cloud-based SaaS testing solution for MetLife Global Mobile applications testing by performing POC, analyzing different product capabilities, and negotiating pricing with significant savings across various vendors.
- Designed and implemented single sign-on (SSO) for a mobile cloud-based SaaS platform that supports over 1000 users across different geographic locations.
- Implemented service virtualization to adopt the shift left principle for REST API microservices Architecture testing using Parasoft.
- Implemented Automation for the IVR call center application using the Cyara automation tool.
- Managed, Installed, and Implemented Tricentis Tosca Suite of products for desktop, client-server, and DB automation solutions.
- Implemented migration from Quality Center (QC) to Tricentis q-Test TLM product and integrated with Automation tools.
- Onboarded ADA Tools - Level Access AMP, JAWS to support Accessibility testing ADA compliance.
- Implemented automation for the Blue Green deployment model to eliminate application downtime and the Canary deployment model.
- Developed Cypress Automation framework using Node.js, JavaScript, and NPM packages.

Fidelity Investments, RTP, NC

Senior Manager Quality Assurance Engineering

June 2012 to May 2016

- Delivered multiple large enterprise-scale programs spanning the spectrum of PI and WI Technology applications; successfully managed and delivered quality releases across enterprise client-facing and internal applications, including e-services, communication platforms, messaging, and personalization, integrating with upstream and downstream applications with different business units.
- Planning, budgeting, resource allocation, project execution & issue resolution across multiple strategic & tactical initiatives under the product line—applications.
- Led teams of over ten full-time employees across locations and dotted reports. Provide leadership through a structured process of goal setting, motivational leadership, team collaboration, and communication.
- Quality Assurance management of an extensive enterprise program—Oracle ERP migration to Next Generation.
- Implementing a contact center using Genesys Contact Center to enhance customer interaction experience.
- Design and build a comprehensive test data management (TDM) self-service portal on a private cloud using Rethink DB with cross-business unit collaboration to support development and QA teams for distributed and mainframe systems across multiple development and testing environments.
- Automation tool selections based on application technology stack, reusability, and team skills. Tools include Ruby, Selenium, See Test, Sahi, Cucumber, ETL Validator, and open-source tools, including mobile browsers.
- Interface with senior management and development partners for regular updates on the quality of the programs & initiatives, areas of improvement & next steps.
- Coaching & mentoring the team toward the organization's strategic initiatives.
