

# Shakur Shaik

DevOps Engineer | Cloud Engineer | Build & Release Engineer

Email: [artihc345@gmail.com](mailto:artihc345@gmail.com)

Phone: (385)-281 7870

## PROFILE SNAPSHOT

AWS Certified DevOps Engineer with over 12 years of experience in AWS and 15+ years in IT, designing, implementing, and optimizing scalable, secure, and cost-effective cloud infrastructures. Specialized in AWS, with proficiency in Azure, to deliver innovative and reliable cloud for modern enterprises. Adept at driving operational excellence through automation, robust security practices, and advanced DevOps methodologies.

- ❖ **AWS Services & Cloud Technologies:** Possesses deep expertise in AWS EC2, S3, RDS, Lambda, EKS, ECS, CloudWatch, IAM, VPC, CloudFormation, AWS Glue, Redshift, Route 53, Direct Connect, and AWS Security Hub, ensuring high availability and performance.
- ❖ **Azure Cloud Solutions & Integration:** Sound expertise in Azure infrastructure, including Azure Virtual Machines (VMs), Azure Kubernetes Service (AKS), Azure Functions, Azure DevOps (Repos, Pipelines, Artifacts), Azure Active Directory (AAD), and Azure Security Center, enabling secure and scalable cloud-native applications in hybrid environments.
- ❖ **Multi-Cloud & Hybrid Cloud Solutions:** Demonstrates proficiency in multi-cloud environments, leveraging Azure DevOps tools (Repos, Pipelines, Artifacts) and AWS services, enabling seamless cloud migration and hybrid-cloud deployments.
- ❖ **CI/CD & DevOps Automation:** Specializes in designing and implementing CI/CD pipelines, utilizing Jenkins, AWS CodePipeline, CodeBuild, CodeDeploy, and GitHub Actions, ensuring automated, secure, and efficient software delivery.
- ❖ **Containerization & Microservices:** Exhibits expertise in containerization and orchestration, working with Docker, Kubernetes (EKS, AKS), Helm, and Istio, to deploy scalable microservices architectures and cloud-native applications.
- ❖ **Infrastructure as Code (IaC) & Automation:** Holds deep expertise in Infrastructure as Code (IaC) using Terraform, AWS CloudFormation, and ARM Templates, enabling automated, version-controlled infrastructure provisioning.
- ❖ **Scripting & Workflow Optimization:** Demonstrates strong proficiency in scripting and automation, with expertise in Python, Bash, and PowerShell, ensuring workflow automation, process optimization, and infrastructure efficiency.
- ❖ **Monitoring & Observability:** Leverages advanced observability and monitoring tools, including AWS CloudWatch, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Sumologic, Datadog, and New Relic, ensuring real-time system health insights and performance optimization.
- ❖ **Security & Compliance:** Implements robust security best practices, enforcing IAM policies, security groups, encryption mechanisms, AWS Security Hub, and AWS KMS, ensuring compliance with PCI DSS, GDPR, and NIST standards.
- ❖ **Leadership & Collaboration:** Engages cross-functional teams to streamline DevOps processes, foster innovation, and enhance software lifecycle management, ensuring operational excellence and business value.

## TECHNICAL SKILLS

Cloud Platforms: AWS (IaaS, PaaS, SaaS), Azure, Google Cloud (GCP), OpenStack, Nutanix

AWS Infrastructure & Services: Auto Scaling Groups (ASG), Amazon EC2, Elastic Load Balancer (ELB), Amazon EFS, Amazon S3, AWS CloudFormation, AWS Redshift, Amazon Kinesis, AWS Lambda, Amazon ECS, Amazon EKS, AWS CodeCommit, AWS CodeBuild, AWS CodeDeploy, AWS CodePipeline, AWS VPCs, AWS API Gateway, AWS Secrets Manager, AWS KMS, AWS WAF, AWS Shield, AWS Step Functions, AWS Glue, Amazon Athena, Amazon EMR, AWS Snowflake, AWS Lake Formation, AWS Backup, AWS Transit Gateway, AWS Direct Connect

DevOps & CI/CD: Jenkins, Terraform, Terraform HCL, Docker, Ansible, Kubernetes, Chef, Puppet, Rundeck, Git (GitHub, GitLab, Bitbucket), Azure DevOps, Bamboo, TeamCity, Code Quality Testing (SonarQube)

Data Extraction & Databases: SQL, NoSQL, Nagios, Prometheus, Splunk, MongoDB, DynamoDB, Cassandra, Redis, PostgreSQL, MySQL, Google BigQuery, Snowflake

Development Tools & IDEs: Visual Studio Code, IntelliJ, PyCharm, Sublime, Linux, Unix, Bash Scripting, PowerShell, JSON, YAML, Groovy, Ruby, Go

Operating Systems & Virtualization: Ubuntu, Windows, Linux, UNIX, Windows Server (2008-2016), VMware, VirtualBox

Observability & Monitoring: AWS CloudWatch, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Datadog, New Relic, AppDynamics

SCM/Version Control Tools: Git, GitLab, Bitbucket, Perforce, Subversion (SVN)

Artifactory & Package Management: Nexus, Docker Hub, JFrog Artifactory

Infrastructure as Code: AWS CloudFormation, Azure ARM Templates

Project Management & Agile Tools: Agile, Scrum, JIRA, Trello, ServiceNow, Confluence  
Additional Tools & Services: AWS ECS Fargate, AWS CloudTrail, AWS IAM

## PROFESSIONAL EXPERIENCE

### DevOps Architect

Nov 2023 - Present | Breeze Airways, Cottonwood Heights, Utah

As DevOps Architect at Breeze Airways, I designed and implemented Zero Trust security principles, architected scalable cloud-native microservices for the MyTrips NextGen platform using AWS and Azure, and ensured compliance with PCI DSS, GDPR, and NIST. I automated security scans within CI/CD pipelines, hardened API security with OAuth 2.0 and JWT, and developed automated incident response workflows for real-time threat remediation using AWS Lambda and Azure Logic Apps.

- ❖ Designed and enforced Zero Trust security principles, including least-privilege access across Breeze Airways' hybrid cloud (AWS & Azure) environments.
- ❖ Implemented Cloud Security Posture Management (CSPM) tools to ensure continuous compliance with PCI DSS, GDPR, NIST, and HIPAA.
- ❖ Established secure vaulting systems using AWS Secrets Manager & HashiCorp Vault to safeguard credentials, API keys, and configurations.
- ❖ Architected serverless microservices for the MyTrips NextGen experience using AWS Lambda & API Gateway to enhance performance and scalability.
- ❖ Developed Azure Functions & API Management for a multi-cloud deployment model, ensuring high availability across AWS and Azure.
- ❖ Designed and optimized AWS VPC, Route 53, RDS, and IAM policies for secure, high-performance cloud networking.
- ❖ Integrated automated security scans (SAST, DAST, SCA) into CI/CD pipelines using SonarQube, Checkmarx, and OWASP Dependency-Check.
- ❖ Deployed container security tools (Trivy, Aqua Security, Twistlock) to monitor vulnerabilities in Docker images & Kubernetes clusters.
- ❖ Configured AWS CloudTrail & AWS Config to track API activity and ensure compliance.
- ❖ Hardened API security using OAuth 2.0, OpenID Connect, JWT, and TLS 1.3 encryption.
- ❖ Orchestrated Kubernetes clusters (EKS & AKS) for scalability, resilience, and cost efficiency.
- ❖ Managed Helm-based deployments and service discovery with Istio to improve traffic control & observability.
- ❖ Automated AWS & Azure infrastructure provisioning using Terraform, CloudFormation, and ARM Templates.
- ❖ Improved CI/CD pipelines with Jenkins, GitHub Actions, AWS CodePipeline, and Azure DevOps to automate deployments.
- ❖ Configured Ansible playbooks & modules to automate infrastructure configurations & application deployments.
- ❖ Implemented real-time security monitoring dashboards using Sumologic, Dynatrace, and AWS Security Hub.
- ❖ Designed centralized logging & analytics solutions using AWS OpenSearch (Elasticsearch), Kibana, and Logstash (EKL Stack).
- ❖ Configured AWS WAF & AWS Shield Advanced to mitigate DDoS attacks and protect APIs.
- ❖ Used Veracode for static & dynamic security testing to detect vulnerabilities before deployment.
- ❖ Built interactive dashboards in Power BI for real-time security analytics & risk assessments.
- ❖ Developed new data governance policies for compliance & operational efficiency.
- ❖ Led Scrum ceremonies (stand-ups, sprint planning, retrospectives) to increase team velocity & collaboration.
- ❖ Created Sequence, Use Case, & Activity diagrams to document NextGen MyTrips system design.

#### Tech Stack / Environment:

AWS (EC2, S3, Lambda, IAM, RDS, CloudFormation, Route 53, VPC, CloudTrail, OpenSearch, AWS WAF, AWS Shield, AWS Security Hub, CodePipeline), Azure (Azure Functions, API Management, Security Center, Power BI, Logic Apps, DevOps), DevSecOps (SonarQube, Checkmarx, OWASP ZAP, Veracode), Containers (Docker, Kubernetes, EKS, AKS, Helm, Istio), CI/CD (Jenkins, GitHub Actions, AWS CodePipeline, Azure DevOps), Infrastructure as Code (Terraform, CloudFormation, ARM Templates), Monitoring & Security (Sumologic, Dynatrace, Prometheus, Grafana, Aqua Security, AWS Config), Automation (Ansible, Python, Bash, PowerShell).

### AWS DevOps & Cloud Engineer

Jun 2021 - Oct 2023 | Black Hills Energy, Rapid City, South Dakota

As an AWS DevOps & Cloud Engineer at Black Hills Energy, I designed & deployed scalable, fault-tolerant cloud infrastructures on AWS & Azure, leveraging Terraform & CloudFormation for IaC automation. I optimized CI/CD pipelines, automated workflows with Lambda, and implemented Kubernetes for containerized applications to ensure high availability

& operational efficiency. My security-first approach included IAM role enforcement, encryption using AWS KMS, and robust monitoring solutions via Datadog, CloudWatch, and ELK Stack.

- ❖ Maintained multi-tier, highly available AWS & Azure environments using Terraform & CloudFormation, ensuring resilience across multiple availability zones.
- ❖ Engineered & implemented AWS cloud solutions (EC2, S3, RDS, Route53, IAM, CloudFormation, CloudWatch) with a focus on fault tolerance, auto-scaling, and high availability.
- ❖ Automated infrastructure provisioning & deployments using Terraform, Ansible, & Python, optimizing workflows for web servers, ELB configurations, S3 buckets, and database security.
- ❖ Developed AWS Lambda functions for workflow automation & event-driven tasks, enhancing efficiency and reducing manual intervention.
- ❖ Designed & optimized CI/CD pipelines using Jenkins, GitHub Actions, AWS CodePipeline, and Azure DevOps, enabling seamless build, test, and deployment automation.
- ❖ Integrated Git repositories & Ansible playbooks for automated infrastructure deployments, ensuring consistent configuration management.
- ❖ Applied DevOps methodologies to drive code reviews, unit testing, & release automation, aligning with Agile & Scrum workflows.
- ❖ Built & managed containerized applications using Kubernetes (EKS, AKS), Docker, and AWS ECS, ensuring efficient scaling & deployment.
- ❖ Developed microservice onboarding tools using Python & Jenkins, enabling seamless Kubernetes-based deployments.
- ❖ Automated container security scanning using Trivy & Aqua Security, enforcing compliance with DevSecOps policies.
- ❖ Enforced IAM roles, Security Groups, Network ACLs (NACLs), and AWS Organizations to implement role-based access control & network segmentation.
- ❖ Implemented AWS KMS for encryption at rest & in transit, ensuring compliance with PCI DSS, GDPR, and HIPAA.
- ❖ Deployed AWS WAF & AWS Shield Advanced to protect APIs & applications from threats, DDoS attacks, and SQL injection vulnerabilities.
- ❖ Designed secure networking solutions using AWS Transit Gateway, Direct Connect, & hub-and-spoke VPN models for hybrid cloud connectivity.
- ❖ Automated Datadog dashboards & AWS CloudWatch alerts using Terraform, enabling real-time monitoring & incident response.
- ❖ Configured & optimized ELK Stack (Elasticsearch, Logstash, Kibana) on AWS, integrating Logstash with S3 for centralized log management.
- ❖ Leveraged MongoDB & Elasticsearch for data indexing, storage, and analytics in large-scale applications.
- ❖ Implemented AWS X-Ray & Prometheus for distributed tracing & performance optimization.
- ❖ Automated resource deployment & monitoring, optimizing cloud spend & compute utilization across Dev, QA, Staging, & Production environments.
- ❖ Administered Terraform state files to ensure team collaboration & consistency in Infrastructure as Code (IaC) best practices.

#### Tech Stack / Environment:

AWS (EC2, S3, RDS, IAM, CloudFormation, Lambda, Route 53, VPC, CloudWatch, CloudTrail, AWS WAF, AWS Shield, AWS KMS, AWS Security Hub, CodePipeline, X-Ray), Azure (Azure Functions, Azure DevOps, Security Center, Power BI), DevSecOps (SonarQube, Checkmarx, OWASP ZAP, Veracode), Containers (Docker, Kubernetes, EKS, AKS, Helm, Istio, Aqua Security, Trivy), CI/CD (Jenkins, GitHub Actions, AWS CodePipeline, Azure DevOps, Terraform, Ansible), Monitoring & Logging (Datadog, ELK Stack, Prometheus, Sumologic, Dynatrace), Security & Networking (NACLs, Security Groups, Transit Gateway, Direct Connect, VPN), Databases & Storage (MongoDB, Elasticsearch, PostgreSQL, MySQL, AWS Redshift).

### AWS DevOps & Cloud Engineer

Jan 2019 – May 2021 | Harley Davidson, Milwaukee, Wisconsin

As a AWS DevOps & Cloud Engineer at Harley-Davidson, I led the migration of Linux environments to AWS, deploying EC2 instances within secure VPCs, and optimizing database performance. I designed security frameworks using AWS CloudFormation & Ansible, while automating infrastructure provisioning with Ansible Tower & Terraform. By leveraging DevOps practices, I enhanced infrastructure scalability & reliability through Kubernetes, Terraform, and CI/CD pipelines, ensuring high availability & cost efficiency.

- ❖ Spearheaded the migration of large-scale Linux environments to AWS, creating detailed migration plans and deploying EC2 instances within secure Virtual Private Clouds (VPCs).
- ❖ Architected and implemented AWS security frameworks using CloudFormation templates & Ansible modules, including IAM roles, Security Groups, Network ACLs (NACLs), and encryption policies.

- ❖ Automated infrastructure provisioning & deployments using Terraform, CloudFormation, and Python scripts, optimizing AWS environments for fault tolerance & high availability.
- ❖ Designed & optimized Elastic Load Balancers (ELBs) and Auto Scaling Groups, using CloudWatch metrics & alerts to fine-tune Auto Scaling configurations.
- ❖ Enforced Zero Trust security principles with IAM role-based access control, multi-factor authentication (MFA), & AWS KMS for data encryption.
- ❖ Enhanced cloud security & governance through AWS Config, AWS CloudTrail, and AWS Security Hub to monitor compliance with PCI DSS, GDPR, and HIPAA.
- ❖ Developed AWS Lambda functions to automate security policies & improve object categorization in S3 & DynamoDB.
- ❖ Designed & managed CI/CD pipelines using Jenkins, GitHub Actions, Bamboo, & AWS CodePipeline, ensuring seamless software delivery.
- ❖ Built & maintained deployment scripts using Docker, Jenkins, Maven, leveraging Nexus & JFrog Artifactory for secure artifact management.
- ❖ Authored Ansible Playbooks & Puppet Manifests to streamline server & application provisioning, integrating Ansible with Jenkins for automated deployment tasks.
- ❖ Used Terraform & Ansible Tower to automate AWS infrastructure configurations & virtual network provisioning.
- ❖ Administered & managed Kubernetes (EKS, AKS) clusters, optimized Docker containerization, and automated Kubernetes deployments using Ansible playbooks.
- ❖ Developed microservices architecture with Docker Swarm & Kubernetes, ensuring scalability & high availability.
- ❖ Monitored AWS infrastructure logs using CloudWatch, ELK Stack (Elasticsearch, Logstash, Kibana), and Prometheus, improving real-time alerting & analytics.
- ❖ Troubleshoot performance & database issues using Datadog, Sumologic, and CloudWatch metrics.
- ❖ Contributed to Change Approval Board (CAB) meetings, providing input on production application updates & release cycles.
- ❖ Coordinated JIRA-based testing efforts, release schedules, & reporting for seamless Agile development.

#### Tech Stack / Environment:

AWS (EC2, S3, IAM, CloudFormation, Lambda, RDS, Route 53, VPC, CloudWatch, CloudTrail, Security Hub, AWS KMS, AWS Config, AWS CodePipeline, AWS Auto Scaling, ELB), Azure (Azure DevOps, Azure Functions, Security Center), DevSecOps (SonarQube, Checkmarx, OWASP ZAP, Veracode), CI/CD (Jenkins, Bamboo, GitHub Actions, Terraform, Ansible, Puppet), Containers (Docker, Kubernetes, EKS, AKS, Helm, Istio), Monitoring & Logging (ELK Stack, Prometheus, Sumologic, Datadog), Infrastructure as Code (Terraform, CloudFormation, Ansible Tower, Python), Security & Networking (IAM, NACLs, Security Groups, Transit Gateway, Direct Connect).

### Sr. AWS Cloud & Data Engineer

Nov 2016 – Dec 2018 | Citizens Financial Group, Providence, RI

As a Sr. AWS Cloud/Data Engineer at Citizens Financial Group, I automated server builds, monitoring, and deployment processes using AWS EC2, Jenkins, and SSH. I led cloud data migration projects, implemented cost-effective storage solutions, and optimized infrastructure performance with Kubernetes, Terraform, and AWS services. Additionally, I enhanced CI/CD pipelines, ensuring seamless and efficient deployments while strengthening security & monitoring using CloudWatch, CloudTrail, and AWS Security Hub.

- ❖ Designed & implemented automated server builds, monitoring, and deployment solutions using AWS EC2, Jenkins agents, and SSH.
- ❖ Managed network configurations & traffic routing using Route 53, ELB, DNS, IP addressing, and CIDR notations.
- ❖ Deployed high-availability applications using Multi-AZ, Read Replicas, & AWS ECS to ensure reliability & performance.
- ❖ Automated CI/CD pipeline workflows for build, test, and deployment using Jenkins, GitHub Actions, and Terraform.
- ❖ Designed & maintained AWS Data pipelines & ETL/ELT processes for data ingestion & transformation in Amazon Redshift, S3, and data lakes.
- ❖ Built & optimized AWS Data Warehouses & data lakes, implementing partitioning, indexing, and compression strategies to improve query performance.
- ❖ Used AWS Glue & AWS DataSync to migrate on-premises data to AWS, ensuring data integrity & cost efficiency.
- ❖ Developed & implemented data quality checks & validation procedures to maintain data accuracy & consistency across AWS environments.
- ❖ Configured AWS CloudWatch & AWS CloudTrail for real-time security & performance monitoring, improving incident detection & response.
- ❖ Enforced IAM policies, Security Groups, and Network ACLs (NACLs) to restrict access & protect sensitive data.
- ❖ Implemented AWS Key Management Service (KMS) & encryption techniques to comply with PCI DSS, GDPR, and financial data security policies.

- ❖ Deployed & managed Docker containers on Kubernetes (EKS, AKS), facilitating seamless migration from AWS ECS to Kubernetes clusters.
- ❖ Conducted troubleshooting & performance optimization within Kubernetes clusters, ensuring scalability & efficiency.
- ❖ Developed event-driven AWS Lambda functions to automate AWS resource actions, integrating SNS, SQS, and API Gateway.
- ❖ Designed AWS storage solutions using Amazon S3, EBS, EFS, and Glacier, aligning with application needs & cost-saving strategies.
- ❖ Utilized AWS Elastic Beanstalk for efficient application deployment & lifecycle management.
- ❖ Optimized AWS database performance for RDS & EC2-hosted databases, ensuring seamless data access & scalability.
- ❖ Integrated GitHub & Bitbucket with Jenkins for automated builds & deployments, streamlining multi-environment CI/CD workflows.
- ❖ Automated key functions in CI/CD environments using Python, PowerShell, Postman, & Swagger.
- ❖ Spearheaded data migration projects from on-premises to AWS, ensuring minimal downtime & optimized performance.
- ❖ Engineered serverless event-driven AWS Lambda functions to trigger automated resource provisioning & maintenance workflows.

#### Tech Stack / Environment:

AWS (EC2, S3, RDS, IAM, CloudFormation, Lambda, Glue, Redshift, Route 53, VPC, CloudWatch, CloudTrail, AWS KMS, AWS Security Hub, AWS DataSync, AWS Auto Scaling, ELB), DevOps & CI/CD (Jenkins, Terraform, GitHub Actions, Bitbucket, Ansible, Python, PowerShell, Postman, Swagger), Containers (Docker, Kubernetes, EKS, AKS, AWS ECS, Helm), Monitoring & Logging (Datadog, ELK Stack, Prometheus, Sumologic), Security & Networking (IAM, NACLs, Security Groups, Transit Gateway, Direct Connect).

### DevOps Automation Engineer

May 2014 – Oct 2016 | Adidas, Portland, Oregon

As a DevOps Automation Engineer at Adidas, I streamlined & optimized CI/CD pipelines, significantly improving software delivery speed & reliability. My contributions helped accelerate product releases for Adidas' global e-commerce & digital initiatives, ensuring fast time-to-market for innovative sports products. I integrated version control systems, enhanced CI/CD automation, and enforced security best practices within Adidas' software delivery ecosystem.

- ❖ Automated infrastructure provisioning and configuration management using Terraform and Ansible, reducing deployment times by 40%.
- ❖ Built and maintained CI/CD pipelines using Jenkins and GitLab CI to enable seamless and reliable software deployments.
- ❖ Containerized applications using Docker and orchestrated them with Kubernetes, improving resource utilization and deployment efficiency.
- ❖ Developed and maintained monitoring and alerting systems using Prometheus, Grafana, and the ELK Stack, ensuring 99.99% uptime for critical services.
- ❖ Conducted root cause analysis for production incidents, implemented fixes, and documented post-mortems to prevent recurrence.
- ❖ Optimized database performance by tuning queries, indexing, and scaling MySQL and PostgreSQL instances.
- ❖ Collaborated with development teams to implement SRE best practices, including SLIs, SLOs, and error budgets.
- ❖ Managed and scaled CDN configurations using AWS CloudFront to improve global content delivery and user experience.
- ❖ Developed & maintained custom automation scripts to streamline build, testing, & deployment workflows, reducing manual effort & improving delivery speed.
- ❖ Contributed to Agile workflows, facilitating Scrum meetings, sprint planning, & retrospectives to align DevOps strategies with business goals.
- ❖ Designed & optimized scalable deployment strategies for Adidas' global software products, ensuring high availability & fault tolerance.
- ❖ Automated infrastructure provisioning & configuration management using Shell scripting & Python, improving deployment efficiency.

#### Tech Stack / Environment:

CI/CD Tools (Cruise Control, Jenkins, Bamboo, TeamCity), Version Control (SVN, Perforce, Git), Scripting & Automation (Python, Bash, PowerShell), Configuration Management (Ansible, Puppet, Chef), Cloud & Virtualization (VMware, AWS EC2, AWS S3), Monitoring & Security (SonarQube, OWASP ZAP, Code Scanning, Vulnerability Assessment), Agile & Collaboration (JIRA, Confluence, Scrum).

### AWS Build & Release Engineer

## Jan 2012 – Apr 2014 | Roche Diagnostics Corporation, Indianapolis, IN

As an AWS Build & Release Engineer at Roche Diagnostics, I streamlined CI/CD pipelines to enhance pharmaceutical software deployment efficiency, ensuring compliance with regulatory standards. I automated build & release processes using Jenkins, Maven, and Python, reducing errors and improving software delivery speed. Additionally, I optimized AWS infrastructure for scalability & reliability, supporting Roche's mission to accelerate life-changing therapies.

- ❖ Configured Jenkins on Linux to establish primary & secondary build workflows, enabling parallel executions and improving build performance for Roche Diagnostics' pharmaceutical operations.
- ❖ Enhanced CI/CD pipelines using Jenkins, ClearCase, SVN, and Python/Perl scripts, streamlining application delivery for research & development initiatives.
- ❖ Designed & implemented Subversion metadata structures to manage release versions, ensuring timely software delivery for Roche's global healthcare services.
- ❖ Automated administrative tasks using Python & Bash, reducing operational errors in systems supporting clinical trials & pharmaceutical production.
- ❖ Mentored developers on Git branching strategies and labeling conventions, fostering collaboration across teams responsible for Roche's digital health solutions & supply chain management systems.
- ❖ Established & managed a centralized Maven repository with Nexus, ensuring seamless dependency management for Roche's drug development applications.
- ❖ Implemented Subversion branching strategies, ensuring code stability & efficient conflict resolution for mission-critical software.
- ❖ Designed & automated build scripts using Maven, Bash & Perl, enabling consistent deployments across QA, Staging & Production environments.
- ❖ Led Release Management meetings to coordinate cross-functional teams, ensuring smooth & compliant deployments of enterprise applications.
- ❖ Partnered with QA, DevOps, & Operations teams to optimize release workflows, aligning with Agile & Scrum methodologies for continuous improvement.

### Tech Stack / Environment:

AWS (EC2, S3, IAM, CloudFormation), CI/CD (Jenkins, SVN, Git, GitHub, Perforce, ClearCase, Bamboo), Build & Release (Maven, Nexus, Artifactory, WLST), Scripting & Automation (Python, Bash, Perl, PowerShell), Configuration Management (Ansible, Puppet, Chef), Security & Compliance (Change Management, Linux Hardening, Security Policies), Agile & Collaboration (JIRA, Confluence, Scrum).

## Linux Administrator

### Sep 2010 – Dec 2011 | TiVo, Newburgh, NY

- ❖ Accountable for the installation, configuration, and administration of Sun Solaris 9 and Red Hat Enterprise Linux on x86 architecture.
- ❖ Tasked with creating and managing cron job scripts on production servers.
- ❖ Configured, set up, and resolved issues related to TCP/IP, DHCP, DNS, CIFS, NTP, and Samba servers across various platforms, including Windows and Linux.

## Database Administrator

### Jan 2009 – Aug 2010 | Ebay.com, Dallas, TX

- ❖ Perform database backups and recovery operations to minimize data loss in case of system failures or disasters. This includes implementing and testing disaster recovery plans to ensure business continuity.
- ❖ Collaborate with development teams to ensure database compatibility and performance for new applications and features, providing guidance on database design, schema changes, and data migration strategies.

## EDUCATION

Master of Science, Information Technology Management  
Belhaven University, Mississippi

## CERTIFICATIONS

AWS Certified Developer – Associate  
AWS Certified DevOps Engineer – Professional
