

Work Authorization: Authorized to work in the U.S. (EAD, No Sponsorship Required)

SUMMARY

Cloud Engineer with around 7 Years of experience in developing applications using .NET technologies with C# and Azure, Node Js, DevOps. I am authorized to work in the U.S. (EAD) Without Sponsorship.

- 7+ years of professional experience in the full Software Development Life Cycle (SDLC), specializing in the design, development, and maintenance of robust cloud-native and windows applications.
- Expert-level programming proficiency in C# and the .NET/ .NET Core framework, with a deep practical understanding of Object-Oriented Programming (OOP), design patterns (e.g., MVC, MVVM), and SOLID principles.
- Extensive experience designing, developing, and consuming RESTful APIs and microservices using ASP.NET Core, including security implementation and performance optimization.
- Strong foundation in DevOps practices, including CI/CD pipeline implementation and management using tools like Azure DevOps or GitHub Actions and Prometheus.
- Hands-on experience with Microsoft Azure services such as Azure App Services, Azure Functions, Azure SQL Database, and Azure Storage.
- Proven analytical, troubleshooting, and problem-solving skills applied in complex system environments, with a focus on writing clean, maintainable, and scalable code.
- Excellent verbal and written English communication skills for technical discussions, documentation, and collaboration within agile development teams.

EMPLOYMENT SUMMARY

Company: Amadis Technologies Inc, USA
Designation: **Senior Software Engineer**
Duration: Sep 2021 to Present

Company: Methode Electronics Pvt Ltd, India
Designation: **Software Engineer**
Duration: Aug 2017 to Dec 2019

Company: Vehere Interactive Pvt Ltd, India
Designation: **Software Engineer**
Duration: Jun 2015 to Nov 2016

EDUCATIONAL QUALIFICATIONS

- **Bachelor of Engineering** in Information Technology from KISD, Bhubaneswar, India.

SKILL SET

Languages	C#, Node Js
Distributed Technologies	Web Api, .Net Core
Design Patterns	Singleton, Repository, Factory
RDBMS	SQL Server, Postgres
Cloud	Azure
DB Access Technologies	ADO.NET, LINQ to SQL, Entity Framework
Tools & IDE	Visual Studio, SQL Server Management Studio, Docker,
Certification	AZ-900 , DP-203

PROJECT PROFILE

Project Name	CloudCadi Configuration
Team Size	7
Technology	C#, .NET Core, Azure, Postgres, Entity Framework, Web API, Azure App Service, Azure Kubernetes Service (AKS), Azure Container Registry (ACR), Azure Functions, Terraform, ARM Templates, Azure DevOps (Build & Release Pipelines), Cribl Stream, Azure Log Analytics (KQL), Prometheus, Grafana, Azure Monitor, Key Vault, Azure Security Center, Helm, Argo CD, Docker, Kubernetes, Microservices Architecture
Tools	VS Code, PgAdmin, Azure Devops
Role	Senior Software Engineer
Description & Responsibilities	CloudCadi is a FinOps platform built using .NET, React, and Python to provide intelligent cost optimization recommendations across Azure services such as Cosmos DB, Azure Container Registry (ACR), Microsoft Fabric, and Azure Files. • Developed .NET APIs and React dashboards to deliver actionable Azure cost optimization insights, driving up to \$60K annual savings for enterprise clients. • Automated multi-environment CI/CD pipelines in Azure DevOps, including container image builds, security/vulnerability scanning, and deployment to AKS and Azure Functions, reducing deployment time by ~40%. • Published enterprise-ready applications to Azure Marketplace, enabling standardized deployment and self-service provisioning for clients. • Migrated infrastructure from ARM templates to Terraform, creating a modular IaC framework for repeatable, secure multi-environment provisioning. • Implemented policy-as-code for RBAC, Key Vault secrets, and Azure Security Center compliance, enforcing automated governance across environments. • Built analytics pipelines in Azure Functions + PostgreSQL to monitor service usage, forecast costs, and recommend scaling, optimizing Cosmos DB, ACR, Microsoft Fabric, and Azure Files. • Integrated Azure Log Analytics and KQL queries for real-time observability, providing dashboards with cost, performance, and operational insights for proactive decision-making. https://amadisglobal.com/azure-acr-cost-optimization-practices-best-strategies-to-reduce-costs/

Project Name	Dabir Configuration (Methode Electronics)
Team Size	4
Environment	WinForm , C#, Serial Port Communication
Tools	Visual Studio 2010, Sql Server 2008 R2
Role	Software Engineer.
Responsibilities	- Implemented Different Modules Of Dabir Using WPF, Winform and C#. - Integrated Bluetooth Low Energy IOT Module TO Dabir using Microosft BLE SDK. - Implemented Installer For Dabir Using Install Shield

Project Name	FlexLink(Vehere)
Team Size	20
Environment	WPF, WCF , XAML, C#, Entity Framework
Tools	Visual Studio 2010, Sql Server 2008 R2
Design Pattern	MVVM (Model View ViewModel)
Role	Software Engineer.
Description	FLEXLINK (FL) is an ERP that is running on WPF. It has recorded more than 150 HTC Repair stores that performs repair of the HTC Mobile Phones. FL communicates with HTC and FLEXTRONICS's servers and exchange data with each other via signals (XML). FL records customer data and captures Device (Mobile) information from HTC Server (E2E) and creates Ticket at the E2E gateway. A process is done to register a Repair of the device. If device is under Warranty, no Payment is done else Payment is done. There is also a provision to transfer the device directly to Flextronics Hub. FL produces MIS data of the Device, Job, Customer and Invoice which are the backbone of any ERP. FL also has the power to track shipment tracking aligned with FEDEX & Blue Dart (Web) Services.
Responsibilities	- Created Different Views of FlexLink Modules using WPF XAML - Implemented WCF Backend Services for FlexLink - Worked to resolve Flexlink Application issues faced by HTC customer Care - Worked on SQL to created different stored procedure which was used by WCF services

PERSONAL TRAITS

- Positive Attitude & Good team player.
- Willingness to learn & update myself with new methodologies & technologies.
- Excellent interpersonal and team management skills to produce quality results.
- Very quick to learn, targeting best way realization of with the concerned task.
- Good understanding of projects and Confidence to meet deadlines.

DECLARATION

I consider myself familiar with Computer Engineering Aspects. I am also confident of my ability to work in a team. I hereby declare that the information furnished above is true to the best of my knowledge.
