

Summary

- SAP Technical Architect with 20 plus years of experience in Implementation, Support and Enhancement projects. SAP Expertise in SAP pricing, OOPS, CRM Middleware, SAP HANA Modelling and HANA ABAP, CDS Views, AMDP, BADIs and ABAP.
- Hands-on consulting technical expertise for large-scale and small-scale SAP ECC, CRM and S4/Hana 1709 and 1909.
- Good experience in requirement gathering and rationalization of RICEFW requirements in large implementation.
- Implemented End to End SAP implementations, extensively worked on all phases of project life cycles of SAP implementations including Conversions.
- Technical Experience in SAP modules SD, MM, PP, PS, HR, FICO and CRM in latest versions of SAP.
- Functional experience in SAP Sales and Distribution. Extensive Knowledge in Human Resource Module.
- Extensive experience in the full software project lifecycle includes performing business and technical analyst functions, writing specifications, design, build, testing, deployment, and production support phases.
- Experience in Reports using ABAP List Viewer (ALV), Batch Input and Call Transaction programs, Remote Function Calls (RFCs), BAPIs, Business Add-Ins, Screen Enhancements, User Exits, Web Dynpro and Modifications to SAP standard programs, Created and modified Adobe forms, SAP Scripts.
- Extensively worked on SD pricing customizing and development.
- Highly motivated, detail oriented, has ability to work independently and as a part of the team with excellent technical, analytical and communication skills.
- Completed Open SAP course for Data Migration to SAP S/4HANA, Knowledge in Business Information Warehousing (BIW) and used Remedy (Integrated Service Management for the Enterprise), CONTROL-M software for Scheduling and Enterprise portal.
- Good experience with SAP CHARM and SAP SOLMAN.

FUNCTIONAL AREAS EXPERTISE:

- Sales & Distribution (SD), Human Resources (HR), Financial Accounting (FI), Controlling (CO), Production Planning (PP), Supplier Relationship Management (SRM), QM (Quality Management), CRM, PS, and Materials Management (MM) of SAP Modules.

SKILLS

Technology	• ERP: SAP R/3 (Release 4.6c, 4.7 and ECC 5.0, ECC 6.0, S4 HANA and SAP PI. • AMDP, CDS View, OData, API, BAPI, BADI, ALE, EDI and IDOCs, Batch Data Conversion (BDC) ABAP Reports (Classical and Interactive), LSMW, Smart Forms, Adobe Forms and Dialog Programming. • SAP Scripts, SAP Runtime Analysis and SQL Trace, ALV Reporting. • BTE, BADI, User Exits, ABAP Debugging. • Languages: ABAP, HR ABAP, SAP Fiori, SQL.
-------------------	---

PROJECT EXPERIENCE:

Company: Vertex
Duration: April 2022 to Present
Position: Software Developer

Contributed to the development, testing, and roll-out of Accelerator+, collaborating with team members to ensure high-quality deliverables. Played a key role in releasing new features for both the Chain Flow Accelerator and Accelerator platforms, aligning solutions with business and technical requirements.

Responsibilities:

- Worked on Accelerator+ features, including US Transaction Data in the Results Screen, combined Accelerator and CFA logging for Accelerator+, enhanced the About page, implemented Parallel Job Run for the Goods Movement Solution, and recently extended the Tax Compliance block for process codes PO, LIV, FIAP, and FIAR for A+ 2.0.
- Developed and released new Accelerator features such as Tax Code Defaulting for MRKO transactions for US/CA and the Goods Movement Solution, among others.
- Worked and released new CFA features, including Tax Calculation for Plants Abroad, Rebate Settlement, Commissions Settlement (Input Tax), Additional Freight and Surcharges, and worked on Tax Result Validation, among others.
- Collaborated on Jira stories to resolve Accelerator and CFA-related bugs, ensuring efficient and accurate issue tracking and resolution.
- Participated in customer support calls and provided mentorship to offshore teams for handling Tier-4 support tickets.
- Engaged in ongoing training and development on VAT, CFA, and Accelerator modules, demonstrating a commitment to continuous learning and improvement.
- Activated several FIORI tiles and performed end-to-end testing to observe how tax calculations perform in regular transactions versus FIORI apps.

Client: Cognex
Duration: July 2018 to April 2022
Position: Technical Consultant

As SAP Technical Consultant involved in SAP S4 HANA developments and support. I have designed and developed OData, SAP PI, API's for interfaces, enhancements, reports, pricing routines in OTC, PLM, FI and DTS. Part of S4 HANA 1709 to 1909 upgrade. Configured/Enabled standard Finance Fiori tiles.

Responsibilities:

- Led the technical team for the Salesforce integration project and group reporting initiatives.
- Designed Custom Groups, Catalogs and Configured/Implemented standard Fiori tiles for Group reporting.
- LIT Integration project and developed Interfaces for transfer of Master data: Business Partners, Materials, Variant Config.
- Used Postman, Yarc, SOAP UI to test interfaces.
- Fixed many after go-live issues between SAP and Integration Hub/P3.
- Worked on SAP PI/PO Support and enhancements.
- Developed AMDP's, OData services for the interfaces.
- Developed Reports: Field Service Upgrade and Training VC Report, Re scheduling report, BOM export. Etc.
- Developed LSMW's for Data loading using Direct input and Recording.
- Consumed Rest API to get Sales reps from IHUB for Sales and Shipment notification.

- Implemented user exits and enhancements: Update Delivery date, Warning on holiday.
- Developed/Configured Copy Control, Requirement and Pricing routines.
- Supported Solution manager implementation Testing.
- Worked on SAP partner ShipERP enhancements.
- Worked on Custom Fiori Application: Kitting validation and Cost estimation
- Worked on S4 HANA to GTS Remote function calls.

Client: Dell EMC Corporation
Projects: Propel, Upgrade and Rev Cycle
Company: HCL-AXON
Duration: Jan 2011 – June 2018
Position: Development Lead/Technical Architect

Worked in EMC Propel project (Release 1, Release 2 and Release 3), SAP Upgrade, Rev Cycle (Release 1, Release 2 and Release 3) and performed Development Architect role for these projects. EMC Propel is global SAP implementation project for EMC across 50 company codes and 11000 end users. In this project, I managed a team of developers including on-site and Off-shore. I am responsible to deliver around 100 RICEF objects in Release 1, 80 RICEF objects in Release 2, 70 RICEF objects in Release 3.

Responsibilities:

- Worked for several projects at EMC as On Shore development lead. ECC implementation and CRM implementation and ECC CRM integration.
- Lead a team and hands on involved in delivery of SAP OTC Technical and CRM integration.
- Responsible for delivery of 250 RICEFW objects.
- Worked on Reports, Conversions, BADI's, User exits and Adobe forms.
- Worked on ECC and CRM upgrade.
- As part of CRM Implementation worked on Vertex integration for CRM Quoting Tax Calculation.
- Managed and provided direction for technical team for multiple modules in SAP with Work allocation, tracking and status reporting of onshore and offshore resources.
- Provided design and inputs for technical architecture for environment.
- Responsible for overseeing the Quality procedures related to the project.
- Work closely with process leads to analyze functional requirements.
- Work in a multi-vendor environment and gain consensus from multiple vendors on the project.
- Ensured that the onsite/offshore team members adhere to development methodology and standards.

Project Name: iLINE Product Development
Company: HCL-AXON
Duration: Jan 2010 – Dec 2010
Position: SAP ABAP Consultant

Background

iLINE is one of the HCL-AXON own new product and being built based on SAP's approach to service-oriented architecture (SOA) and is being designed to be deployed on multiple mobile platforms to support execution and planning in the field. It is being developed for companies that have adopted SAP ERP as their enterprise resource planning (ERP) platform and who own or operate linear assets or networks. The solution integrates geographic information systems (GIS) with SAP ERP and allows networks to be managed from SAP ERP, the GIS or both. iLINE is being designed to address the linear asset requirements across many industries and types of networks, including track, roads, bridges, tunnels, pipelines and distribution networks.

Responsibilities:

Developed most important transaction of the iLINE product called Network Builder using ALV oops. This transaction is to create, change and display Network and Network Reference Systems such as mile posts or other type markers. Transaction provides ability to define segments and characteristics and shows the internal, external Junctions and network layout based on segments.

Involved in iLINE product design meetings; Thorough analysis of functional specifications after discussions with functional team members. Analyzed the technical requirements for developing the product and proposed solutions for implementing the same.

Involved in development of complex Linear Asset Management (LAM) data common sub screen and applying the same to the iLINE object types like, Equipment, Functional Location, Work Order Header, Work Order Operation, Notification Header, Notification Item, Maintenance Plan Item and Characteristics. Involved inbuilt integration design between iLINE and iMRO provides a complete maintenance solution for all types of fixed, complex moveable and linear assets.

Client: Smiths Detection
Company: Axon Solutions inc
Duration: July 2008 to Dec 2009
Position: SAP ABAP Consultant

Background

Smiths Detection provides government regulated technology products and advanced services to security experts and governments worldwide, to detect and identify dangerous or illegal objects.

Project Description: The project is an implementation of FI, SD, HR, QM and MM modules.

Responsibilities

- Mainly responsible for data loads and data extracts.
- Loaded data for Smiths worldwide plants USA, Canada, Germany, United Kingdom, France, Singapore, Dubai, Australia, New Zealand and Thailand.
- Developed a load programs for Customer master (xd01), Vendor master(xk01) and Material master(mm01).
- Developed and loaded data using LSMW Tool for Distribution channel extension, Plant extension for customers and sales org distribution channel extension for materials.
- Developed an extract program and data load program for fixed assets(as93).
- Worked on Customer Balances and Vendor Balances loads(fb01).
- Loaded data through LSMW for Balance sheet, Production Order WIP, Cost Center year to date Actual and Project year to date Actual.
- Worked on Quality Management loads. Quality level(qd34), Quality info records(qi01), inspection plans and inspection characteristics.
- Worked on Warranty Provisions and routings loads.
- Worked on Purchase info records loads (me11).
- Developed a service contracts(iw31), service orders(va01) and equipment load programs(iw41).
- Created a load program and Loaded data for task lists, MRP area, Open Purchase orders and selling price (vk15)...etc.
- Loaded mini master employee data through LSMW.
- Developed an interface which accept the information in the Temse File and will read the last payroll results and convert the information into the specified .csv format. This is required for the payroll provider ADP for payment of hours calculated by REACH.
- Developed an interface through ALE Data distribution to transfer HR Mini master data from SAP Human resource system of smiths to Reach R/3 system of smiths.

Client: MedQuist Health care
Company: Axon Solutions inc
Duration: April 2008 to July 2008
Position: SAP ABAP HR Consultant

Background

MedQusit is the world's largest provider of 'voice to coding' solutions for healthcare, dictation, speech recognition software, outsourced medical transcription and coding services needs.

Project Description: The project is an implementation of SAP HR.

Responsibilities

- Worked on external interface file that contains employees with dental coverage.
- Worked on external interface issues for carrier MetLife dental, long term disability and short term disability data file.
- Worked on external interface issues for MetLife portability data file.
- Working on UHC Gateway and UHC FSA and Benefits external interface issues.

Client: PA State System of Higher Education

Company: Surya Systems inc.

Duration: July 2006 to Mar 2008

Position: SAP ABAP HR and CM Consultant

Background

Pennsylvania State System of Higher Education (PASSHE) with 14 universities and more than 109,000 students, PASSHE is the largest higher education provider in Pennsylvania.

Project Description: The project includes implementation and Support of SAP HR and CM.

Responsibilities

Human Resource:

- Developed a program to create an Employee Master Hierarchy file.
- Developed Payroll summary report.
- Developed a program reads the employee's movement.
- Built an Employee termination checklist report.
- Built a program to create a General Contribution Report.
- Built a process to generate an Appraisal Rating file.
- Supporting HR Production issues.

Campus Management:

- Analyses of the specifications provided and design of technical specifications.
- Provided SAP R/3 ABAP consulting services to clients in the form of technical support for most on conversions.
- Conversions to upload the legacy data for implementation.
- Designed and Developed Student master, Admissions and Registrations Conversions.
- Designed and developed technical specifications and programs for Modules & Event Types include Module, Business event type and Module Groups.
- Designed and developed technical specifications and programs for Facilities include Buildings, Locations and Rooms.
- Developed conversions for Academic Calendar.
- Developed conversions for Academic Structure includes program of study and module groups.
- Worked on Transfer Articulation, External organizations, External Qualifications, Assessments and External Subjects.
- Developed a report to allow the student to view their test scores that were recorded for test such as PRAXIS, GMAT, orientation placement tests, etc.
- Enhanced Student File on the Additional Data Tab to accommodate new field 'Local Housing Type'.

CRM

- Worked on web based recruiting calendar functionality, where the prospective students can register for events taking place in that particular university. This was done using Campaign Management in CRM.

Client: Advanced Micro Devices

Company: HCL Technologies

Duration: July 2004 to June 2006

Position: SAP ABAP Consultant

Background

Founded in 1969 and based in Sunnyvale, California, USA. AMD designs and produces innovative microprocessors, Flash memory devices, and low-power processor solutions for the computer, communications, and consumer electronics industries. Client listed on NYSE as "AMD".

PROJECT: Implementation & Maintenance

Environment: SAP R/3 4.7 Version

Responsibilities

Project Description: The project includes implementation, maintenance and Support of SAP R/3 to support AMD corporate functions. The project includes implementation of SAP R/3 to support HR corporate functions. The HR implementation included Personal Administration, Planning and Distribution, Payroll Development and interface with the HR. Support includes monitoring SAP jobs and production support issues.

Reports:

- Created a program to generate Over Time Analysis report for Malaysia and Singapore.
- Written a program for Basic Salaries & Headcount Report.
- Developed report that is used to get list of total compensation of each employee based on the wage types on selection input parameter. Many countries in Asia will use the report. Each authorized User will create different variant in the report to display different list of compensation as they wish.
- Modified a report for Singapore which shows the groupings of employee based on their highest education with their Earnings, CPF and Medical reimbursement
- Developed Salary Movement Report for Singapore and Malaysia shared requirement.
- Developed report to pull data from billing documents that shows shipment information based on the country (DE) of origin for German 631 customers excluding consignment customers.
- Developed report to pull data from billing documents that shows shipment information based on the country (DE) of origin for AMDISS consignment customers.
- Developed an interface in Payroll and benefits, which deals with retrieving cumulative payroll results of the employees and segregating different deductions made to the particular employee. Summing of different deductions of all the employees and preparing report for the same.

Payroll Functions:

- Designed and developed a Payroll function to compute salary accrual, shift accrual for shift employees, vacation accrual and bonuses accrual at employee level.
- Designed and developed a Payroll function to compute Salary Prepayment, 13th Month accrual

BDC:

- Developed Batch data communication program for the automated load of TCM Cost of Goods Manufactured by External Device and Finished Goods Type into SAP CO-PA Condition Records. The automated load will consist of a multi-step mapping process between TCM and SAP to establish a Cost of Goods Manufactured by External Device and Finished Goods Type. The output of this mapping process will be an SAP Z-Table and will serve as the base table for the automated load into CO-PA Condition Type Condition Records.
- Written a batch data program to delete the data for the Info type 15.
- Developed a batch data program to load data into info type 14, 15, 21

Work flows:

- Supporting Invoice, Purchase order, Project systems, shopping cart and scheduling agreements Workflows.
- Involved in development of workflow for Electronic asset work request (EAWR).

Enhancements:

- Designed user exit for master data maintenance with validations.
- Enhanced Info types 21, 23 and created info type 9104.

Scripts:

- Copied and modified the scripts for UK VAT invoice, Credit Memo, Debit Memo.

Support Includes:

- Supporting and Maintaining Human Resource Module covers ASIA employees and US. Specifically covers the Modules implemented under HR like Personal administration, Payroll, Organization management, Time management, Benefits.
- Supporting FICO includes the sub modules covered at AMD in SAP FICO
- Besides involved in AMD/FSO HR Project, AMD Virtual edge project and Expansion of existing WWHRDB to create a GLOBAL HRDW Project to create and modify the some of already developed objects in HR Module and AMD/ Dallas project Implementation.

EDUCATION:

- Bachelors in Mechanical Engineering
