

PRAVEEN MALINENI

Network Engineer

+1 470-851-4153 praveen1820105@gmail.com United States [LinkedIn/In/praveen1820](https://www.linkedin.com/in/praveen1820)

Professional Summary

Accomplished Network Engineer with over 5+years of experience in routing and switching, load balancing, DNS/DHCP management, wireless technologies, and network security. Highly proficient in handling various network protocols, firewalls, and network security measures. Hands-on experience with F5, Cisco, Palo Alto, and Check Point technologies. A keen problem-solver with a strong ability to ensure network performance, reliability, and security. Seeking to leverage technical expertise in a dynamic team environment.

Professional Skills

Category	Skills
Routing & Switching	OSPF, EIGRP, BGP, RIP, MPLS, VLANs, Spanning Tree Protocol (STP), HSRP, VRRP, EtherChannel, VTP
Load Balancing	F5 BIG-IP (LTM, GTM, iRules, SSL Offloading), A10, NetScaler Load Balancers.
DDI (DNS & DHCP)	DNS Configuration & Management, DHCP Configuration & Management, Troubleshooting, Infoblox, Windows DHCP
Wireless Networking	Wi-Fi (802.11 a/b/g/n/ac, ax), Cisco WLAN Controllers, AP Deployment, Wi-Fi Site Surveys, Aruba Wireless Controllers.
Network Security	VPNs (IPSec, SSL), Firewalls (Palo Alto, Cisco ASA, Check Point, Juniper SRX), ACLs, IDS/IPS, Security Policies
Firewall Management	CheckPoint GAIA, PaloAlto Panorama, PaloAlto SCM.
Protocols & Technologies	TCP/IP, DNS, DHCP, HTTP/HTTPS, SNMP, QoS, VoIP, Multicast
Tools	Wireshark, SolarWinds, NetFlow, GNS3, Cisco Prime, Zabbix, Splunk.
Operating Systems	Windows Server, Linux, Cisco IOS, Cisco IOS-XR, JunOS, AOS, PANOS.

Professional Experience

Network Engineer

Fidelity, Texas, U.S

January 2023 – Present

- Designed, implemented, and troubleshoot enterprise-level routing and switching infrastructures ensuring maximum uptime and performance.
 - Configured and optimized protocols including **OSPF, EIGRP, BGP, RIP, MPLS, VLANs, STP, HSRP, VRRP, EtherChannel**, and **VTP** to build robust and redundant networks.
 - Led the design, implementation, and maintenance of the Cisco Nexus, Meraki Wireless, and Palo Alto network infrastructure.
 - Configured and managed Palo Alto Firewalls and Panorama, ensuring secure access and policy enforcement.
 - Deployed and maintained Meraki wireless networks, optimizing AP placement for maximum coverage and performance.
 - Designed and implemented VLAN segmentation and ACLs to enhance network security and performance.
 - Implemented patch management strategies, ensuring all network devices were up-to-date and secure.
 - Optimized OSPF, BGP, and EIGRP configurations, enhancing routing efficiency across multiple locations.
 - Monitored and analyzed network performance using SolarWinds and NetFlow, proactively addressing potential issues.
 - Led rapid incident response efforts, diagnosing and resolving connectivity and performance issues.
 - Managed network redundancy solutions, configuring HSRP and VRRP to prevent single points of failure.
 - Worked closely with the DIR management team, ensuring customer satisfaction and smooth network operations.
 - Developed and implemented QoS policies, ensuring optimal traffic prioritization for critical applications.
 - Conducted capacity planning and network scaling, ensuring readiness for future growth.
 - Collaborated with security teams to integrate firewall and VPN solutions with corporate policies.
 - Provided training and mentorship to junior engineers, enhancing team technical proficiency.
 - Documented network configurations, troubleshooting steps, and performance reports for future reference..
-

Network Engineer

Accenture, Hyderabad, Telangana

June 2020 -- December 2021

- Engineered and maintained scalable switching and routing solutions for a multi-site, multi-vendor environment, integrating both Cisco and Juniper platforms.
- Deployed advanced routing protocols such as **OSPF, EIGRP**, and **BGP** across geographically dispersed sites to ensure efficient and resilient traffic flow.
- Deployed and managed Cisco Nexus switches, ensuring network stability and scalability.
- Configured and maintained Palo Alto firewalls, implementing security policies and VPNs.
- Integrated and optimized Meraki wireless networks, ensuring seamless connectivity across multiple locations.
- Conducted network performance assessments, resolving latency and packet loss issues.

- Led network patching and firmware upgrades, preventing security vulnerabilities.
 - Configured OSPF, BGP, and MPLS routing for multi-site connectivity and traffic optimization.
 - Implemented redundancy mechanisms (HSRP, VRRP, EtherChannel) to eliminate downtime risks.
 - Monitored and responded to network incidents, minimizing impact on business operations.
 - Performed Ekahau wireless site surveys, optimizing AP placement and signal strength.
 - Integrated security controls into the network, ensuring compliance with industry best practices.
 - Automated network configuration tasks, improving efficiency and reducing manual workload.
 - Led disaster recovery and failover testing, ensuring business continuity.
 - Collaborated with system administrators, aligning network performance with application demands.
 - Conducted deep packet analysis using Wireshark, resolving complex connectivity issues.
 - Documented troubleshooting procedures, creating reference guides for future use..
-

Network Engineer

Nationwide Insurance, Hyderabad, Telangana

January 2019 – May 2020

- Spearheaded network redesign initiatives incorporating **RIP, MPLS, STP, HSRP, VRRP, EtherChannel**, and **VTP** to modernize legacy systems.
- Engineered enterprise network solutions with Cisco Nexus switches and Meraki Wireless APs.
- Configured and managed firewalls (Palo Alto, Check Point, Cisco ASA) to enforce security policies.
- Implemented network patching and updates, ensuring all devices were compliant with security standards.
- Optimized MPLS and BGP configurations, enhancing data center connectivity.
- Led troubleshooting and root cause analysis, resolving network outages and degradation.
- Performed Wi-Fi performance tuning, improving Meraki wireless network efficiency.
- Implemented VLAN segmentation and STP enhancements, preventing loops and improving data flow.
- Developed firewall policies and VPN configurations, securing remote access and site-to-site communications.
- Integrated Panorama for centralized firewall management, streamlining rule administration.
- Designed high-availability solutions, using HSRP and VRRP for seamless failover.
- Conducted network audits and security assessments, identifying and mitigating vulnerabilities.
- Collaborated with vendors and third-party service providers, ensuring seamless integration.
- Automated network monitoring and alerting, improving response times to incidents.
- Provided 24/7 on-call support, handling critical incidents and minimizing downtime.
- Developed training programs for IT staff, enhancing overall network support capabilities.

Load Balancing

- Configured and maintained **F5 BIG-IP** systems (LTM, GTM, iRules, SSL Offloading) to ensure optimal application delivery and high availability.
- Developed and fine-tuned custom iRules for dynamic traffic management and security enforcement.
- Monitored performance metrics and proactively optimized load balancing configurations based on real-time analytics.

Firewall Management

- Administered and maintained firewall environments using **CheckPoint GAIA**, ensuring robust perimeter security.

- Utilized **Palo Alto Panorama** for centralized management of firewall policies across multiple sites.
- Collaborated with IT security teams to develop and implement firewall rulesets that mitigated evolving threats.

Wireless Networking

- Designed and deployed wireless network solutions using the latest **Wi-Fi standards (802.11 a/b/g/n/ac, ax)** for optimal coverage and performance.
- Configured and managed **Cisco WLAN Controllers** and **Aruba Wireless Controllers** to support enterprise-level wireless connectivity.
- Resolved complex wireless issues by analyzing RF interference and optimizing channel allocation.

Network Security

- Configured secure remote access using VPN technologies such as **IPSec** and **SSL VPNs**.
- Integrated advanced firewall solutions including **Cisco ASA, Palo Alto, Check Point, and Juniper SRX** to enforce security policies.
- Developed and implemented robust ACLs and IDS/IPS systems to monitor and block potential threats.

DDI (DNS & DHCP)

- Managed end-to-end DNS configuration and administration to maintain reliable domain name resolution across the network.
- Configured and optimized DHCP environments on both **Infoblox appliances** and **Windows DHCP servers** to ensure seamless IP address allocation.
- Troubleshoot and resolved DNS and DHCP issues swiftly to minimize service disruptions.

EDUCATION

SRM University, Chennai, Tamil Nadu

Bachelor of Engineering, Computer Science
GPA: 7.7/10

June 2016 – May 2020

University of Central Missouri, Warrensburg, MO

Master of Science, Computer Science
GPA: 3.5/4

January 2022 – May 2023
