SUMMARY

SAP ABAP Developer with **5+ years** delivering optimized, scalable solutions in **S/4HANA** across Finance and Logistics. Expert in **ABAP OO**, **CDS Views**, **AMDP**, **RAP**, and **OData**, with strong debugging and performance tuning. Integrates systems using **SAP CPI**, **REST/SOAP APIs**, **ALE/EDI**, and **SAP Gateway** for reliable, secure data flows. Hands-on with **Fiori/UI5**, **CDS UI Annotations**, **BRF+**, and **Secure OData** to streamline user experiences. Practices DevOps using **Eclipse/ADT**, **abapGit**, **gCTS**, and **Jenkins/CI/CD** for clean, auditable deliveries. Recognized for improving report runtimes by up to 90% and enabling faster, compliant financial processes.

SKILLS

- **Core ABAP Development:** ABAP OO, Data Dictionary, Enhancements (BADI, User Exits), BAPIs, RFCs, IDocs, Adobe Forms, ALV Reports, Performance Optimization, Debugging
- **DevOps & Tooling:** Eclipse/ADT, abapGit, gCTS, ABAP Unit Testing, Code Inspector, CTS/ChaRM, Git, CI/CD (Jenkins, Azure DevOps)
- **Integration & APIs:** SAP CPI, SAP Gateway, OData, REST/SOAP APIs, ALE/EDI, DRF, Event Mesh
- **Methodologies & Collaboration:** Agile (Scrum), SAP Activate, Technical Documentation, Cross-Functional Collaboration
- **S/4HANA & Advanced ABAP:** ABAP 7.5+, CDS Views & Annotations, AMDP, RAP, OData v2/v4, BRF+, ATC, Clean ABAP
- **Fiori & UI Development:** SAP Fiori Elements & UI5, CDS UI Annotations, Launchpad Configuration, OData Integration
- **Data & Analytics:** Embedded Analytics, CDS Analytical Queries, VDM Modeling, HANA SQL Tuning, Data Extraction
- **Security & Governance:** AUTHORITY-CHECK, SU24/SU53, Secure OData, Data Privacy Controls

WORK EXPERIENCE

SAP ABAP DEVELOPER 01/2024 to Current

Verizon Wireless Systems

- Developed CDS views, RAP models, and AMDPs in S/4HANA to deliver real-time financial insights.
- Built and deployed OData v2/v4 services via SAP Gateway, supporting seamless integration with Fiori applications.
- Optimized financial reports and ALV dashboards using performance tuning, reducing runtime from 20 minutes to under 2.
- Implemented BRF+ decision tables for dynamic rule processing, eliminating hardcoded logic and improving reusability.
- Enhanced database performance by replacing nested loops with JOINS and FOR ALL ENTRIES, cutting query time by 70%.
- Automated deployment and version control using abapGit, gCTS, and Jenkins pipelines, aligning with DevOps best practices.
- Enhanced data security using AUTHORITY-CHECK and secure OData exposure, ensuring corporate governance compliance.
- Partnered with functional teams under Agile methodology to deliver sprint-based releases and ensure on-time deliverables.
- Documented technical specifications and code changes with performance benchmarks for audit and peer review purposes.

JUNIOR SAP DEVELOPER 05/2019 to 11/2022

Sundaram Finance

- Developed and maintained custom ABAP programs, BAPIs, and IDoc interfaces supporting FI, MM, and SD modules.
- Enhanced Withholding Tax and Financial Accounting reports to meet updated compliance and statutory requirements.
- Created LSMW and BDC programs for mass uploads, reducing manual processing time by 40% during

financial closures.

- Converted legacy reports into ALV with dynamic layouts and export options, improving user experience and accessibility.
- Built CDS views and optimized SQL queries for analytical reporting, improving execution performance by 60%.
- Integrated ALE/EDI workflows for automated vendor invoice processing, ensuring data accuracy across systems.
- Implemented error-handling logic for inbound IDocs, reducing manual reprocessing by 50% and improving stability.
- Worked collaboratively with functional teams to troubleshoot FI/CO posting issues and streamline recurring fixes.
- Authored technical documentation and functional specifications, supporting effective knowledge transfer and audit traceability.

EDUCATION

Master's: Computer Science
Southeast Missouri State University

Bachelor's: Computer Science
JNTUK - Kakinada, India
