

Prudhvi Dharmireddi

(314) 226-3770 | prudhvi.dharmireddi18@gmail.com | [linkedin.com/in/prudhvi-d18/](https://www.linkedin.com/in/prudhvi-d18/)

Cybersecurity professional with 3 years of experience in SOC operations, Vulnerability assessment, and regulatory compliance. Skilled in preparing responses for internal/external audits, ensuring adherence to frameworks (NIST CSF, ISO 27001), and collaborating with cross-functional teams to strengthen controls and reporting. Experienced with SIEM tools, compliance frameworks and cloud platforms (AWS, Azure, GCP).

TECHNICAL SKILLS

Security Tools: Splunk, QRadar, Zscaler, Autopsy, FTK Imager, Nmap, Nessus, Burp Suite, EDR/XDR(Crowd strike)
Programming & Scripting Languages: C C++, Java, Python, Bash, PowerShell, SQL
Cloud Services: AWS, Microsoft Azure(Sentinel, AD), DevOps, CI/CD Pipelines, Prometheus, Grafana
OS & Networking: Kali Linux, Ubuntu, Routing & Switching, VLANs, TCP/IP, DNS, Network Troubleshooting
Security Frameworks & Compliance: NIST CSF, ISO 27001, MITRE ATT&CK, HIPAA, PCI DSS, SOX and GDPR

EXPERIENCE

Security Specialist Intern | Ears Up Cyber Security (St. Louis, United states) March 2025 – Present

- Developed an online platform simulating real-world attacks for 150+ users to promote secure coding practices.
- Designed and executed 10 incident response simulations with SIEM integration to assess operational readiness.
- Created and enforced data security policies aligned with NIST and ISO 27001 to support regulatory compliances.
- Utilized security tools and threat intelligence to support risk assessments, strengthen controls, and improve auditing.
- Designed dashboards and reports that improved incident response visibility and informed key decisions.

Associate | Cognizant technology solutions (Hyderabad, India) July 2022 – July 2023

- Led SOC operations by triaging 1000+ monthly alerts, mitigating threats, and coordinating incident response efforts.
- Performed security assessments on apps and servers using Nessus, ensuring ISO 27001 and NIST CSF compliance.
- Tuned SIEM correlation rules and examined logs in QRadar and Splunk, reducing false positives by 25%.
- Monitored and assessed 500+ IDS/IPS alerts monthly to detect suspicious activity and enhance threat detection.
- Investigated security incidents, root causes, and implemented remediation plans to reduce resolution time by 20%.
- Conducted post-incident analysis using EDR and SIEM tools, sharing insights with cross-functional teams.
- Analyzed 200+ phishing emails monthly, evaluated risk levels, and leveraged Zscaler logs to block malicious domains.
- Built Splunk dashboards for vulnerability and threat tracking, giving leadership visibility into enterprise risk trends.

Security Intern | Cognizant technology solutions (India) Jan 2022 – July 2022

- Assisted in daily SOC monitoring tasks, reviewing alerts and escalating potential threats for further investigation.
- Supported vulnerability scans using Nessus and documented findings to aid in patch management efforts.
- Performed initial log analysis in Splunk to identify suspicious patterns and assisted in refining detection rules.
- Contributed to documentation and post-incident reviews, helping improve response playbooks and procedures.

Cyber Security Intern | Gurugram Cyber Police (India) June 2021 – July 2021

- Investigated cybercrimes using Autopsy and FTK Imager, supporting evidence collection and threat analysis.
- Conducted forensic analysis to identify threats and preserve digital evidence integrity.

ACADEMIC PROJECTS

- Simulated DoS attacks on an AWS-hosted web server and implemented threat detection using CloudWatch logs.
- Built an enterprise network simulation with structured IP design, VLAN segmentation, and routing configuration.

EDUCATION

Saint Louis University St. Louis, MO
Master of Science in Cybersecurity | GPA - 4.0/4.0 May 2025

LEADERSHIP & VOLUNTEER EXPERIENCE

Advisor | Cyber Billikens(Capture the Flag Team) November 2023 – May 2025

- Placed 324th out of 8,487 participants in the National Cyber League (NCL) Individual Game, solving challenges in Log Analysis, Cryptography, Network Traffic Analysis, OSINT, Forensics, Scanning, and Reconnaissance.

Security Alliance & Cortex March 2024 & March 2025

- Volunteered as a mentor for high school students in Capture The Flag (CTF) competitions, providing technical instruction, problem-solving guidance, and cybersecurity awareness.

CERTIFICATIONS

CompTIA Security+ | (ISC)2- CC | AWS Cloud Practitioner Essentials | CISM (expected Oct 2025)
