

AKSHAY YEDABETTU DIVAKARA

Sr. Full Stack Engineer | Engineering Lead
akshayyd.holla@gmail.com | +1 (682) 556-8419 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Engineer and Technical Leader with 10+ years of experience building cloud-native, distributed systems at scale across finance, automotive, and pharma domains. Skilled in Java, Python, Angular, Spring Boot, and RESTful APIs, with deep experience in AWS and Azure. Certified across Google Cloud (GCP), AWS and Azure. Proven track record of designing and launching enterprise applications used globally, optimizing system performance by 30%, and mentoring engineering teams across functions. Known for driving architecture decisions, improving reliability, and delivering secure, low-latency, product aligned solutions. Eager to contribute full-stack expertise and architectural leadership to build scalable platforms at Google

CERTIFICATIONS

Google Cloud (GCP)- Associate Cloud Engineer | SAA-C02 AWS Solution Architect-Associate | CLF-C01 AWS Cloud Practitioner | AZ-900 Microsoft Azure Fundamentals | AZ-104 Microsoft Azure Administrator Associate | Hands-on Essentials-Data Warehouse, Snowflake | Implementing Data Warehouses-SQL Server 2012

SKILLS

- **Languages/Frameworks:** Java, Python, Spring, Angular-TypeScript, HTML, CSS
- **Architecture:** Distributed, Microservices, Event-driven (Lambda Functions) and Real-time systems (Kafka, IBM MQ), APIs (REST, SOAP, GraphQL)
- **Cloud:** AWS, Microsoft Azure, GCP
- **DevOps & Monitoring:** Docker, Kubernetes, Jenkins, Concourse, ArgoCD, Bitbucket, SVN, GitHub, JFrog, Git, Linux | Dynatrace, Splunk, Grafana
- **AI:** IBM Watson, Working knowledge of Gen AI, prompt engineering, RAG, MCP
- **Database:** MS SQL Server, PostgreSQL, PLSQL, MongoDB, Orient DB, Redis
- **Tools:** Jira, Confluence, Gresham Clareti, Postman, SoapUI, Lucid Charts, Miro, Visio

WORK HISTORY

Lead Engineer | Avis Budget Group, Parsippany, NJ

03/2023 – 06/2025

Project: Global Rental Capability & Services

Role: Lead Engineer & SDM | Domain: Automotive Rental & Leasing

- Led a global team and contributed with full stack development enhancing large scale customer-facing rental platforms used across the customer rental journey, supporting over 40% of global vehicle rental creations
- Led improvements to invoicing and e-receipt generation services, ensuring coverage for over half of global customer rentals and driving 99.95% service availability
- Designed real-time Splunk dashboards tracking 10+ critical business metrics
- Orchestrated the migration of North America's high-volume credit card payment system to AWS; Mentored developers on product thinking and architecture to align engineering with business vision

Senior AI Consultant | Findability Sciences Inc, Belle Mead, NJ

08/2021 - 03/2023

Role: Solution Architect & Lead Developer

Project: SMB App | HR Chat Assistant | Document Matching Application

Domain: Finance | Energy | Pharma

- Designed scalable AWS–Snowflake architecture for a high-volume finance app, including ETL pipelines (Lambda, Aurora, DMS), OpenSearch-based real-time search, and multi-environment deployment; presented design to C-level stakeholders and mentored teams on infra best practices
- Led full stack development for an energy sector chatbot using Java, Angular, and Spring Boot with JWT/OTP security; integrated with IBM Watson Assistant to reduce support calls by 10% and deployed on-prem using Tomcat and HAProxy
- Built a DOCX-to-PDF/image pipeline with Azure OCR and custom matching logic to automate pharma document comparison, reducing manual effort by 50%

Senior Consultant, Innovation | Sogeti USA, Montvale, NJ

10/2019 - 07/2021

Role: Lead Developer | Domain: Audit & Advisory

Project: Intelligent Assistant | Audit Vouching Tool – Commercial

- Built an NLP-powered employee self-service chatbot using IBM Watson Assistant, backed by secure Spring Boot microservices (JWT, RSA encryption, API Gateway, Java KeyStore), and automated SharePoint content ingestion for personalized responses
- Led onshore–offshore teams through sprint planning, release cycles, and compliance (Fortify, WhiteSource), ensuring delivery of secure, scalable HR support automation
- Architected a rule-based document extraction and matching solution using Gresham Clareti for audit workflows, producing stakeholder-ready financial reports
- Defined Agile workflows in JIRA, contributed to UI development (Angular, SCSS), set up CI/CD with Azure DevOps, and mentored developers with documented dev standards

Application Developer Analyst | Accenture, Bengaluru, India

02/2013 - 07/2017

Project: NewsPage & Accenture Methods & Tools (AMT)

Role: Application Developer – Backend, Database & BI | Domain: FMCGS & Internal Tools

- Designed and deployed MS SQL Server databases, schemas, and stored procedures for FMCGS client market rollouts; built SSRS reports and automated SQL Server Jobs for scheduled metrics
- Delivered ETL workflows using SSIS, implemented performance-boosting indexes, and set up replication to support high-volume, fault-tolerant data environments
- Developed backend services using Java, Spring Boot, and JPA with REST APIs; managed production support and fixed data integrity issues across .NET-based systems

EDUCATION

The University of Texas at Arlington - Arlington, TX, USA

08/2017 - 05/2019

Master of Science: Computer Science

Dayananda Sagar College of Engineering - Bengaluru, India

08/2008 - 07/2012

Bachelor of Engineering: Instrumentation Technology
