SUMMARY

Dynamic and results-driven **Salesforce Developer** with **3+** years of expertise in **Mobile app development** and **Salesforce**, leveraging a strong background in software engineering, machine learning, and cloud technologies. Technical proficiency includes **programming languages** such as **Python, JavaScript, and React**. Proficient in **AWS**, utilizing services like **EC2** and **S3** for scalable application development and deployment. Expert in **Salesforce Sales and Marketing Cloud**, optimizing workflows, and enhancing campaign performance to drive revenue growth. **Actively seeking opportunities** to leverage expertise and contribute to organizational success in a challenging role

PROFESSIONAL EXPERIENCE

FURTRIEVE

Fishers, IN

Salesforce Developer

June 2023 - April 2025

Incorporated mobile apps and Salesforce integrations, optimized system security, and built scalable backend services to improve performance and user engagement in pet health solutions

- Collaborated on **Agentforce AI** integration by developing backend endpoints and Apex services to consume predictive lead scoring data, triggering automated sales actions in Salesforce—**reducing the average sales cycle time by 1 week**
- Formulated custom **Visualforce** pages to create tailored user interfaces, improving usability and meeting specific business requirements within Salesforce applications
- Crafted and optimized **SOQL** queries to efficiently retrieve data from Salesforce objects, enhancing application performance and data accessibility
- Streamlined lead qualification and task assignment for veterinary sales teams by creating **custom Apex triggers and Sales Cloud components**, improving pipeline visibility by 38% and **enhancing conversion readiness** through structured lead staging
- Integrated Salesforce Marketing Cloud with mobile app data using **REST APIs** to sync pet health engagement metrics, enabling targeted re-engagement campaigns that resulted in a **25% improvement in user response rates** during beta trials
- Crafted **React Native** screens using **TypeScript**, optimizing performance to achieve **sub-2-second app load times** in beta environments, and utilized **Redux** for state control to ensure fluid navigation and interaction
- Implemented **Firebase OAuth 2.0 authentication, JWT-based session handling, and two-factor authentication (2FA)** for Salesforce-integrated systems—enhancing platform security and mitigating session hijacking and XSS risks during beta testing in accordance with OWASP standards
- Architected and deployed **Node.js** backend services on **Google Cloud Platform (GCP)** to handle high-volume API requests, ensuring seamless data processing and system scalability
- Managed **PostgreSQL** database operations and implemented secure access control using IAM roles

INFOBEANS TECHNOLOGIES

Pune, India

Salesforce Developer

Aug 2021 - June 2022

Client: Philips Electronics Ltd (Canada)

Engineered and optimized Sales Cloud and Marketing Cloud solutions, streamlining sales workflows and enhancing campaign performance through custom automation and reporting tools

- Formulated custom **Apex triggers, workflows, and Visualforce components** in Sales Cloud, improving lead-to-conversion efficiency by **15%**, driving **\$350K** in revenue growth by streamlining sales processes and automating lead management
- Created custom reporting dashboards using **Salesforce Reports and SOQL** to provide executives with real-time insights into pipeline health, enabling the sales team to **close 15 high-value deals in the first quarter** by enhancing visibility into the pipeline

- Built a metadata management tool within Salesforce Marketing Cloud, **reducing pre-launch testing time by 25 hours per campaign**, accelerating campaign deployment, and ensuring better quality control
- Unified external data sources via APIs into Salesforce Marketing Cloud, optimizing campaign targeting and improving lead-to-conversion rates, contributing to a **18% increase in qualified leads and faster data synchronization**

Client: Nestlé Purina Petcare (Canada)

Crafted automated marketing workflows and personalized customer journeys in Marketing Cloud, improving campaign performance and engagement while ensuring compliance with CAN-SPAM and GDPR regulations

- Led the development of **automated marketing workflows** in Marketing Cloud, improving campaign performance by **27%**, leading to **\$400K** in recurring annual revenue from increased customer engagement
- Designed personalized customer journeys using Journey Builder in Marketing Cloud, **resulting in the delivery of over 1,000 personalized emails per week** to pet owners, improving engagement and targeting accuracy
- Developed dynamic email templates, Cloudpages, and personalized communication strategies, **increasing the number of automated customer touchpoints by 40%**, driving improved engagement and higher customer retention
- Ensured **global compliance with CAN-SPAM and GDPR** regulations by automating compliance checks in campaigns, safeguarding the company's reputation, and reducing potential fines by \$75K

COGNIFRONT

Software Engineer Intern

Pune, India

June 2020 - Aug 2020

Applied machine learning to real-world datasets, building a predictive model for customer churn and optimizing data preprocessing to deliver impactful results

- Trained and deployed machine learning models using **Scikit-Learn, TensorFlow, and Keras**, improving model accuracy by 15% through hyperparameter optimization and feature engineering
- Preprocessed and cleaned large datasets (over 100,000 records) using **Python and Pandas**, ensuring high-quality input for model training and analysis
- Delivered a solution to a real-world customer churn prediction problem, building a predictive model that helped identify at-risk customers, ultimately increasing retention through targeted interventions

PROJECTS

AI-powered Fake-Review Detection System

- Optimized an advanced **NLP pipeline** to preprocess and analyze over **40,000** customer reviews, extracting critical linguistic features to identify fraudulent and Artificial Intelligence generated reviews
- Fine-tuned a BERT-based model using Hugging Face Transformers, achieving an **89%** accuracy rate in detecting fake reviews and significantly improving text classification performance
- Executed TF-IDF and embedding-based feature extraction to enhance model input representations, leading to improved fraud detection precision

Success Factors & Hate Speech Analysis for Artists on YouTube

- Extracted and analyzed YouTube Music API, NewsAPI, and Reddit API data to identify patterns in artist popularity, content trends, and audience sentiments, improving model insights
- Implemented **NLTK** tokenization and the ModerateHateSpeech API to detect and categorize hate speech in YouTube comments and Reddit discussions, improving text classification accuracy by **72%**

Smart Text-To-Speech Converter Website & Browser Extension

- Deployed an **AWS-based** Chrome Extension & website using React, Python, Go, & JavaScript to convert over 10,000+ words of text into speech, adaptable to various languages & dialects.
- Reduced latency by **38%** & minimized infrastructure costs by integrating AWS services like **EC2, DynamoDB, S3 Buckets, & API Gateway**, supporting high-volume text-to-speech operations

EXTRACURRICULAR ACTIVITIES & LEADERSHIP ROLE

Vice President - First Year Students Association

- Coordinated housing, transportation, and logistics for first-year students, resolving concerns through collaboration with university departments

Core Committee Member - Graduate Students Organization, Binghamton University

- Collaborated with team members to plan, organize, and execute events for graduate students, improving community engagement and participation

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, SQL, Java
- **Backend Technologies:** Flask, RESTful APIs
- **Frontend Technologies:** React.js, React Native, Bootstrap, Redux, HTML5, CSS3, JSON
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud Technologies:** AWS (EC2, S3, DynamoDB, API Gateway, RDS), GCP (Cloud Functions, Cloud Storage)
- **Salesforce Sales Cloud Technologies:** Apex, Lightning Web Components (LWC), SOQL, Visualforce, Salesforce Integration, REST APIs
- **Salesforce Marketing Cloud Technologies:** AMPscript, SSJS (Server-Side JavaScript), Journey Builder, Email Studio, Automation Studio, Audience Builder, Marketing Cloud API
- **Tools & Others:** CI/CD, Docker, Git, Firebase, Postman, Jira, Agile

EDUCATION

STATE UNIVERSITY OF NEW YORK AT BINGHAMTON	Binghamton, NY
MS in Computer Science	Aug 2022 - Dec 2024
SAVITRIBAI PHULE PUNE UNIVERSITY	Pune, India
BE Computer Engineering	Aug 2017 - May 2021
