Instellars Global Consulting Pte Ltd	Oct-2019 – Apr 2023
Tech Mahindra	May 2017 – Sep 2019
TATA Consultancy Services	Aug 2010 – Apr 2017

Randstad Digital

Sep 2023 – Jan 2025

Designation: Lead System Architect

Project 1: IQS (Integrated Quality Solutions)

Sep 2023 – Jan 2025

Client: Bank of America, Plano, Texas

Role: Pega Lead System Architect

Description: Integrated Quality Solution (IQS) is a Business Controls application used to perform inline (preventative) and post transaction (detective) quality evaluations. The application has the ability to integrate with line of business (LOB) Pega-based system of record (SORs) for automatic evaluation case creation, as well as a 360 feedback loop. This allows for seamless, near real-time processing of successful results by the parent applications, as well as notification in the event that remediation action is warranted.

Responsibilities:

- Successfully designed & implemented Sampling, Resampling & Stratification on Bulk case creation.
- Understand functional requirements and design Pega workflow for different modules using Case Management.
- Optimized system performance by analyzing guardrails, tuning database queries, and implementing Pega caching mechanisms.
- Implemented authentication and security best practices, including SSO, OAuth, SAML, and LDAP integrations.

- Involved in creating and modifying various PRPC activities, Flow, Flow actions, Assignments, Harness, Section and Decision table using PRPC. And worked on the new requests raised by client and develop those features.
- Engaged in performance enhancements and delivered customer-centric solutions.
- Addressed Pega upgrade issues.

Project 2: BOLT

Sep 2023 –Dec 2024

Client: Bank of America, Plano, Texas

Role: Pega Lead System Architect

Description: Bank of America develops a BOLT application for its debit and credit card customers. BOLT is a Unified Common Intake System, for various Line of Business ATM, Debit, ACH and Credit Cards. Credit Points Fraud, Non-Fraud Claims, Consumer Complaints, Deceased Customer Notifications, Military SCRA Benefits and Consumer Litigation are being initiated in BOLT. BOLT acts as front office for the fraud and non-fraud claims raised by CSR for the transactions It enables CSR's to capture the transaction and questionnaire information from users and sends data to various downstream systems where the case will be resolved on further analysis. Bolt also handles the issues/concerns raised by Auto Loan and Home Loan customers through financial centers and other different channels. There are reports created through which volume of different type of cases can be retrieved at any time.

Responsibilities:

- Understand functional requirements and design Pega workflow for different modules using Case Management.
- Involved in creating and modifying various PRPC activities, Flow, Flow actions, Assignments, Harness, Section and Decision table using PRPC. And worked on the new requests raised by client and develop those features.
- Conducted technical governance and code reviews, ensuring adherence to Pega best practices and maintainability.
- Addressed Pega upgrade issues.
- Provided mentorship and training to junior Pega developers, ensuring knowledge transfer and skill development.
- Automated deployment and DevOps processes, integrating Pega with CI/CD pipelines using Jenkins.

Instellars Global Consulting Pte. Ltd.

Oct 2019 – Jun 2023

Designation: Senior Architect / Lead Pega Consultant

Project 1: Care Shield Life (CSHL) (Insurance Domain)

Oct 2019 – Jun 2023

Client: Central Provident Fund Board (CPFBoard), Singapore
