WORK EXPERIENCE

SAP BRIM Analyst, contract, **NextGen Solutions**, United States
February, 2025 to Present

- Conducted functional testing of SAP SOM, CC, CI, and RAR modules using tools like SOAP UI and Postman for API testing
- Executed test plans, test cases, and regression testing for SAP BRIM implementation.
- Tested rating logic, allowance plans, and charge customization to meet business requirements.
- Tested automated order orchestration and fulfillment by integrating SAP SOM with SAP CC and CI.

SAP BRIM Consultant, fulltime, **Deloitte USI**, Hyderabad, India
September, 2023 to February 2025

- Demonstrated expertise in end-to-end SAP BRIM implementation projects, ensuring smooth delivery across all project phases.
- Proficient in directly engaging with clients to gather business requirements and translating them into detailed functional specifications for the SAP Convergent Charging (CC) system.
- Experience in configuring Charge Plans for recurring, one-time, and usage-based charges, along with managing Allowance Plans to support diverse pricing models.
- Experience in integrating SAP Convergent Charging (CC) with Subscription Order Management (SOM) and Convergent Invoicing (CI) modules for seamless business operations.
- Configured complex charge plans and contributed to the development and optimization of the Rating Engine within SAP CC Core.
- Updated Price Level Mapping Tables in alignment with evolving business requirements to support dynamic pricing strategies.
- Effectively mapped business requirements into the Convergent Charging Rating System, ensuring accurate integration with Convergent Invoicing (CI) and Revenue Accounting & Reporting (RAR) systems.
- Creation of functional specific documents, developed in module translating business requirements into system.
- Accountable for functional module testing, including the creation and execution of business test case scenarios during System Integration Testing (SIT) and Regression Testing.
- Created and managed contracts in the SOM system to simulate and validate various business scenarios during testing phases.
- Conducted thorough testing of product pricing, validating the generation of Billing Input Transactions (BITs) and Charging Input Transactions (CITs) during system integration testing.
- Hands-on experience with testing SOM and CI modules using tools such as SOAP UI and Postman for API validation and system interactions.
- Led key project management activities, including status reporting, defect tracking, and issue resolution using JIRA and other internal project management tools.
- Attended BR234, BR235, BR245 trainings from SAP, Hands on knowledge in SAP BRIM end to end workflow.

Risk Specialist, Amazon, fulltime, Hyderabad, India
September, 2015 to July, 2021

- Managed end-to-end billing and payment operations for Amazon's global marketplace, ensuring accurate invoicing, payment processing, and dispute resolution.
- Collaborated closely with internal teams, such as Customer Service, to streamline billing processes, ensure timely payment collection, and resolve customer issues effectively.
- Worked on integrating new billing technologies and tools, including SAP and internal Amazon platforms, to improve accuracy and scalability of billing systems
- Resolved complex seller-buyer queries related to high-risk and high-value purchases, maintaining customer trust and platform integrity.
- Utilized internal tools and dashboards to identify, report, and track anomalous purchase behaviors, enabling proactive fraud detection.
- Collaborated with stakeholders to enhance SOPs for risk detection and investigations. Audited resolved cases to ensure accuracy, compliance, and quality improvements.
