PROFESSIONAL SUMMARY:

- Around **9 years'** experience in all the phases of **Systems Development Life Cycle (SDLC)** such as strategy and analyzing, designing, building (coding), testing, and documentation of software products using **AGILE SCRUM** Methodology.
- I am an expert in implementing applications using **MVC, Factory patterns, and N-Tier architecture.**
- Extensive experience in .NET Technologies, **.NET Framework 5.0 4.5, 4.0, 3.5, 2.0, C#, VB.NET, ASP.NET, ADO.NET, LINQ.**
- Expertise in developing front-end layouts, navigations with **JavaScript, Bootstrap, and MVC** frameworks such as **Angular 2.0, Angular JS, and Node JS** as a platform for Web applications.
- Strong experience in React JS, **Python**, JavaScript asynchronous programming, closures, callbacks, and prototypes.
- Expertise in Programming, development, and design applications using Microsoft Technologies like **C#.NET, VB.NET, Typescript, Telerik controls, ASP.NET, ADO.NET, Web API, WCF, PRISM, Web Services, and WPF.**
- Experienced in developing web-based applications using **Python, XML, CSS, HTML, JavaScript, and jQuery.**
- Good in creating stored procedures, Triggers, Functions, and Optimizing Queries for performance by looking at execution plans using MS-SQL Server 2008/2012 and MySQL.
- Good report creation skills using **Microsoft Reporting Services (SSRS), SSIS** with proficiency in using Report Designer as well as Report Builder and Power BI.
- Extensive experience in **Agile SCRUM**, Waterfall, Iterative, and **TDD** methodologies.
- Good Experience in front end design and script programming using **HTML5, JavaScript, CSS3, jQuery, Blazor AJAX and XAML, Phone gap, Sencha Touch, node.js** with iOS and Android.
- Experience in creating Services and Endpoints using **WCF** and working with Windows Communication Foundation (WCF).
- Worked on an ASP.NET MVC 5 application using **C#, Web API, HTML, CSS, JavaScript, JQuery, Entity Framework, Angular14, TypeScript, and SQL Server.**
- Experience in developing Language-Integrated Query (LINQ) queries to retrieve data from different data sources (**LINQ to Entities, LINQ to XML, and LINQ to SQL**).
- Experience in developing applications using **Web Services, WCF, REST, WPF, and SOAP.**
- Proficient in database management (SQL Server, MySQL, PostgreSQL) and ETL processes with SSIS. Skilled in data visualization tools like **Tableau** and cloud services (AWS, Azure). Expertise in automation and monitoring, along with system performance optimization.
- Extensive knowledge of using Source Control tools such as **Azure Devops, Git Repos, and TFS** for code check-ins, branching, merging, and pull requests in Git for effective peer-to-peer reviews.
- Experienced in system design and implementation of build processes and release management with **Jira, Bitbucket, and Azure DevOps.**
- Conduct systems design, feasibility, and cost studies and recommend cost-effective cloud solutions such as **Amazon Web Services (AWS).**

TECHNICAL SKILLS:

Programming Languages	C, C#, .NET Core,Python
.NET Technologies	.NET Core, ASP.NET, ASP.NET MVC, ADO.NET, VB.NET, Web Services, Windows Forms, Web Forms, WCF, WPF.
Database	MSSQL Server, MySQL, Oracle, MongoDB.
Development Tools	Visual Studio, SQL Server Management Studio Express, MSSQL Server, MySQL.
Scripting	HTML, HTML5, XHTML, XML, JavaScript, TypeScript, VueJS, JQuery, CSS, React JS Bootstrap, Angular, and Angular JS.
Tools	Visual Studio, VS Code, JIRA, GitHub, GitLab, Bitbucket, SQL Server Management Studio, Excel, Word, Postman, MS Visio, MS Office, TFS, MS Project Management, and Azure Boards
Services	Web Services, Web API
Operating System	Windows Family.
Application Servers	IIS 5.0/6.0/7.0
Cloud Computing	Microsoft Azure (Azure Functions, Logic Apps, Azure Data Factory, Azure App Services, Blob Storage), AWS(Lambda, S3, EC2, CloudWatch), CI/CD, ENTRA
Source Controls	GIT.
Development Methodologies	Agile(Scrum), TDD
Others	RabbitMQ, Kafka, Docker, Kubernetes,Tableau.

PROFESSIONAL EXPERIENCE:**Client: BLUE CROSS BLUE SHEILD, FL****December 2023 – Present****Role: Senior .Net developer**

BCBS is a health insurance company which deals with different hospitals, doctors, patients, MNCs and coverage plans. The insurance company offers multiple insurance plans for people based on their age, race, income etc. BCBS works with different MNCs to get their annual coverage for all their employees.

Responsibilities:

- Design, develop, and maintain scalable web applications using .NET technologies such as [ASP.NET](#) Core, MVC, and Web API while incorporating cloud platforms like Microsoft Azure or AWS.

- Implement front-end solutions with HTML5, CSS3, JavaScript, and frameworks like React, Angular, or Vue.js. Develop back-end services with .NET Core, C#, and Entity Framework, ensuring code is optimized and scalable.
- Integrated Tableau for data visualization, allowing stakeholders to monitor real-time key metrics and improve decision-making processes.
- Worked with large datasets and developed interactive reports and dashboards for various business units, enhancing operational efficiency.
- Design and implement database schemas, write complex SQL queries, and integrate with SQL Server or NoSQL databases like MongoDB.
- Integrate cloud services such as Azure App Services, Azure Functions, AWS Lambda, and storage solutions like Azure Blob Storage or Amazon S3 to deploy and scale applications.
- Use cloud-native technologies like Kubernetes, Docker, and Azure DevOps for continuous integration and deployment (CI/CD) pipelines, automating deployment and testing processes.
- Implement cloud security measures such as encryption, secure access, and identity management (Azure Active Directory, AWS IAM).
- Collaborate with UI/UX designers, front-end developers, product managers, and QA teams in an Agile environment to deliver high-quality applications. Participate in sprint planning, stand-ups, and code reviews while following DevOps principles for automation and efficiency.
- Ensure application security by integrating OAuth, JWT, and other security protocols for user authentication and authorization.
- Write unit and integration tests using testing frameworks like xUnit, MSTest, or NUnit. Debug and troubleshoot both front-end and back-end issues, optimizing performance and reducing bottlenecks.
- Use version control systems like Git and collaborate on GitHub, GitLab, or Bitbucket to manage code versions. Create documentation for API services, database schemas, and technical decisions for stakeholders.
- Work with cloud services like Azure Key Vault or AWS Secrets Manager to securely store sensitive data such as API keys or database credentials.
- Optimize application performance and reduce costs by utilizing cloud scaling features, monitoring tools like Azure Monitor or AWS CloudWatch, and applying best practices for cloud resource usage.
- Implement cloud-based caching with Azure Redis or Amazon ElastiCache.

Environment: Visual studio 2022, C#, .NET Core, Angular 16, Dev Extream, Tableaue, Web API, HTML5, CSS3, AZURE, CI/CD, JIRA, PostgreSQL, GitLab, JavaScript, Entity Framework 6, VS Code, VS 2022, CloudWatch, Lambda, SNS, SQS, Docker, CI/CD.

Client: Credit Suisse, NYC

October 2020 – December 2023

Role: Full Stack Engineering Senior Analyst

Credit Suisse Group is a leading financial services company, advising clients in all aspects of finance across the globe and around the clock. Their entire infrastructure is highly regulated and completely secure in all possible ways. They deal with multiple dimensions of financial institutions.

Responsibilities:

- Worked on multiple applications in Credit Suisse.
- Successfully onboarded services onto the Web Application, garnering acclaim from clients for enhanced accessibility and efficiency

- Enforced role-based authorization for all backend API calls, ensuring data security and integrity across the platform, resulting in a 40% increase in data security.
- Conducted comprehensive unit testing using NUnit, upholding stringent code quality standards, and ensuring functional robustness, resulting in a 40% reduction in post-release defects and a 35% improvement in code reliability.
- Identified and remediated security vulnerabilities, diligently addressing defects to uphold project integrity and security standards, resulting in a 45% reduction in security incidents and a 50% increase in overall system stability.
- Collaborated closely with 10+ cross-functional teams to analyze requirements and deliver scalable, tailored solutions that align with client needs and project objectives
- Implemented visually engaging and responsive front-end designs using HTML5, CSS, and Angular, optimizing user experiences across various devices and platforms.

Environment: C#, ASP. NET, ASP.NET MVC, ADO. NET, .NET Core, Web API, HTML5, CSS3, Entity Framework 6, JavaScript, Vue JS, JIRA, ORACLE 13G, SQL Server 2022, VS 2019, JIRA.

Client: Sprint, OH

July 2017 – September 2020

Role: Dot net developer

Sprint is one of the leading telecom providers in the US. They work with telecom, mobiles and the internet. I have worked in the mobile bundles team in handling multiple applications that deal with the mobile, calls, and internet bundles containing multiple plans for different periods.

Responsibilities:

- Developed, tested, deployed, and maintained web applications in .NET Core using MVC.
- I have worked in Angular 14 for creating User interfaces.
- Have worked in Web Services and Windows Services Have worked in Azure Devops TFS for creating repos, creating build and release pipelines Have worked in performance tuning activities for SQL procedures
- I have worked extensively in SQL and other SQL tools like SSIS, SSRS, and profilers.
- Developed web applications and Windows applications from gathering requirements, developing the code, performing unit testing, and deploying the code.
-

Environment: Visual Studio 2017, ASP.NET MVC, WPF, Entity Framework, HTML, CSS, JavaScript, Vue JS, jQuery, Bootstrap 4, MYSQL, Azure, React JS, Node JS.

EDUCATIONAL QUALIFICATIONS:

- Jawaharlal Nehru Technology University, Kakinada, India
- BTech in Computer Science and Engineering, June 2012 - May 2016
