SUMMARY

Dedicated and hardworking engineer and rock climber with proven leadership capacities and problem solving skills seeking to continually learn in a positive work environment.

EXPERIENCE

*Arconic LLC, **Senior Automotive Product Engineer – Arconic***

Feb 2021 - Dec 2024

Excursion support

2024 – Halted 13M lb of off gauge metal and led investigation in root cause analysis and severity.

2023 – Oversaw tandem mill drag scratch and investigated root cause and correction in 6.8 M lb affected material.

Customer/Supplier development (GM, Hyundai, BWD, etc.)

Qualified the following products: one alloy for GM, two alloys for Hyundai, one laser blanking process for BWD

Capacity support

Decreased head/tail scrap resulting in an increase of 6 M lb per year.

Resolved customer claims and complaints with a cross-functional team approach driving continuous improvement.

*Arconic LLC, **Senior Automotive Product Engineer – Arconic***

Feb 2021 - Dec 2024

Capacity increase support

2022 - Validated coil racking requirements for O temper products and gained 21.5 days of furnace capacity

2021 - Adjusted annealing cycles for O temper products for GM and FCA to increase furnace capacity and saved \$1.38 million/year.

Interfaced with customers (GM, FCA, Rivian, and others) to ensure the outgoing products met the specifications of ordered materials (PPAP/PO/automotive or regulatory standard).

Reviewed customer specifications and ensured requirements were satisfied.

Onboarded new customers such as Rivian, Tesla, National Material Co, Hyundai, Hwashin.

Resolved customer claims and complaints with a cross-departmental approach driving continuous improvement.

*Magna International, **Metallurgical Engineer/Supplier Quality Engineer – Magna Powertrain Sterling Heights***

Jun 2017 - Dec 2020

Analyzed all customer and internal rejects and failures to determine the root cause, then presented solutions to correct the issue.

Process owner of all heat treat processes, facilitated setting up heat treat suppliers and improved their processes.

Performed continuous quality improvement assessments for heat treat (CQI-9) and welding (CQI-15).

Developed underperforming suppliers and oversaw/handled day-to-day material rejections.

Controlled the quality inspection and verification of material received from suppliers.

*Michigan State University, **Research Fellowship - International Genetically Engineered Machine (iGEM)***

Feb 2016 - Dec 2016

*Fabri-Kal, **Inspector Packer/Express Packaging***

Jul 2014 - Aug 2015

EDUCATION

Michigan State University

Material Science and Engineering

SKILLS

IATF Internal Auditor Certified • Six Sigma - Green belt certified • Failure Analysis • Progression Die Stamping • PPAP • Microsoft Power BI • Quality Management • Lean Manufacturing • Advanced Product Quality Planning (APQP) • Quality Assurance
