

PROFESSIONAL SUMMARY

Vision-driven change agent with career-long record of success in technology, project management, and problem-solving for leading organizations

Results-driven technical professional highly regarded for synthesizing complex information and providing effective and accurate solutions. Sought for superb analytical skills, with the ability to solve challenging problems using a combination of industry standard and cutting-edge technologies. Skillset to work compatibly with supervisors and clients to understand requirements and provide task completion exceeding quality expectations with on-time delivery. Strong leadership skills with experience working in a team environment, able to collaborate with individuals from diverse backgrounds. Exceptionally dedicated professional with keen interpersonal, communication, and organizational skills.

CORE COMPETENCIES

- Cloud Computing (Azure and AWS)
- Interpersonal Communication
- Resilient Architectures
- Infrastructure Optimization
- Data Storage
- Project Management
- Networking
- Cybersecurity
- Problem Solving

PROFESSIONAL EXPERIENCE

CDS OFFICE TECHNOLOGIES - ITASCA, IL

COMPUTER SYSTEMS ENGINEER – LEVEL 2, MAY 2024 — PRESENT

- Deliver expert support for cloud infrastructure, proficiently managing multiple client environments to guarantee efficient operations.
- Lead projects encompassing server provisioning, server virtualization, and cloud migration, ensuring seamless execution and minimal disruption.
- Drive the deployment and upgrade of new network equipment, such as firewalls, switches, and access points, enhancing network performance and security posture.
- Establish a variety of security solutions, ensuring robust protection against threats, adherence to compliance standards, and safeguarding of sensitive data.
- Implement effective disaster recovery plans and advanced backup strategies.

COMPUTER SYSTEMS ENGINEER – LEVEL 1, MAY 2023 — MAY 2024

- Regularly monitored system performance to ensure the proper functioning of computer infrastructure.
- Communicated with clients and managers in order to recommend performance optimization techniques.
- Created appropriate documentation that outlines tasks and procedures required for incident resolution.
- Prepared and presented detailed reports on system performance and incidents.

DYOPATH - SCHAUMBURG, IL

SERVICE DESK ANALYST, JULY 2021 — MAY 2023

- Managed incidents and solve problems through analysis, troubleshooting, and effective communication to ensure business continuity.
- Provided support to end users to resolve hardware and software issues in a timely manner.
- Configured user permissions by developing or modifying access control lists and security groups.
- Supported endpoints in accordance with critical security requirements to address vulnerabilities.
- Produced and improved user guides and instructional materials.

CHEGG INC. - REMOTE

MATHEMATICS & PHYSICS TUTOR, JUNE 2020 — JANUARY 2021

- Tutored students throughout the United States remotely using educational software.
- Adjusted to a wide range of skill levels in order to provide customized support.
- Facilitated in-depth discussions of topics with students, challenging them in order to facilitate learning and improve academic performance.
- Offered guidance and advice to foster healthy self-esteem and confidence.
- Reviewed student work to ensure proper execution and accuracy, providing actionable feedback for improvement.

TECHLOSS CONSULTING & RESTORATION, INC. - BUFFALO GROVE, IL

CONSULTING ENGINEER, APRIL 2019 — JUNE 2020

- Developed comprehensive project plans and calculated cost estimates to inform clients of project scope.
- Coordinated projects ranging from a \$1K to a \$300K budget, spanning a week to a couple months in length.
- Directed the operations of a team of up to six junior staff members by delegating responsibilities based on individual skill sets.
- Consulted with vendors to obtain estimates and schedule equipment inspections, repairs, and installations.
- Investigated failures by examining error codes and testing electronics to ensure full functionality.

UNIVERSITY OF ILLINOIS CHICAGO MICROFLUIDICS LABORATORY - CHICAGO, IL

RESEARCH ENGINEER, MAY 2017 — AUGUST 2017

- Discovered a detection method for colorimetric loop-mediated isothermal DNA amplification.
- Conducted meticulous experiments, recommending new methods of inquiry.
- Adhered to experiment procedures and collected data using principles of the scientific method.
- Compiled and analyzed data to generate research reports, presenting observations to advisers.

PROJECT EXPERIENCE

CDS OFFICE TECHNOLOGIES - ITASCA, IL

SERVER PROVISIONING, VIRTUALIZATION, AND APPLICATION MIGRATION, JULY 2024

- Orchestrated the commissioning of a new server, including provisioning storage for the operating system.
- Seamlessly integrated the server into the existing domain by configuring Active Directory Domain Services, subsequently elevating the server to domain controller status.
- Implemented the Hyper-V role, facilitating the creation of two virtual machines for enhanced efficiency.
- Collaborated closely with the development team to successfully migrate a critical line of business software, ensuring minimal disruption and maximum continuity of operations.

CERTIFICATIONS AND EDUCATION

MICROSOFT CERTIFIED: AZURE FUNDAMENTALS, NOVEMBER 2023

AWS SOLUTIONS ARCHITECT – ASSOCIATE, JANUARY 2023

AWS CLOUD PRACTITIONER, SEPTEMBER 2022

CISCO CYBEROPS ASSOCIATE, JULY 2022

COMPTIA SECURITY+, APRIL 2022

COMPTIA NETWORK+, OCTOBER 2021

COMPTIA A+, APRIL 2021

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING, University of Illinois Chicago - GRADUATED CUM LAUDE MAY 2018
