

MICHAEL KINSEY

Senior Full Stack Engineer

(React.js, Node.js, Python, Django, Flask)

Email: michaelck.us@gmail.com

Location: Saint Petersburg, FL

Mobile: (848) 301-1555

LinkedIn: <https://www.linkedin.com/in/michael-k-5b4b6533a/>

ABOUT ME:

With 9 years of experience in software engineering, I specialize in creating robust solutions using technologies such as React.js, Next.js, Node.js, Typescript, Python, React Native, and AWS.

I have a proven ability to design, enhance, and refactor scalable applications while maintaining legacy codebases. I collaborate well with cross-functional teams, focusing on performance, usability, and overall architecture improvements. Passionate about staying up-to-date with the latest tech trends, I leverage my experience in cloud architectures, microservices, and machine learning integrations to deliver high-quality solutions.

SKILLS:

Programming Languages	JavaScript, Typescript, Python, Java, C#, PHP
Frontend	React, Next.js, Vue, Angular, Solid.js, jQuery
Backend	Node.js, Express.js, Nest.js, Django, Flask, Fastify, Laravel
Database	MySQL, PostgreSQL, MongoDB, CosmosDB, Oracle, SQLite
Cloud	AWS, Azure, GCP, Firebase
AWS	EC2, S3, Lambda, ECS, Cognito, RDS, DynamoDB, SQS, ELB, IAM, EBS
Web	HTML/CSS, REST, RPC, AJAX, JSON, GraphQL
Mobile	React Native, Java/Kotlin, Swift, Flutter
Styling	Material UI, Tailwind CSS, Ant Design, Styled Component, Semantic UI
Version control tools	Git, SVN, Bitbucket, CVS
Message Queues	RabbitMQ, Apache Kafka, Active MQ
DevOps	GitHub Actions, Jenkins, Terraform
Testing tools	Jest, Cypress, Mocha, Jasmine, React-test-render, Enzyme, Playwright, Vitest
CMS	WordPress, Builder.io
Soft Skills	Mentoring, Communication, Time Management, Forward-Thinking

EDUCATION:

St. Petersburg College

Bachelor's Degree in Mathematics and Computer Science

2011 - 2015

WORK EXPERIENCE:

Tactiq

Richmond, VA (Remote)

Senior Full Stack Engineer

Sep 2021 – Mar 2025

- Led a team of backend and frontend engineers in developing and maintaining full-stack web applications (**GlobalWorx**), overseeing the entire software development lifecycle.
- Designed and developed a **RESTful API** in **Python (Django)** and **PostgreSQL**, serving over 1,000 daily users and handling high request volumes.
- Built a **serverless API** using **AWS API Gateway, Lambda, PostgreSQL, and DynamoDB**, enabling seamless client integration with our **SaaS platform**.
- Developed a scalable, event-driven ETL pipeline with **Go/Python, Kubernetes, PostgreSQL, and Kafka**, processing thousands of records per minute.
- Implemented a **CI/CD framework** using **Docker, Terraform, and GitHub Actions**, streamlining microservice deployments and reducing time from development to production.
- Created **data dashboards and automated reports** with **Looker**, delivering actionable insights to internal and external stakeholders.
- Developed **SQL models** to enable self-serve reporting for non-technical stakeholders, improving data accessibility and decision-making.
- Automated administrative and reporting tasks using **Python (Pandas, NumPy)**, saving significant labor hours and reducing errors.
- Conducted **ad-hoc data analysis** using **SQL and MongoDB**, tracking KPIs to drive data-informed decisions.
- Led critical development efforts in a **large-scale invoicing project (Acuity)**, enhancing performance, reliability, and maintainability.
- Designed and implemented a **custom access authorization system** for invoicing, resolving key bugs and improving maintainability.
- Spearheaded a **major system refactoring**, accelerating development and improving scalability.
- Owned critical financial functionalities, including **tax calculation and invoice generation**, ensuring accuracy and compliance.
- Collaborated with stakeholders to gather and structure requirements, driving complex projects from concept to execution.

Concentrix

Tampa, FL (Hybrid)

Senior Full Stack Engineer

Oct 2016 – Aug 2021

- Built a mental healthcare application that provides virtual clinical services for patients and doctors by using **React.js, Next.js, TypeScript**, and backend REST APIs using **Node.js, PostgreSQL** and **Python Django**.

- Migrated a Shopify e-commerce platform to a headless architecture, increasing page load times and conversion rates.
- Utilized React.js, Next.js, HTML, SCSS, Typescript, and **Tailwind** for styling library, integrated **GraphQL**, **Shopify**, **MongoDB**, and **Jest**.
- Created reusable and responsive React.js components with **D3.js** that support interactive visualizations.
- Made a combination of **SSR** and **SSG** for both dynamic and static pages.
- Used **Redux** promise and Redux middleware libraries such as **redux-thunk** and **redux-saga** to consume RESTful and GraphQL APIs.
- Integrated third-party APIs for scheduling events, notifications, prescriptions, and pharmacy data.
- Integrated a payment system using **Stripe**.
- Implemented **Auth0** authentication within the **Next.js** application for social logins, MFA, and role-based access control by utilizing the **@auth0/next-auth0** library.
- Developed and maintained RESTful APIs using **Spring Boot**, improving the performance and scalability of web applications.
- Optimized database interactions by integrating **Spring Data JPA**, reducing query response times and improving overall application efficiency.
- Used Postman to test RESTful APIs for HTTP requests such as GET, POST, and PUT.
- Designed and maintained MySQL, PostgreSQL, and MongoDB databases for client projects, ensuring efficient data storage, retrieval, and manipulation.
- Implemented **Redis** as a cache database.
- Wrote unit and integration tests using **Jest**, **Vitest**, **Mocha/Chai**, **Enzyme**, and **react-test-renderer**.
- Worked with **AWS** cloud services like EC2, S3, Lambda, SNS, CDK.
- Used **JIRA** for bug tracking, **Git** for version control, and **GitHub Actions** for CI/CD pipeline.
- Experienced in deploying web applications, especially in Linux environments using AWS EC2 and GitHub Actions with a connection with our version control system - Git.

Toptal

Aug 2015 – Sep 2016

San Francisco, CA (Remote)

Software Full Stack Engineer

- Developed scalable web applications using **AngularJS**, React (early adoption), and Backbone.js on the frontend.
- Designed and built RESTful APIs with Node.js (Express, Hapi.js), **Ruby on Rails**, and **Django**, ensuring efficient data exchange.
- Optimized **PostgreSQL**, **MySQL**, and **MongoDB** queries, reducing response time by 40% for high-traffic applications.
- Integrated **OAuth 2.0**, **JWT authentication**, and role-based access control (RBAC) for secure access management.
- Led the migration of a large-scale **AngularJS** application to **React**, improving maintainability and performance.
- Built a real-time analytics dashboard for e-commerce using WebSockets, **Redis** caching, and AWS deployment.
- Developed a multi-tenant SaaS platform with Django and PostgreSQL, implementing **Stripe API** for payments and **Celery** for background tasks.
- Deployed and managed applications on **AWS** (EC2, S3, RDS), **Heroku**, optimizing for scalability.
