EXPERIENCE

Freelancer, Consultant SAP Commerce (Hybris), Dotnet and Angular, MVNECO, Duesseldorf, Germany.

Developer Lead: B2B project Dormakaba, Ennepetal, Germany.

Apr 2025 - Present

- Defined project scope, objectives, and deliverables in collaboration with stakeholders.
- Identified and documented functional requirements.
- Designed high-level system architecture: microservice boundaries and responsibilities, worker processes for background video processing and vLLM services, database selection (SQL/NoSQL) and schema overview.
- Designed and created an environment setup: Aspire landscape, Kubernetes clusters in target environments (dev, staging, prod), CI/CD infrastructure using Jenkins, build agents and pipelines and automated testing and deployment stages.
- Designed and defined services and components: API contracts for each microservice, database schemas, model data entities, user authentication and authorization flows (JWT/OAuth2), video processing pipeline stages (transcoding, thumbnail generation, metadata extraction), error handling, retries, and compensation logic for distributed systems, component specifications and interfaces documentation.
- Created detailed backlog in project management tool.
- Selected External integrations (cloud storage, user authentication providers, payment gateways).
- Implemented ASP.NET microservices and worker processes following defined contracts.
- Designed and implemented an SAP Commerce store.
- Created and updated Helm charts for Kubernetes deployment.
- Integrated Loki/Jaeger and Prometheus agents into all services for real-time monitoring.
- Implemented automated UI tests with Selenium.

Freelancer, Consultant SAP Commerce (Hybris), MVNECO, Duesseldorf, Germany.

Project Dormakaba Ennepetal, Germany.

Sep 2024 – Mar 2025

- Successfully led a new team of developers, facilitated their integration into the team and provided essential support for the company's outsourcing initiatives, ensuring smooth integration and continuity.
- Provided essential technical support to ensure the smooth operation and maintenance of production systems.
- Led the migration of frontend components from React Apps and JSP pages to AngularJS/Spartacus.
- Software stack containerization.

Employee at MVNECO, Duesseldorf, Germany.

SAP Commerce Lead: B2B project Dormakaba, Ennepetal, Germany.

Nov 2020 - Jun 2024

- Developed a sophisticated B2B platform that enables seamless configuration and ordering of key systems, leveraging CPQ and SAP Commerce rules engine.
- Led a geographically diverse team spanning Spain, the US, Poland, India, Ukraine, and Germany.
- Collaborated closely with stakeholders, business users, and product owners from Switzerland, the US, and Germany to define methodologies, gather requirements, and ensure quality assurance.
- Redesigned the platform's architecture to utilize the OCC layer, enhancing efficiency and performance compared to the traditional MVC architecture.
- Evaluated Spartacus/AngularJS for migrating the project from on-premises to cloud.
- Co-designed system interfaces (SAP ERP, Salesforce, ...) with external partners.
- Collaborated with product owners across various teams to refine and enhance business requirements, ensuring alignment with project goals.
- Guided product owners and business users through Backoffice and Smartedit processes, ensuring they were well-equipped to utilize the system effectively.
- Developed and maintained CI/CD pipelines using Jenkins and Docker to automate the build, test, and deployment processes. This involved setting up Jenkins jobs, creating Docker images, and managing container orchestration to ensure seamless integration and delivery of software updates.

*Employee at **MVNECO, Duesseldorf, Germany.***

SAP Commerce Lead: B2C project Vorwerk, Wuppertal, Germany

Aug 2019 - Oct 2020

- Facilitated the seamless transfer and integration of source code from an external company to the internal IT department, including onboarding developers.
- Created and implemented innovative development, quality assurance, and continuous integration (CI) processes to enhance efficiency and ensure high standards.
- Created an SAP Commerce promotion engine module and successfully on-boarded the marketing department to ensure effective utilization.
- Introduced and trained business users on SmartEdit.

*Employee at **MVNECO, Duesseldorf, Germany.***
