

Rohit Joshi

Irvine, CA • 916-239-9330 (M) • iamrohitjoshi@gmail.com

Principal Architect | AWS & Oracle Cloud | Generative AI | TOGAF Certified

I partner with business leaders to transform vision into competitive advantage through technology. With 15+ years as Principal Solution Architect at AT&T/DIRECTV, I've architected and delivered large-scale solutions that accelerate growth, enhance customer experiences, and unlock measurable business value across enterprise and high-scale service industries.

PROFESSIONAL EXPERIENCE

AT&T

07/2015 – Present

Principal Solution Architect • El Segundo, CA, USA

AT&T Active Armor Mobile Security Product: *Million+ App Subscribers; Billions calls protected; Positive NPS; App rating: 4.5+*

- Architected an end-to-end solution integrating AT&T core systems with third-party services, ensuring compliance with FCC mandates (Consumer Protection, STIR/SHAKEN) and regulatory standards including PCI and SOX.
- Designed and delivered secure, scalable, fault-tolerant, and cost-optimized cloud platform with advanced networking, security, and load-balancing architectures. Business usecases include user onboarding, service provisioning (AMDOCS), subscription management, self-healing workflows, and Account lifecycle events such as rate plan, device/number and port-in changes across consumer, enterprise, first responder, and government segments.
- Integrated with AT&T authentication (SNAP) and authorization (oAuth) systems and enabled VPN-based secure connectivity for application users.
- Mentored junior architects and developers, promoting architectural best practices and cloud-native design principles.

DIRECTV

12/2009 – 07/2015

Principle Solution Architect • El Segundo, CA, USA

DIRECTV/ATT Merger Integration

Digital Strategy for directv.com/att.com

- Led the architecture track for the DIRECTV-AT&T digital integration program, defining Current State (as-is), Transition State(Inerim) and End-State(to-be) architectures.
- Designed scalable, customer-centric solutions to unify wireless and video service experiences across digital platforms.

Application Rationalisation

- Served as a core member of the Tiger Team tasked with rationalizing and consolidating applications across AT&T and DIRECTV business domains.
- Achieved a 35% reduction in application maintenance costs, improving operational efficiency, and reducing technical debt.

DIRECTV Product Launches

Genie, Genie Mini, Wireless Genie Mini, DIRECTV-Go, NFL Sunday ticket, Over the Top (OTT) Set Top Box

- Architected end-to-end solutions for multiple high-impact product launches, enabling new revenue streams and driving quarter-over-quarter growth in acquisitions, upgrades, and profitability.

- Partnered with business stakeholders and product owners to define strategic requirements and deliver scalable, high-performance solutions across domains including Sales Channels (Retail, Online, 3rd Party/Partners), Order Management, Fulfillment, Supply Chain (SAP), Field Services & Customer Care (Oracle Siebel), Provisioning & Billing (Amdocs), and API Management (Apigee).

Computer Sciences Corporation (CSC)
Technical Designer/Consultant • El Segundo, CA, USA

01/2007 – 12/2009

DIRECTV – Annual Enterprise IT Planning

- Supported annual technology and platform strategic planning by providing architectural insights and strategic recommendations across multiple business units.
- Designed conceptual architecture diagrams and high-level solution blueprints to enable accurate cost and duration estimates for upcoming initiatives.

Z-SOA (Zurich Service-Oriented Architecture) Program

Farmers Insurance / Zurich Insurance Group

- Served as Architect on the Z-SOA program, responsible for establishing the foundation of a Service-Oriented Architecture (SOA) Within Farmers Insurance to drive cost reduction, quality improvement, and shared investment across business units.
- Implemented SOA using a Model-Driven Architecture (MDA) approach with IBM Rational Software Architect (RSA), Insurance Application Architecture (IAA), Enterprise Service Bus (ESB), and Enterprise Registry frameworks.

Datacore Systems Inc.
Systems Analyst • Folsom, CA

10/2005 – 01/2007

Intel – Supply Chain Dashboard (SCDB) Migration

- Led the migration of a legacy ASP/ASP.NET-based Supply Chain Dashboard (Windows Server 2000 / IIS 5) to Microsoft SharePoint Portal Server 2003 (Windows Server 2003 / IIS 6).
- Delivered a modernized line-of-business portal providing unified access, single sign-on, Personalisation, and integration across multiple supply chain applications.

Countrywide Financial (Bank of America)
Senior Software Engineer • U.K.

11/2004 – 10/2005

Mortgage Servicing & Payment Management Systems

- Architected and developed the Mortgage Servicing Portal, a web-based solution enabling customers to securely access loan, account, property, and payment information from IBM AS400 systems via ASP.NET, C#, SQL Server 2000, and XML Web Services.
- Designed data access and service layers to ensure real-time synchronization between the AS400 backend and the browser interface, improving transparency and customer experience.
- Led the design and implementation of the SWIFT/CHAPS Payment Management System, automating payment instruction generation in SWIFT MT103 format and integrating with banking networks for secure payment processing and status tracking.

Zensar Technologies
Consultant • Pune, INDIA

09/2003 – 11/2004

Nomura Research Institute (NRI), Japan | TriMaster Asset Management System Migration

- Contributed to the migration of the Money Market Processing System (part of NRI-TStar for trust banking) from COBOL/ADABAS to Microsoft .NET (C#) and SQL Server 2000, modernizing the financial processing platform.

EDUCATION

Bachelor of Engineering (B.E.) – Digital Electronics

Amrutvahini College of Engineering, University of Pune • INDIA

11/2000

TECHNICAL EXPERTISE

Enterprise Architecture

- BSS / OSS Solution Architecture
- Enterprise Architecture
- Governance & Compliance Architecture
- Model-Driven Architecture (MDA)
- Service-Oriented Architecture (SOA)
- TOGAF 9.1 Framework
- UML

Cloud & Modern Architecture

- API-First Design
- Event-Driven Architecture (EDA)
- Fault Tolerant
- Microservices Architecture
- Networking
- Scalable
- Security
- Serverless Computing

Integration & APIs

- Enterprise Integration Patterns
- Message Queuing (MQ)
- OAuth 2.0 & OpenID Connect
- REST/RESTful APIs
- SAML
- SOAP/Web Services
- Synchronous/Asynchronous Communication Patterns

Platforms & Enterprise Systems

- AMDOCS Billing & Provisioning
- Apigee, Mulesoft API Management Platform
- Microsoft SharePoint
- Oracle Siebel CRM
- SAP Supply Chain

Database & Programming Skills

- IBM AS/400
- J2EE
- Java
- Microsoft SQL Server
- .NET Framework
- Oracle
- Python

Methodologies & Delivery

- Change Management
- DevSecOps
- Enterprise Architect Sparx
- IBM Rational Software Architect
- M&A Integration Planning
- SAFe Agile
- Technical Debt Management
- Waterfall

Business Domains

- Financial Services
- Insurance
- Mortgage Banking
- Pay TV/Video Entertainment
- Telecommunications (Wireless, Broadband, Fiber)

Compliance & Security

- FCC Regulatory Compliance (STIR/SHAKEN, Consumer Protection)
- HIPAA
- OAuth/OIDC Implementation
- PCI DSS
- SOX

PROFESSIONAL CERTIFICATIONS

Oracle 2025 Generative AI Professional

Oracle Cloud Infrastructure 2025 Certified – Architect Associate

AWS Certified Solutions Architect – Professional

TOGAF 9.1 Certified – Level 1 & 2

Certified SAFe 5.0 Architect

TM Forum Certified Open Digital Framework (Foundation)

Solace Certified Event Driven Architecture Practitioner

AWARDS & RECOGNITION

AT&T Active Armor Mobile Security App – Recognized for architectural excellence delivering market-leading mobile security platform protecting billions of customer calls
