

RIAN ZADAH

Senior iOS Developer

link.rianzadah@gmail.com • <https://github.com/RZCodes> • Flushing, NY, USA

Summary

Focused on creating intuitive and efficient iOS applications, I bring 7+ years of deep expertise turning innovative concepts into reliable, high-quality mobile experiences. Senior iOS Developer skilled in Swift, SwiftUI, Combine, MVVM, VIPER, CI/CD, and team leadership to build scalable apps.

Skills

Tech Stack: SwiftUI • UIKit • Combine • Swift Concurrency

Databases: Core Data • Realm • Firebase Firestore • SQLite

State Management: Combine • SwiftData (iOS 17+) • Redux (ReSwift) • ObservableObject • EnvironmentObject

Testing: XCTest • Quick/Nimble • SnapshotTesting • XCUITest

DevOps Tools: Fastlane • Bitrise • GitHub Actions • Jenkins

Version Control: Git • GitHub • GitLab • Bitbucket

Application Architecture: MVVM • VIPER • Clean Architecture • MVC

Experience

Futrise

Senior iOS Developer

03/2022 - Present

- Increased UI development speed by 25% by coordinating the transition from UIKit to SwiftUI in enterprise apps.
- Established architecture standards using MVVM and Clean Architecture to ensure code scalability and team-wide development consistency.
- Led the adoption of Combine for managing asynchronous events and data streams, resulting in more reactive and resilient app behavior.
- Managed CI/CD implementation using GitHub Actions and Fastlane, reducing deployment errors and enabling bi-weekly TestFlight releases.
- Mentored a team of 4 iOS developers, reviewed code, and conducted technical interviews to scale the team while maintaining high code quality.

Systems Chief

iOS Developer

12/2020 - 02/2022

- Developed complex features using UIKit and SwiftUI within a modular MVVM architecture, enabling faster onboarding for new developers.
- Integrated Firebase (Auth, Firestore, Crashlytics, Analytics) to handle authentication, data sync, crash reporting, and usage tracking.
- Configured automated pipelines with Bitrise and Fastlane to streamline releases, resulting in faster production rollouts.
- Led test strategy and implemented 250+ test cases using XCTest and XCUITest, increasing overall code coverage and reducing bugs.
- Coordinated with design and product teams to deliver pixel-perfect UI and UX, enhancing customer satisfaction and App Store ratings.

LabMinds

Mobile Developer

10/2018 - 11/2020

- Built and maintained features in Swift using UIKit, Auto Layout, and Storyboards, ensuring seamless experiences across iPhones and iPads.
- Developed a robust API layer using URLSession, Codable, and error handling to streamline data exchange and improve response times.
- Participated in code reviews, pull requests, and agile ceremonies, supporting a healthy development workflow and collaborative environment.
- Designed custom reusable components to reduce redundancy, accelerate UI development, and maintain consistency across the app.

Projects

TrueFire

<https://apps.apple.com/us/app/truefire-guitar-lessons/id690143001>

TrueFire's style-specific Learning Paths guide guitarists every step of the way. Use the assessment tools to find your starting point, then follow the lesson recommendations, and track your progress as you work through your personalized TrueFire study plan.

SB health

<https://apps.apple.com/us/app/sb-health/id6738105700>

SB health app allows you to safely store your identification (ID) cards, benefits information, important phone numbers, healthcare conditions, prescription drug (Rx) names and dosages, allergies, blood type, etc. right on your smartphone.
