SUMMARY

Full Stack Developer with 6 years of experience in designing and building scalable, cloud-native web applications using **Java, Spring Boot, React, Node.js, and .NET Core**. Proven ability to lead and collaborate with cross-functional teams, driving end-to-end feature delivery with a strong focus on **system design, RESTful APIs**, and **modern authentication methods** like **JWT** and **OAuth**. Experienced in deploying to **AWS** and **Azure**, implementing **CI/CD pipelines**, and improving performance through **code optimization** and **microservices architecture**. Passionate about clean code, test-driven development (**unit & integration testing**), and continuous learning.

TECHNICAL SKILLS

Skills	: Node.js, Java, Spring Boot, Typescript, JavaScript, Angular, React JS, Express JS, Bootstrap, Tailwind CSS, Django
Cloud	: Azure, Amazon Web Services
Databases	: MongoDB, Microsoft SQLServer, PostgreSQL
Tools	: SQL Server Management Studio, Visual Studio Code, Visual Studio, PowerBI, Jira, Git, Agile
Certifications	: AWS Cloud Practitioner, Machine Learning A-Z: Hands-on Python in Data Science (Udemy), Google Analytics (for Beginners), Business Intelligence (Coursera)

WORK EXPERIENCE

Morgan Stanley Capital International, Mumbai

Aug 2021 - Jan 2024

Software Engineer II | .NetCore, React, SQL, Azure, GCP, Bootstrap, Docker

- Implemented **JWT Authentication** and **OAuth-based login flows** to enhance security for internal tools.
- Worked in an **Agile/Scrum** environment, coordinating sprint goals with 3 product managers and stakeholders.
- Designed **scalable REST APIs** using .NET Core and optimized **SQL queries**, reducing response time by 25%.
- Containerized applications using **Docker** and deployed on **Azure Kubernetes Service (AKS)** for high availability.
- Led **system design** sessions for greenfield applications and refactored legacy code into **microservices**.
- Built custom monitoring tools with integrated **error alerting** and logging via **Azure Monitor**.

Indus Valley Partners, Mumbai

Jun 2018 – Aug 2021

Software Engineer, Full Stack Developer | SQLServer, Angular, AWS, Java, Python

- Followed **adapter design patterns** and implemented **GraphQL APIs** for efficient data fetching.
- Engineered scalable Angular/Java applications with **modular architecture** and **state management**.
- Used **CI/CD pipelines** on AWS Code Pipeline and Code Deploy for automated delivery.
- Applied **unit testing** with JUnit and Jest; improved test coverage by 35%.
- Conducted regular **code reviews**, ensured adherence to **SOLID principles**, and mentored junior developers.

PROJECTS

Kurry Kitchen | MongoDB / Express JS / React JS / Node JS / OpenAI's / Meta API

- Developed and launched Kurry Kitchen, a home-cooked meal platform, successfully onboarding **50+ kitchen owners** and serving **500+ customers** within the first six months.
- Implemented **WhatsApp order integration** and **AI-powered** meal recommendations, reduced manual order processing time by 40% and improved meal selection efficiency for users.

Automatic Subjective Answer Evaluation | Python / React JS / Django

- Designed a full-stack ML web app to evaluate subjective answers using **custom NLP algorithms** trained on Kaggle datasets
- Built and compared models like **Logistic Regression, SVM**, and **Decision Trees**, achieving 75% accuracy.
- Applied **data preprocessing, model validation**, and integrated backend with Django APIs for seamless deployment.

EDUCATION

Pace University

Jan 2024 – May 2025

Masters in computer science

KJ Somaiya College of Engineering, Mumbai, India

Jun 2014 – May 2018

Bachelor of Technology in Information Technology

ACHIEVEMENTS

- Received 2 Star Awards at MSCI and Shining Star Award at Indus Valley Partners.
- Published a technical paper on **my** final-year project, "Subjective Answer Evaluation" in Springer Publications.
