📍 Fort Worth, Texas 📞 (817) 701-5521 ✉ robert.j.berg@gmail.com

## Profile

Experienced Desktop and Server Engineer focused on enhancing productivity through end-user computing technology. Proven track record in optimizing Microsoft SCCM and VMware environments, improving organizational outcomes. Skilled in configuring and implementing Windows systems, ensuring seamless user experiences. Committed to driving operational excellence with a strong foundation in security and incident resolution.

## Work Experience

📅 03/2022 – PRESENT 📍 FORT WORTH, TX

### Data Center Engineer BNSF Railway

- Provided technical support and troubleshooting for VMware virtual servers, enhancing system reliability and performance.
- Assisted in designing and implementing VMware solutions, which involved planning and deployment for enhanced virtualization.
- Built and deployed Microsoft Windows SQL Clusters, ensuring high availability and optimized database performance.
- Monitored and reported on VMware environment performance, resolving issues proactively.
- Performed hardware swaps on problematic physical VMware host servers to maintain operational efficiency.
- Administered VMware environment to ensure high availability of applications.
- Managed AWS storage leveraging S3 and FSx technologies, supporting seamless data management and access.
- Played a key role in disaster recovery planning and testing for the VMware infrastructure, ensuring operational resilience.
- Executed system upgrades, patches, and installations within physical hardware environment to maintain current standards.

📅 03/2020 – 03/2022

### Windows System Administrator BNSF Railway

- Utilized Microsoft SCCM to manage over 2000 Windows servers, ranging from 2012R2 to 2022, ensuring they were up-to-date and secure.
- Collaborated with application owners to diagnose and resolve server errors, maintaining system reliability.
- Performed Microsoft SQL cluster failovers to maintain system uptime and security patch levels.

## Work Experience

- Deployed new Windows servers using VMware infrastructure for migration from outdated systems.
- Provided help desk support via Service Now, ensuring effective documentation of user issues.

📅 06/2018 – 03/2020 📍 FORT WORTH, TX

### System Engineer Wilks Brothers, LLC

- Rebuilt the Microsoft SCCM environment to automate server and desktop management, enhancing operational efficiency.
- Built hybrid Microsoft Intune and SCCM environment to enable employees to BYOD.
- Managed and monitored Veeam Enterprise backup for 200+ servers, ensuring data integrity and availability.
- Configured Solarwinds Orion for system alerts, improving incident response times.
- Implemented company-wide Windows upgrade, using SCCM and Intune to transition from Windows 7 to Windows 10.
- Introduced LanSweeper for asset management, centralizing assets and licenses.
- Applied server and desktop patching for 1600+ users and servers, maintaining system security through Microsoft SCCM and Intune environments.
- Maintained VMware and Hyper-V environments, supporting virtualization efforts.

📅 04/2017 – 06/2018 📍 FORT WORTH, TX

### Systems Engineer II MHMR of Tarrant County

- Developed Windows 10 group policies for a company-wide upgrade, streamlining system management.
- Implemented AirWatch MDM for 1300 mobile devices, ensuring seamless device management across hybrid cloud.
- Led migration of 1800 users to Skype for Business from Office Communicator, enhancing communication capabilities.
- Designed and maintained virtualization solutions using VMware, boosting system efficiency.
- Handled maintenance for 250 servers across multiple active directory domains, ensuring operational stability.

📅 07/2012 – 03/2017 📍 FORT WORTH, TX

### Senior Regional IS Administrator TranSystems

- Designed Help Desk systems using Zendesk and Freshdesk for 1000+ users, improving support

## Work Experience

- efficiency.
- Implemented company intranet via SharePoint, earning employee excellence award for overcoming challenges.
- Supervised Macintosh and Windows hardware provisioning, ensuring user support.
- Executed server hardware upgrades nationwide, maintaining infrastructure integrity.
- Provided remote support for end users, enhancing user experience through effective solutions.

01/2012 – 06/2012 FORT WORTH, TX

### Field Technician Think Fixed Inc.

- Supported clients in desktop operations, addressing both hardware and software needs effectively.
- Installed IT network equipment and system software, facilitating smooth client transitions.
- Monitored server performance, ensuring consistent IT services.
- Managed helpdesk operations, providing timely resolutions to client tickets.
- Handled network account setups, supporting seamless network operations.

06/2010 – 01/2012 CHICAGO, IL

### Lead Technician Toscas Group Inc

- Delivered technical support directly to customers, enhancing service experience.
- Installed and configured computer systems and peripherals, ensuring efficient user setup.
- Reconfigured systems for new components, enhancing operational capacity.
- Communicated clearly with clients, simplifying technical jargon for better understanding.
