

RYAN PAUL

Senior Full Stack Developer

📧 dev.ryanpaul123@gmail.com github.com/Dev-Sphere111 📍 New York, United States

SUMMARY

Full-Stack Engineer with 7+ years of experience in scalable web applications and backend services. Expert in **Python**, specializing in **Django** and **Flask**, with strong **Node.js** proficiency. Skilled in **API development**, third-party integrations, and **React-based UIs**. Strong grasp of databases, **CI/CD pipelines**, and clean, maintainable code. Collaborative problem-solver with a track record in **healthcare, automotive, fintech**, and **e-commerce**.

EXPERIENCE

Senior Full Stack Developer

Pegrecruiting Colorado

📅 05/2021 - Present

- Led the complete development of high-performance web applications with **Python**, improving speed and enabling quicker rollout of new features.
- Refactored and optimized backend architecture, **reducing server response times by 30%** and significantly enhancing user experience and system reliability.
- Integrated **RESTful APIs** and third-party services, enabling seamless data exchange and automation of key business processes.
- Designed and implemented **efficient relational database schemas** in **PostgreSQL** and **MySQL**, **faster data retrieval** through query optimization and indexing strategies.
- Supervised and guided a team of 5 junior developers through code reviews and pair programming, boosting code quality and consistency.

Full Stack Developer

Tillster

📅 09/2019 - 04/2021

- Engineered and maintained **high-traffic web applications** using **Python** and **React with TypeScript**, ensuring **scalability and responsive UI/UX** for over **daily users**.
- Developed and maintained **RESTful APIs** and **GraphQL endpoints**, improving data efficiency and enabling smoother integrations with third-party services.
- Automated testing and quality assurance with **PyTest**, **Selenium**, and **Cypress**, achieving **95% test coverage** and significantly decreasing post-deployment issues.
- Orchestrated seamless **CI/CD** workflows utilizing **GitLab**, **Docker**, and **AWS ECS**, reducing the time to production from weeks to days.
- Worked with teams across departments to turn business needs into practical solutions, helping improve customer retention through better features and engagement.

Backend Developer

Tillster

📅 06/2018 - 08/2019

- Contributed to the development of **robust and scalable back-end services** using **Python**, supporting mission-critical e-commerce operations.
- Assisted in the creation and maintenance of **RESTful APIs** and optimized service communication, reducing latency and improving data throughput across services.
- Worked alongside front-end developers to integrate **React** and **TypeScript** with **Python**-based back-end systems.
- Gained valuable insights into best practices for code quality, testing, and debugging by observing senior engineers.

EDUCATION

BSc Computer Science

Superior University

SKILLS

Backend

Python	Django	Flask	FastAPI
Node.js	Express.js	NestJS	
RESTful APIs	JWT		

Frontend

React	TypeScript	JavaScript	
Vue.js	Angular	Next.js	HTML5
CSS3	Redux		

Databases

PostgreSQL	MySQL	SQLite
MongoDB		

DevOps Tools

Git	GitLab	Jenkins	Docker
Kubernetes			

Testing Tools

PyTest	Selenium	Cypress

PROJECTS

Wendy's

🔗 <https://www.wendys.com/en-uk>

Developed Wendy's UK website, ensuring seamless user experience across 20+ locations. Implemented fresh, dynamic content to highlight unique offerings, and Optimized the platform for online orders and delivery services.

CaseCTRL

🔗 <https://casectrl.com/>

Contributed to developing CaseCTRL, an AI-powered surgical scheduling platform. Enhanced EMR integration for actionable insights and reduced scheduling conflicts, leading to increased surgery efficiency and patient time.
