PROFESSIONAL SUMMARY

- Highly skilled .NET Full stack Developer over 6+ years of experience developing scalable enterprise applications using ASP.NET Core, C#, Angular, ReactJS, and Blazor, improving transaction efficiency and user engagement.
- Designed and implemented RESTful APIs, microservices, and serverless workflows with SignalR, gRPC, and Azure Functions, enabling real-time communication and reducing system latency.
- Developed and optimized databases using SQL Server, PostgreSQL, MongoDB, Redis, leveraging Entity Framework Core for high-performance data retrieval and analytics.
- Strengthened application security through OAuth2, JWT, IdentityServer4, and RBAC, ensuring PCI-DSS and HIPAA compliance across finance, healthcare, and telecom applications.
- Automated CI/CD pipelines and deployments using Azure DevOps, GitHub Actions, Docker, and Kubernetes, reducing release times and enhancing system reliability.

TECHNICAL SKILLS

Programming & Frameworks: C#, ASP.NET Core (.NET 6/7/8), ASP.NET MVC/Web API, Blazor, JavaScript, TypeScript, Angular 8+, ReactJS, Node.js, jQuery, Bootstrap, Tailwind CSS, Python, SQL/T-SQL, PowerShell.

Backend & Middleware: Microservices, REST/gRPC APIs, SignalR, WebSockets, Async Programming, LINQ.

Databases & Storage: SQL Server, Oracle, PostgreSQL, MongoDB, Redis, Azure SQL Database, Cosmos DB.

Cloud & DevOps: Microsoft Azure (App Services, Functions, Key Vault, Blob Storage, API Management, Logic Apps, AKS), AWS (EC2, S3, Lambda), Docker, Kubernetes, Terraform, Git, GitHub Actions, Jenkins.

ORM & Data Access: Entity Framework Core, Dapper, ADO.NET, LINQ-to-SQL, Repository & Unit of Work.

Testing & QA: xUnit, NUnit, Moq, Selenium, Postman, Swagger, Jest, Cypress, TDD.

Security & Compliance: OAuth2, OpenID Connect, JWT, IdentityServer4, RBAC, SSL/TLS, Azure AD Authentication, API Security.

Monitoring & Performance: Azure Monitor, Application Insights, ELK Stack, Grafana, Prometheus.

Tools & Methodologies: Visual Studio, VS Code, Postman, Fiddler, Swagger UI, JIRA, Confluence, Agile/Scrum, CI/CD Automation.

PROFESSIONAL EXPERIENCE

.NET Full Stack Developer

Aug 2023 - Present

BMO Harris Bank | Chicago, IL

- Engineered enterprise-scale banking applications using ASP.NET Core 7, C#, and Angular 14, improving transaction response times by 30% and enhancing user experience across digital platforms.
- Built distributed microservices architecture with ASP.NET Web API and Azure API Management, ensuring secure and scalable integrations with payment gateways and credit validation systems.
- Revamped the web interface using Angular, TypeScript, and Bootstrap, delivering a responsive, ADA-compliant UI that increased customer satisfaction scores by 20%.
- Optimized SQL Server 2019 queries, stored procedures, and indexing strategies through Entity Framework Core, reducing query latency by 40% and improving data throughput for financial reporting.
- Strengthened application security by implementing OAuth2, JWT, and IdentityServer4, aligning authentication processes with PCI-DSS standards and mitigating unauthorized access risks.
- Designed automated CI/CD pipelines using Azure DevOps and GitHub Actions, reducing deployment time by 70% while maintaining consistent release quality across multiple environments.
- Automated fraud monitoring and transaction reconciliation workflows with Azure Functions and Hangfire, improving operational efficiency and reducing manual oversight by 35%.
- Enhanced observability with Azure Monitor and Application Insights, proactively identifying performance bottlenecks and lowering system downtime by 25% through data-driven optimizations.

.NET Full Stack Developer

Dec 2020 - Aug 2022

Trinity Health | Livonia, MI

- Delivered HIPAA-compliant healthcare applications using ASP.NET Core 3.1, C#, and Entity Framework Core, securing patient data and reducing compliance issues by 25%.
- Developed RESTful APIs with ASP.NET Web API to integrate EHR systems, patient portals, and insurance providers, improving data exchange reliability by 35%.
- Revamped front-end portals using ReactJS, Angular 10, TypeScript, and Redux, enhancing responsiveness and lowering page load times by 20% for patients and clinicians.
- Automated notifications, lab report alerts, and insurance claim workflows with Azure Functions and Hangfire, increasing processing efficiency and cutting manual tasks by 40%.
- Integrated third-party APIs for lab results, insurance verification, and pharmacy services, streamlining service turnaround by 30% while maintaining accurate data flow.

- Enforced RBAC security with JWT and OAuth2, strengthening access controls and preventing unauthorized access to sensitive healthcare records.
- Configured CI/CD pipelines in Azure DevOps, automating builds, tests, and deployments, reducing production errors by 50% and accelerating release cycles.
- Monitored system health using Application Insights and Azure Monitor, identifying performance bottlenecks proactively and maintaining 99.9% portal uptime across applications.

.NET Full Stack Developer

Oct 2018 - Dec 2020

AT&T | Dallas, TX

- Delivered high-performance telecom applications using ASP.NET Core 2.1, C#, ReactJS, and Entity Framework Core, supporting over 2 million customer accounts and streamlining billing and service workflows.
- Engineered RESTful APIs to connect internal telecom systems with web and mobile apps, enabling real-time service data synchronization and reducing reconciliation errors by 35%.
- Revamped ReactJS dashboards using Redux and Context API, optimizing state management and accelerating data rendering by 30%, which improved portal responsiveness for call centers and customers.
- Enhanced backend efficiency by optimizing SQL Server 2016 queries and implementing Redis caching, cutting database load by 45% during peak traffic periods.
- Strengthened platform security through OAuth2, OpenID Connect, and JWT-based authentication, ensuring compliance with corporate security policies and reducing unauthorized access attempts.
- Streamlined release management by implementing CI/CD pipelines in Azure DevOps, enabling automated builds, testing, and zero-downtime deployments while cutting manual deployment effort by 50%.
- Automated billing, service activation, and notification workflows using Azure Functions and Hangfire, reducing manual processing time and improving operational throughput by 40%.
- Integrated SignalR for real-time alerts and customer support chat, increasing user engagement, reducing response times by 25%, and enhancing transparency of service updates.

PROJECTS

Banking Transaction Monitoring Platform

- Developed a real-time fraud monitoring system using ASP.NET Core, Angular, and Azure Functions, detecting unusual transaction patterns and reducing potential fraud exposure.
- Implemented SignalR notifications and Azure Event Grid for asynchronous event handling, ensuring instant alerts to customers and operations teams.
- Integrated machine learning APIs for anomaly detection and deployed via Docker containers on Azure Kubernetes Service (AKS) with CI/CD pipelines in Azure DevOps, achieving scalable and automated delivery.

Healthcare Portal Modernization

- Migrated legacy monolithic applications to microservices architecture using .NET Core and ReactJS, improving scalability and maintainability by 50%.
- Introduced JWT-based authentication and deployed serverless components with Azure Functions, ensuring secure and efficient background processing for patient workflows.
- Enhanced UI accessibility with WCAG 2.1 compliance, optimized load times using lazy loading and Redux state caching, improving overall user experience for patients and clinicians.

EDUCATION

Master of Science in Computer Science

Jan 2023 - May 2024

Alcorn State University, | Lorman, US

Bachelors of Technology in Mechanical Engineering

Aug 2015 - May 2019

Gururanak Institute of Technology | Hyderabad, India

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate
- Microsoft Certified: .NET Developer
- IBM Full Stack Software Developer Professional Certificate - **Coursera**
- .NET Full Stack Developer Specialization - **Coursera**
- Back-End Web Development with .NET - **LinkedIn Learning**
- Building Web APIs with ASP.NET Core 8 - **LinkedIn Learning**
