

# Sree Saranya Narisetty

## Data Analyst | Business Data Analyst | Product Analyst

Illinois (Open to Relocate), USA | (224)-225-9566 | [narisetty.saranya@gmail.com](mailto:narisetty.saranya@gmail.com) | [LinkedIn](#)

### SUMMARY

---

- Results-driven Data Analyst with **5+ years of experience** in data analysis, business intelligence, and process automation across fintech and enterprise environments.
- Proven track record of **delivering data-driven insights** to enhance fraud detection, campaign performance, and strategic decision-making for high-impact stakeholders.
- Proficient in **SQL, Python, Tableau, Power BI, Airflow, and AWS Redshift**; skilled in developing and optimizing ETL pipelines, dashboards, and automated reporting workflows.
- Demonstrated ability to work with **large-scale transactional, financial, and operational datasets**, uncovering trends and translating complex data into actionable strategies.
- Experience collaborating cross-functionally with **product, engineering, finance, and risk teams** to drive innovation and close business gaps through analytics.
- Successfully led multiple end-to-end projects, including **fraud insights platforms, BI automation for financial services**, and executive dashboarding initiatives.
- Adept at **data quality assurance**, cleansing, and governance practices to ensure reporting accuracy and compliance across business domains.
- Strong communicator with experience in stakeholder engagement, requirements gathering, and presenting insights to non-technical audiences.

### TECHNICAL SKILLS

---

- **Data Analysis Tools:** Tableau, Power BI, Advanced Excel, Alteryx, Google BigQuery, Power Query
- **Big Data Technologies:** Hadoop, Spark, Kafka, Hive, Pig, MapReduce, Flume
- **Programming Languages:** Python, SQL, R, SAS, Scala, DAX, MDX
- **Cloud Technologies:** AWS, Azure, GCP, AWS Redshift, AWS Glue, Azure Machine Learning, Databricks
- **Database Management:** MySQL, SQL Server, PostgreSQL, Database Design, Query Optimization, Data Warehousing, Data Mining
- **Statistical Techniques:** Regression Analysis, Hypothesis Testing, ANOVA, Confidence Intervals, Probability distributions, Time Series Analysis, Cohort Analysis
- **Machine Learning Frameworks:** Scikit-learn, TensorFlow, Keras, PyTorch, Model Evaluation, Feature Engineering, Hyperparameter Tuning
- **Methodologies:** SDLC, Agile, Waterfall, Data Governance, Data Quality Management, Data Security, Metadata Management

### EXPERIENCE

---

Data Analyst | Mastercard, IL

Aug 2023 – Present

Project: **Transaction Intelligence Optimization & Fraud Insights (TIOFI)**

- Conducted in-depth analysis of multi-million-row transactional and financial datasets to detect anomalies, fraud signals, and emerging customer behavior patterns using statistical techniques and business logic.

- Designed and deployed optimized SQL queries across normalized and denormalized relational databases (PostgreSQL, Oracle, MySQL) to support data wrangling, cleansing, and analytics.
- Developed and maintained scalable ETL pipelines using Python, Pandas, and Apache Airflow, reducing manual reporting cycles by 70% and ensuring timely delivery of insights to downstream systems.
- Created dynamic, drill-down Tableau dashboards for product, marketing, and fraud teams, enabling real-time visualization of KPIs such as transaction volume, risk score, and campaign engagement rates.
- Partnered with cross-functional teams including data engineering, compliance, fraud operations, and product management to define business requirements, validate insights, and implement analytics solutions.
- Performed data profiling, validation, and anomaly detection to ensure consistency and accuracy across data sources, resolving over 150+ discrepancies and improving reporting precision.
- Built fraud detection frameworks and behavioral segmentation models in collaboration with the risk team, contributing to a measurable 10% decline in fraudulent transaction activity.
- Optimized AWS Redshift clusters and wrote efficient SQL for large-scale data processing, resulting in a 25% improvement in query performance and pipeline throughput.
- Aggregated and transformed data from structured and semi-structured sources (CSV, JSON, APIs) to support credit risk scoring, merchant analysis, and consumer spending intelligence.
- Contributed to the design and rollout of internal financial analytics tools, supporting executive-level decision-making and strategy planning.
- Presented data findings and actionable insights through compelling data storytelling, tailored visualizations, and executive summaries to senior leadership, enhancing data literacy and stakeholder engagement.
- Supported the development of internal financial products and analytics tools by providing real-time insights and reporting frameworks.
- Communicated findings and recommendations to senior leadership using clear data visualizations and financial storytelling techniques.

**Data Analyst | HCL, India**

**Nov 2021 – Dec 2022**

**Project: Business Intelligence Automation for Financial Services (BIAFS)**

- Extracted, transformed, and analyzed large-scale structured and semi-structured financial datasets from SQL-based databases to identify trends, inconsistencies, and business performance opportunities.
- Developed and optimized complex SQL queries (joins, subqueries, CTEs, window functions) to support reporting, forecasting, and dashboarding needs across multiple business units.
- Automated recurring reporting processes using Python (Pandas, NumPy, openpyxl), reducing manual effort and turnaround time by over 60%, while improving data accuracy and timeliness.
- Designed and deployed interactive dashboards using Power BI and Tableau, enabling senior leadership to monitor KPIs, financial metrics, and SLA adherence in real-time.
- Conducted data validation, root cause analysis, and anomaly detection to ensure high data integrity, reducing data-related escalations and increasing stakeholder trust.
- Collaborated with cross-functional stakeholders including finance, operations, business analysts, and IT teams to gather requirements, refine business logic, and ensure alignment between technical solutions and business objectives.
- Created reusable Python scripts and report templates to streamline monthly, quarterly, and ad hoc reporting cycles, enhancing scalability and process consistency.
- Documented data pipelines, data definitions, business logic, and reporting workflows for audit readiness, knowledge transfer, and compliance with internal governance standards.
- Conducted user training sessions and provided ongoing dashboard support, ensuring end-user adoption and effective use of business intelligence tools.
- Ensured adherence to data privacy, security standards, and regulatory compliance (e.g., GDPR, SOX) across all reporting activities and data-handling processes.
- Documented data processes, business rules, and reporting logic for knowledge sharing and audit readiness.

- Supported end-users through report training, dashboard walkthroughs, and ongoing enhancements based on feedback and evolving requirements.

**Data Analyst | TCS, India**

**Jan 2019 – Nov 2021**

**Project: Strategic Business Insights & Reporting Automation (SBIRA)**

- Interfaced with business stakeholders to gather and translate business requirements into functional data models, KPIs, and dashboards.
- Developed SQL-based reports and queries to extract and analyze business performance data from enterprise systems and data warehouses.
- Automated and standardized recurring reports using Excel macros and Python scripts, reducing manual effort and improving reporting accuracy.
- Created real-time dashboards and visualizations using Power BI and Tableau to track business KPIs, operational metrics, and financial performance.
- Conducted gap analysis and process optimization studies, providing actionable recommendations that supported cost reduction and productivity improvements.
- Collaborated with cross-functional teams including IT, finance, and operations to implement data solutions aligned with client goals.
- Supported decision-making processes by delivering ad hoc analysis, variance reports, and trend insights to business units.
- Ensured data integrity and compliance by conducting regular data quality checks and validating reports against source systems.
- Participated in UAT (User Acceptance Testing) for newly implemented dashboards and systems, ensuring data alignment and business readiness.
- Documented data workflows, reporting logic, and stakeholder requirements for continuity and knowledge transfer.

## EDUCATION

---

- Master of Science in Information Science – Robert Morris University, USA
- B. Tech in Electronics and Communications Engineering – DRK College of Engineering and Technology, India

## CERTIFICATION

---

- Microsoft Certified: Power BI Data Analyst Associate
- **Google Data Analytics Professional Certificate** (Coursera)
- Tableau Desktop Specialist
- **IBM Data Science Professional Certificate**
- **Python for Data Science and Machine Learning Bootcamp** (Udemy)
- **Certified Fraud Examiner (CFE)** – Association of Certified Fraud Examiners (ACFE)
- **Financial Data Modeling & Analysis** (CFI or LinkedIn Learning)

## REFERENCE ON REQUEST
