

Shaphondria N. Parker

5815 Fulton Point Drive, Spring, Texas 77379 | 281-650-8456 | shaphonb@hotmail.com

Professional Summary

Senior Principal Program Planning Consultant with 30 years industry experience, bringing specialized depth in advanced planning and scheduling strategies for complex, large-scale programs. Recognized for a proven record in strategic planning, enterprise-level project management, and cross-functional coordination to ensure on-time, on-budget delivery. Expert in complex planning and scheduling solutions, with comprehensive expertise in project controls, risk management, and Agile methodologies. Certified Master Scheduler, highly proficient in leading scheduling platforms including Primavera P6, Deltek, NetPoint, Oracle Primavera Cloud, MS Project, and OnePager Pro.

Technical Skills

Primavera P6 | Deltek | NetPoint | Oracle Primavera Cloud | MS Project | SSI Tools | OnePager | EcoSys | Jira | SAP | Power BI | Microsoft Office Suite | Agile Methodologies | SIMOPS | Risk Management | Earned Value Management (EVM): Analysis, Reporting, Implementation, Forecasting | Monte Carlo Simulations

Professional Skills

Program and Project Management | System Completion and Commissioning | Strategic Planning | Scope Definition | Schedule Estimation | Schedule Quality Assurance & Control | Procurement & Contracting Strategies | Leadership | Cross-functional Collaboration & Coordination | Communication | Data Analysis and Reporting | Negotiation | Problem-Solving

Professional Experience

Senior Principal Program Planner and Controls Engineer

Confidential Client | Nov 2021 – Current

Manage comprehensive planning and control for capital projects. Provide advanced-level strategic and tactical implementation across various sectors, including construction, energy, defense, portfolio management and civil transport programs in accordance with DCMA compliance. Ensure schedule alignment with detailed technical scope definitions for accurate scheduling, estimation and efficient execution. Develop IMS architecture and manage schedule implementation for programs of varying capital scales. Provide proactive, comprehensive oversight across programs: proposal development, production, acceptance, and execution. Leverage extensive EPCIC project delivery experience across domestic and international programs.

- Administer Primavera P6 scheduling applications to optimize project timelines through integrated master schedule development and effective resource allocation management.
- Generate logically linked, multi-disciplinary schedules aligned with precedence flow of EPCIC planning, ensuring adherence to industry best practices.
- Facilitate detailed, multi-disciplinary scope reviews to analyze engineering, procurement, fabrication, construction, installation and commissioning sequences, prioritizing critical path control and optimizing project durations.
- Develop and implement schedule and contracting strategies, plan and coordinate systems completion protocols, oversee hand-over procedures and manage commissioning timelines and start-up activities to ensure effective schedule management and on-time, within-budget delivery.
- Support project baseline development and program initiation. Evaluate schedule compliance, monitor KPI performance and analyze baseline variances.
- Maintain and develop the work breakdown structure and resource-loaded data to establish the program performance baseline.
- Analyze schedule quality metrics, including EVM analysis, validate EVMS reported progress data and perform comprehensive schedule assessments using Primavera P6 and Microsoft Project.
- Perform DCMA 14-point schedule health assessments, analyze resource allocation, and evaluate hypothetical scenarios.
- Identify existing and potential schedule risks and evaluate recovery and enhancement measures that may influence the schedule; analyze the impact of schedule modifications due to unforeseen conditions and develop proactive mitigation strategies.
- Develop custom IMS views to analyze project status, performance factors and deviations; generate forecasts and create contingency plans using earned value curves and critical path analysis.
- Expert-level proficiency in Microsoft Excel, cost control, estimating tools, databases, and related software, with advanced skills in progress curves, histograms, dynamic tables, formulas, and variance reporting.

- Collaborate with cross-functional teams to achieve project goals and cultivate sustained strong professional relationships.
- Serve as the primary planning and controls resource for all projects within the program segment.
- Recognized as a master planner and SME for resolving complex planning/scheduling issues and recommending best practices.

Principal Planning Engineer

Chevron | Houston, Texas | Sep 2019 – Jun 2020

Led planning and scheduling initiatives within a multi-functional project controls team, supporting Major Capital Projects (MCP) for the Unconventional Planning and Optimization Factory Model in compliance with the Chevron Project Management System (CPMS).

- Focus included development and completions operations for the Permian Basin oil and gas project, supporting Asset Development for the Continental business unit's upstream operations.
- Delivered and implemented cost engineering COE-aligned tools and processes for the business unit.
- Facilitated the timely maintenance and delivery of integrated execution schedules by collaborating with cross-functional teams and utilizing input from playbooks for drilling, completions, and facility infrastructure activities.
- Conducted summary reviews and reporting on Permian Basin unconventional project execution, focusing on optimizing resource allocation, including drilling rigs for project prioritization and facility location.
- Provided scenario planning outlooks for functional and factory performance teams.
- Proactively identified external impacts and risk mitigation opportunities for commercial oil and gas takeaway, water supply and disposal processes.
- Integrated schedules with performance groups to support funding allocations and cost control initiatives.
- Managed project reporting improvements and the integration of Primavera P6 with other scheduling applications, including EcoSys and MS Project.

Scheduling and Planning Manager

Noble Energy | Houston, Texas | Sep 2013 – Mar 2018

Managed planning and reporting for multi-phase execution of 21 prospects across Gulf of Mexico and international assets, including West Africa, Canada and the Eastern Mediterranean.

- Formulated comprehensive exploration plans for prospective portfolio maturation and well planning, incorporating geological and geophysical operations, regulatory and land requirements, drilling completions, development efforts and strategic business needs.
- Coordinated all geological and petrophysical activities for pre-drill operations and prepared schedule analysis and progress reports for individual and integrated operational plans.
- Maintained schedule optimization by prioritizing critical activities to align with exploration and production goals, and created contingency plans to address potential problems and delays, providing reports detailing their effect on critical path activities
- Managed risk-based work selection and responsibility matrices, developing mitigation plans to assess and eliminate potential risk occurrences, and ensured data and schedule integrity, optimizing for scope variations and trends that could impact project outcomes.
- Partnered with Finance and Accounting to create long-term project economic analyses and cost-effectiveness strategies. Presented a high-level overview of budgeting and forecasting procedures.
- Standardized Deepwater EP processes and facilitated process flow across departments, managing communication packages, data distribution, reporting and progress tracking for all operated and non-operated wells.
- Facilitated weekly stakeholder meetings and streamlined communication between multiple disciplines for status reporting. Defined process owners and resources and developed interface networks to adhere to schedule requirements.
- Maintained close liaison for planning initiatives across departments and Business Development.
- Demonstrated functional knowledge of geological, petrophysical and drilling practices, coupled with experienced in GoM regulatory requirements, relative to shallow hazards, geohazards, geoscience and archaeological data.

Planning and Controls Manager

Chevron/Worley Parsons | Houston, Texas | Mar 2013 – Sep 2013

Served as the lead planning liaison between the operator and EPC contractor for the Rosebank FPSO design and topside fabrication project.

- Directed the coordination of schedule and control activities between project interfaces.
- Created comprehensive planning and communication packages for EPCC tasks and construction sequencing; maintained and updated detailed work plans for fabrication, installation and offshore material supply.

Senior Planning Engineer – Gulf of Mexico Projects

ExxonMobil | Houston, Texas | Feb 2013 – Sep 2013

Spearheaded planning and scheduling for pre-execution development of major GoM subsea tie-back project.

- Coordinated strategic multi-level planning for the FEED phase development of offshore oil fields.
- Managed schedule integration and plans for contractors and interdisciplinary teams during implementation, encompassing FEED, engineering, procurement, fabrication, installation, commissioning and start up.

Senior Planning and Controls Engineer

BP | Houston, Texas | Sep 2009 – Jan 2013

Managed planning and control for Subsea/Deepwater decommissioning projects, prioritizing safety, exploration planning and Operational Management System (OMS) implementation.

Oversaw the planning process for OMS implementation including shutdown and release progress during decommissioning

- Developed operational plans and control objectives in alignment with OMS safety initiatives for the decommissioning phase.

Planner / Scheduler

Shell | Houston, Texas | May 2007 – Sep 2009

Provided comprehensive planning and control support for refinery locations throughout the Southern and Western US.

- Led planning and execution of oil and gas programs, ensuring on-time and on-budget delivery; engineered and implemented strategic plans to meet program objectives.
- Managed coordination with cross-functional teams in engineering, manufacturing, and quality assurance.

Planning and Resource Engineer

ExxonMobil | Houston, Texas | Oct 2004 – Apr 2007

Led strategic planning and production scheduling for ExxonMobil Chemical Operations Division.

- Created comprehensive planning packages to coordinate functional organizations on production forecasts, material demand, supply status, logistics needs and inventory projections.
- Developed mitigation schedules to address production constraints, planned/unplanned downtime, sample requests and shutdowns.

Planner / Scheduler

Chevron | Houston, Texas | Jan 2002 – Aug 2004

Developed strategic planning for commercial supply chain logistics and distribution.

- Managed supply and logistics planning for bulk crude oil and refined product transport to US refinery destinations.
- Coordinated multi-modal transport (pipeline, marine, rail, truck) for seamless product delivery.

EPC Project Planner

Enron Engineering & Construction | Houston, Texas | Sep 1995 – Jan 2002

Provided strategic coordination for project planning and execution across diverse product lines within the International Engineering and Construction Division. Facilitated the successful execution of complex capital projects, large-scale infrastructure initiatives and TurnKey project deliveries.

- Managed comprehensive planning and ensured timely execution across all lifecycle phases (design, procurement, construction, installation and commissioning) by developing proactive contingency plans.
- Coordinated engineering adherence (civil, mechanical, electrical, process) to specifications and timelines, pre-commissioning to startup activities, including international facilities for timely delivery and installation.

Education

Bachelor of Arts (BA), English | Minor in Business & Organizational Management | Spelman College | May 1995
