

SAI BHUVNESH MANNE
JAVA FULL STACK DEVELOPER

USA | +1 (945)-208-0270 | mannesaibhuvanesh1@gmail.com | [LinkedIn](#)

SUMMARY

Java Full Stack Developer with over 3 years of experience in designing, developing, and deploying high-performance applications using SDLC, Agile, and Waterfall methodologies. Well-versed in backend technologies, including Core Java, Java 8/11, and J2EE components like Servlets, JSP, JSTL, JavaBeans, JDBC, and Java Mail. Proficient in frameworks like (Spring Boot, MVC, Security), Hibernate, and Microservices, delivering scalable and secure solutions. Experience in front-end development with HTML, CSS, JavaScript, TypeScript, React.js. Good knowledge of cloud environments, leveraging AWS services (EC2, VPC, S3, CloudFront, ELB), Apache Tomcat for efficient application deployment and management. Hands-on expertise in database technologies, including MySQL, PostgreSQL, Oracle, SQL Server, and MongoDB, ensuring optimal data handling and integration for enterprise-grade applications.

SKILLS

- **Methodology:** Agile
- **Languages:** Core Java, Java 8/11, SQL
- **Frameworks:** Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF
- **IDEs:** NetBeans, IntelliJ IDEA, VS Code, Eclipse
- **J2EE Technologies:** Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail
- **Web Technologies:** HTML, CSS, JavaScript, TypeScript, Bootstrap, jQuery, Ajax, JSON, XML, React.js
- **Cloud Technologies:** AWS (VPC, EC2, S3, CloudFront, ELB, Redshift)
- **Application Server:** Apache Tomcat, IBM Web Sphere
- **Databases:** MySQL, SQL Server, PostgreSQL, Oracle, MongoDB
- **Version Control/Other Tools:** Git, GitHub, GitLab, Maven, Gradle, Jira, Jenkins, Junit, MS Excel, JMeter
- **Operating Systems:** Windows, Linux, Mac

EXPERIENCE

Paypal, USA | Java Full Stack Developer Apr 2024 – Current

- Engaged in all phases of the SDLC, including requirements gathering, design, development, testing, and deployment, with a focus on agile methodologies like Scrum.
- Advanced Java applications using Core Java and MySQL, enhancing code performance by 25% and improving maintainability through optimized coding practices and efficient database integration.
- Built RESTful APIs using the Spring MVC framework to facilitate efficient communication between client and server systems.
- Instigated dynamic and responsive UIs using React.js, HTML, CSS, JavaScript, TypeScript resulting in a 20% increase in user engagement and improved overall user experience.
- Worked with Hibernate for persistence, implementing POJOs, Data Access Objects (DAO), Transactions, Batch Processing, and Caching.
- Structured applications with Spring Boot and implemented authentication and authorization using Spring Security (JWT, OAuth2)
- Implemented tools like Git, Jira, Docker, Postman, and Swagger for version control, issue tracking, API testing, and documentation
- Designed Dockerized micro services and deployed applications on Kubernetes, ensuring high availability, fault tolerance, and seamless scalability.
- Conducted unit and integration testing using JUnit, Mockito, and Postman, improving test coverage and ensuring seamless API interactions before production release.

HDFC Bank, India | Java Full Stack Developer Mar 2020 – Dec 2022

- Led the development of RESTful APIs using the Agile methodology, covering requirements gathering, planning, design, and deployment to ensure structured project execution.
- Considered scalable Java applications using Java 8 Spring MVC, Spring Boot, and Spring Security, implementing a microservices architecture that improved system flexibility by 30% and reduced downtime by 20%.
- Applied Spring MVC and Hibernate, reducing development time by 40% for scalable and maintainable web applications.
- Industrialized enterprise-level web applications utilizing Servlets, JSP, JavaBeans, and JDBC, achieving 95% accuracy in seamless database integration and enhancing data processing efficiency by 25%.
- Built and consumed SOAP & RESTful Web Services, leveraging SOA architecture, WSDL, and Apache Axis.
- Expertise in Spring Boot, Spring MVC, Spring Validation, and Tiles Framework for application development.
- Designed and built RESTful APIs and microservices to enable seamless communication between client and server applications.
- Organized and monitored web applications using AWS services such as EKS and Lambda, with continuous monitoring via AWS CloudWatch to ensure system reliability
- Developed interactive and user-friendly front-end interfaces using React.js, HTML, CSS, and JavaScript, leading to a 40% improvement in user satisfaction and engagement metrics.
- Established unit tests with JUnit and established a Jenkins CI/CD pipeline, automating deployment processes for efficient testing and faster release cycles.
- Deployed and managed containerized applications with Docker and Kubernetes, increasing deployment speed by 40% and ensuring 99.9% uptime in production environments.
- Administered and optimized relational databases like MySQL and PostgreSQL, improving query performance by 35% and maintaining 100% data integrity through regular audits and performance tuning.

EDUCATION

MS in Computer Science University of South Florida	Dec 2024
BS in Computer Science and Engineering Marri Laxman Reddy institute of technology and management, India	Jun 2022

CERTIFICATE

AWS Certified Solutions Architect
