

Sai Nithin Erra

DevOps Engineer

✉ sainithinerra76@gmail.com ☎ +1(603) 550-6545 📍 Austin, Texas, 78728 🔗 LinkedIn

Summary

Results-driven DevOps & Cloud Engineer with over 5 years of experience automating, scaling, and managing infrastructure in AWS and Azure environments. Proven expertise in CI/CD pipeline engineering, Kubernetes orchestration, Infrastructure as Code (IaC), and cloud-native solutions using tools like Terraform, Ansible, Jenkins, and Docker. Known for reducing provisioning time, improving release velocity by up to 30%, and maintaining 99.9% uptime through robust monitoring, automation, and cloud best practices.

Skills:

Cloud Platforms: AWS (EC2, VPC, EKS, Lambda, RDS, CloudFormation, IAM, S3, CloudWatch, CloudTrail, ELB)

Azure (VMs, VNet, AKS, ACR, Azure DevOps, Azure SQL, Azure Monitor, AD, Storage, Automation)

DevOps & Infrastructure: Terraform, Ansible, Jenkins, GitHub Actions, GitLab CI/CD, AWS CodePipeline, Azure Pipelines, Argo CD, Helm, CloudFormation, ARM Templates

Containers & Orchestration: Docker, Kubernetes (EKS, AKS), Istio, Docker Compose, Docker Swarm

Monitoring & Logging: Prometheus, Grafana, CloudWatch, Azure Monitor, ELK Stack, Nagios, Splunk, Loki

Security & Compliance: IAM (AWS/Azure), RBAC, MFA, Vault, AWS Secrets Manager, Azure Key Vault, SOC 2, GDPR, PCI-DSS

Scripting & Programming: Python, Bash, PowerShell, YAML, JSON, Groovy

Databases & Storage: AWS RDS (MySQL, PostgreSQL, Aurora), DynamoDB, Azure SQL, MongoDB, Redis, Azure Blob, AWS S3, Azure Files

Operating Systems: Linux (Red Hat, Ubuntu, CentOS), Windows Server, VMware, Hyper-V

Professional Experience

AWS DevOps Engineer, AT&T

12/2023 – present | Austin, USA

- Automated infrastructure provisioning with Terraform and CloudFormation, improving deployment consistency and reducing time by 40%.
- Built robust CI/CD pipelines using Jenkins and AWS CodePipeline, integrated SonarQube for static code analysis and vulnerability scanning.
- Managed EKS clusters, enabling seamless container orchestration, auto-scaling, and load balancing for critical workloads.
- Deployed serverless solutions using AWS Lambda, optimizing resource usage and automating tasks.
- Implemented full-stack monitoring using CloudWatch and Prometheus, minimizing downtime and improving visibility.
- Provisioned and optimized AWS RDS and DynamoDB, ensuring high availability and database performance.

Azure DevOps/Cloud Engineer, RL Carriers

09/2022 – 08/2023 | New Jersey, USA

- Deployed and managed AKS clusters, enhancing availability and scaling of microservices across Azure.
- Automated infrastructure provisioning using Terraform, ARM Templates, and Azure DevOps Pipelines.
- Developed CI/CD pipelines for app deployment with integrated testing and approval gates, reducing release time by 25%.

- Set up centralized logging and monitoring using the ELK Stack, improving root cause analysis and incident response time.
- Managed Azure AD and implemented secure RBAC policies for cloud resource access.

Linux System Administrator, MoneyGram International 01/2019 – 02/2022 | Chennai, India

- Automated recurring maintenance tasks using Shell scripting, improving uptime and reducing manual effort.
- Managed core services like DNS, DHCP, NFS, enhancing network reliability and system stability.
- Administered Red Hat Linux servers and MySQL databases, performing regular backups and security hardening.
- Monitored infrastructure using Nagios and system logs for performance optimization.

Education

MS Computer Information Systems, New England College, 03/2022 – 12/2023 | Henniker, USA

BS Computer Science, 06/2017 – 04/2020 | Hyderabad, India
Bharath Institute of Engineering and Technology
