

sakshamjain0220@gmail.com

(610) 545-9390

New York City USA

Skills

- **Data Analysis & Modeling:** Data Wrangling | EDA | Statistical Analysis | Trend & Variance Analysis | Forecasting | Predictive Modeling | Root-Cause Analysis | A/B Testing
- **Programming & Databases:** Python (Pandas, NumPy, Scikit-Learn) | SQL (MySQL, Oracle, Teradata, BigQuery) | R | SAS | MATLAB | Snowflake | Databricks
- **BI & Visualization Tools:** Tableau | Power BI | Excel (Advanced Pivot, Macros) | Google Data Studio | SSIS
- **Cloud & Big Data:** AWS (S3, Redshift) | GCP (BigQuery, Dataflow) | Azure Synapse | Spark | Hadoop
- **Data Engineering & ETL:** SQL ETL Pipelines | Data Cleansing | Data Integration | Automation | Dimensional Modeling (Star Schema, Snowflake)
- **Statistical Techniques:** Regression | Classification | Clustering | ANOVA | Hypothesis Testing | Time Series Forecasting
- **Soft Skills:** Business Requirements Gathering | Cross-Functional Collaboration | Agile | Scrum | Stakeholder Communication

Education And Training

05/2024

Master Of Science:

Data Science

New Jersey Institute Of Technology

USA

05/2022

Bachelor Of Technology:

Information & Communication Technology

Gujarat Technological University

India

Saksham Jain

Summary

Results-driven Data Analyst with five years of hands-on experience turning raw data into actionable insights using SQL, Python, Tableau, and Power BI. Proven record in **ETL automation, data modeling, forecasting, and predictive analytics** across healthcare and business domains. Adept at translating business requirements into data-driven solutions, and designing performance-optimized dashboards for executive decision-making. Experienced in **cloud data platforms (AWS, GCP, Snowflake)**, collaborative Agile environments, and cross-functional stakeholder communication.

Experience

Molina Healthcare - Data Analyst

New York, USA

01/2024 - Current

- Designed and deployed interactive Tableau and Power BI dashboards, consolidating complex healthcare data into KPI-driven insights used by executive leadership.
- Built and automated ETL pipelines in SQL and Python, integrating data from MySQL, Teradata, Hive, and BigQuery to ensure end-to-end data accuracy.
- Conducted A/B testing and predictive pricing analysis, leading to a 20% increase in conversion rate, and a 10% reduction in acquisition costs.
- Implemented data validation frameworks, ensuring 100% integrity of financial and operational metrics used in monthly reports.
- Partnered with finance, marketing, and operations teams to perform root-cause variance analysis, improving forecast accuracy by 15%.
- Streamlined data monitoring process using SAS and MySQL for model performance evaluation and trend forecasting.

Groovy Web - Data Analyst

Ahmedabad

01/2020 - 12/2022

- Developed and automated end-to-end reporting systems in Power BI and MySQL, reducing manual analysis time by 40%.
- Created data visualizations and dashboards to track key business metrics, boosting data-driven decisions by 25%.
- Conducted **trend and scenario analysis in Python** to forecast sales and resource allocation efficiency.
- Built robust data quality pipelines for reporting accuracy, and implemented backup and recovery plans for MySQL databases.
- Partnered with cross-functional teams to identify process gaps, and implemented automation solutions that cut misalignment by 30%.
- Applied **ANOVA and regression techniques** to analyze customer behavior and service performance patterns.
