PROFESSIONAL SUMMARY

Oracle Cloud Financials Analyst and Fusion Consultant with 4+ years of experience delivering functional and support solutions across the USA and India. Skilled in Oracle Fusion Financials with expertise in finance processes, system configuration, and end-user support. Experienced in requirement analysis, testing, and quarterly patch validation, while enabling smooth adoption through user training and documentation. Proven ability to collaborate with cross-functional teams to optimize financial operations and improve system efficiency.

EDUCATION

Masters in Data Analytics

April 2025

Indiana Wesleyan University, Merrillville, Indiana

B.Com in Computer Application

November 2020

Pragathi Degree & PG College, Hyderabad, India

SKILLS

Oracle Cloud Financials Modules: General Ledger (GL), Sub Ledger Accounting (SLA), Accounts Payable (AP), Accounts Receivable (AR), Purchasing (PO), Procure-to-Pay (P2P), Order-to-Cash (O2C)

Configuration & Setup: Chart of Accounts, Ledgers, Legal Entities, Business Units, Payment Methods, Tax Configurations, Workflow Approvals

System Administration: User & Role Management, Security & Data Access Controls, Segregation of Duties (SoD), Quarterly Patch Testing

Reporting & Analytics: OTBI, BI Publisher, Smart View, Financial Reporting Studio

Testing & Support: CRP, UAT, Issue Resolution, Production Support, Month-End & Year-End Closures

User Enablement: End-User Training, Knowledge Transfer, Process Documentation

WORK EXPERIENCE

Citigroup

September 2024 - Present

Oracle Cloud Financials Analyst

USA

- Streamlined payment processing in Procure-to-Pay (P2P) by refining payment method setups and workflow approvals, lowering transaction errors by 15% and improving vendor payment turnaround.
- Maintained Oracle Security Console to configure and control over 2,000 enterprise user accounts and 120+ job roles, maintaining accurate data access sets and enforcing segregation of duties across GL, AP, FA, and Procurement modules, which improved compliance audit readiness by 40%.
- Constructed 85+ composite and custom roles by integrating duty and privilege sets tailored to business requirements, reducing redundant access combinations by 30% and improving provisioning accuracy across finance operations.
- Executed quarterly Segregation of Duties (SoD) reviews in collaboration with audit and compliance teams, identifying and remediating 100% of critical access conflicts and maintaining zero unresolved exceptions in quarterly audits.
- Resolved over 300+ user authorization and login issues via Oracle Identity Management and Security Console, documenting repeat patterns, and standardizing deprovisioning and approval workflows that decreased administrative turnaround time by 45%.
- Led quarterly patch testing and coordinated with business stakeholders to validate financial processes, ensuring zero critical disruptions during production rollouts.
- Administered user provisioning, role assignments, and data access sets in Oracle Fusion Cloud, reducing access-related incidents by 25% and ensuring compliance with internal security and audit policies.

Zensar Technologies, India

October 2019 - November 2022

Oracle Fusion Consultant

India

- Assisted in the initial implementation of Oracle Fusion Cloud Financials by supporting configurations for GL, AP, and AR modules, ensuring that accounting structures were properly aligned with client financial policies and statutory requirements.
- Designed and implemented structured role hierarchies covering 70+ job and data roles, aligning them with business functions to eliminate privilege overlaps and reducing post-deployment access corrections by 25%.
- Oversaw end-to-end user and role lifecycle for five Oracle Fusion client implementations, maintaining access for over 1,500 users and enforcing functional boundaries across Finance, Procurement, and SCM modules.
- Automated user provisioning and role assignment workflows using Oracle templates and scripts, shortening setup turnaround time from 3 days to less than 1 day, and achieving 50% higher consistency in user onboarding.
- Developed comprehensive process documentation and SOPs for security administration, enabling standardized access control practices and improving audit traceability and cross-team knowledge transfer by 40%.
- Participated in Conference Room Pilot (CRP) sessions with business stakeholders, documenting feedback and making iterative refinements to system configurations to align with evolving business needs.
- Supported financial data migration activities by validating journal entries, vendor master data, and customer account information, ensuring accuracy and minimizing reconciliation issues during cutover.
- Conducted end-user training sessions and created step-by-step process guides for finance teams, enabling smoother system adoption and reducing dependency on post-implementation support.
