EDUCATION

University of Texas at Dallas

Dallas, TX

Bachelor of Science in Computer Science

Expected Dec 2026

Relevant Coursework: Software Engineering; Data Structures; Algorithms; Artificial Intelligence; System Design

WORK EXPERIENCE

All Metals Fabricating

Dallas, TX

AI Intern

August 2025 – Present

- Engineered RAG-LLM on ERP with LangChain, SQLAlchemy, FAISS, delivering instant business intelligence.
- Cleansed 3 years of SQL Server data, boosting ERP speed and enabling accurate, context-driven decisions.
- Deployed website chatbot with role-based security, safeguarding sensitive operations and enhancing accessibility.
- Architected core FastAPI backend with Redis/Qdrant, foundation of enterprise RAG system and future AI integrations.

InGeniuz AI

Dallas, TX

Software Development Intern

January 2025 – June 2025

- Optimized React Native/JavaScript backend, cutting latency and load times by 50% through refactoring and profiling.
- Integrated Plaid and additional APIs, resolving connectivity issues while enabling real-time data flow and new features.
- Designed scalable architecture, clean UI with Figma/React, and led structured tests with 30+ users for improvements.

Fintech UTD

Dallas, TX

Quantitative Finance Developer/Product Manager

August 2024 – December 2024

- Built a dual-class arbitrage strategy application with Python, SQL & TWS API, reaching 92% back-testing accuracy.
- Secured backend with Firebase auth, developed an intuitive React UI; applied Jira to boost team speed by 28%.
- Applied Python libraries for time series modeling, pipelines, and portfolio simulation, delivering a scalable fintech MVP.

Scalene Works

Dallas, TX

Data Analytics Intern

February 2024 – April 2024

- Analyzed performance and satisfaction data with Python/Power BI, identifying retention risks & actionable insights.
- Improved retention by 7% by reallocating appraisal funds through quantitative modeling and rewarding top performers.
- Enhanced workforce planning via leave policy analysis and data-driven HR adjustments across organizational structures.

PERSONAL PROJECTS

- Retail Inventory Management System** (Java): Complete management systems using binary trees to view, update and sort inventory as well as employee data. Uses multiple IDs to ensure security of data and finances.
- Covibility Live Website** (WordPress, Java, Python): Entire website with deep predictive modeling to predict the chances of an individual getting COVID-19. Used by more than 700 people during the pandemic.
- Resume Ranker** (Python, Streamlit, OpenAI API): A Tool that can rank resumes based on job descriptions and resume content. It compares all the information about the company and the candidate, which is anywhere on the internet.
- Moving Averages Strategy** (Python, Streamlit, yfinance, matplotlib): Calculates and compares the return differences performed by the in-house moving averages strategy and other investment methods.
- Additional Projects:** Many other exciting projects and their details available on GitHub!

ACTIVITIES

Google Developers Student Club (GDSC)

Dallas, TX

President

August 2024 – Present

- Led organizational restructuring and technical workshops, boosting membership by 112% from 368 to 781.
- Secured funding and managed finances, increasing event participation by students and professionals.

Hack AI Hackathon

Dallas, TX

Runners Up Winner

April 2025

- Led a 4-member team to secure 2nd place in LTIMindtree's track at HackAI 2025 by developing TarkAI, a generative AI assistant that answers Document-based queries using Lang Chain, FAISS, and OCR-based text extraction.
- Created two domain-specific versions of the QA system for Taxation and Education, expanding use cases.

ADDITIONAL

Technical Skills: Proficient in Python, Java, C++, SQL, RESTful APIs, Docker, Git, Firebase, NumPy, Pandas, Scikit-learn, Microservices Architecture, TensorFlow, Kubernetes, Plaid API, Power BI, Tableau, Linux, R, Algorithmic Trading, TWS, Financial management, Google Cloud Platform (GCP), AWS, Lang Chain, Streamlit, FastAPI, Apache Kafka

Languages: Fluent in English, Hindi, Urdu; Conversational Proficiency in French, Russian

Certifications & Training: AI for Everyone (March 2025), Google Cloud Digital Leader (Jan 2025), Java Masterclass (Jul 2024), Bloomberg Market Concepts (Jun 2025), IBM Data Science (Aug 2024), Prompt Engineering for LLMs (Feb 2025)

Memberships: GDSC, ACM UT Dallas, UI/UX Club, Nebula Labs, FinTech UTD, Artificial Intelligence Society (AIS)

Eligibility: Eligible to work in the United States without any restrictions or sponsorships
