

Scott King

Senior Software Engineer

(805) 243 8307 scott.king.v2@gmail.com linkedin.com/in/scott-king-842342347 Hollywood, FL

Seasoned Senior Full-Stack Engineer with 10+ years of experience designing and delivering cloud-native, **event-driven platforms** across **healthcare, SaaS, and travel tech**. Specialized in **Java, Kotlin, Spring Boot, Node.js, React, Angular, and AWS**, with deep expertise in **microservices architecture**, API engineering, and real-time systems. Adept in **PostgreSQL, MongoDB**, and Python, with a strong focus on system scalability, secure integrations, and performance optimization. Known for bridging backend and frontend with clean, maintainable code, driving Agile delivery, and mentoring teams toward engineering excellence.

SKILLS

- **Programming Languages:** Java, Kotlin, JavaScript, TypeScript, SQL, Python
- **Backend Technologies:** Java SE, J2EE, JVM Turning, JPA, Spring Boot, Spring Framework, Spring Data, Spring MVC, Spring Cloud, Node.js, Express.js, Django
- **Frontend Technologies:** React, Next.js, Angular, Hooks, Context API, Redux, RxJS, NgRx, HTML5, CSS3, Bootstrap, jQuery, scss
- **Database Management:** PostgreSQL, MySQL, MongoDB, Redis, AWS RDS, AWS DynamoDB, PL/pgSQL
- **API Development & Integration:** SOAP, RESTful APIs, GraphQL, gRPC, RabbitMQ, Kafka, Stripe, PayPal
- **Cloud Technologies:** AWS, Lambda, API Gateway, S3, RDS, EC2, EKS, Azure, App Service, VMs, Storage
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, circleCI, GitLab CI, GitHub Actions, Terraform, Git, CI/CD Pipelines
- **AI Frameworks:** Rasa, spaCy, LLM
- **Quality Assurance & Testing:** Jest, Cypress, Mocha, Selenium
- **Methodologies & Soft Skills:** Agile(Scrum), Kanban, SDLC, Collaboration, Mentorship, Leadership
- **Other:** VS code, ESLint, Prettier

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Blu Omega | Washington, DC

March 2022 - Present

- Spearheaded the development of a **cloud-native, event-driven HIPPA-Compliant SaaS platform**, delivering secure services including patient portals, EHR, and AI-powered virtual assistants to over 200,000 patients and 1,500+ clinicians in an **Agile Scrum environment**.
- Architected and implemented **scalable backend services** using **Java, Spring Boot, PostgreSQL, and MongoDB**, enabling mission-critical workflows like appointment scheduling, digital prescriptions, clinical data management, and secure patient communications.
- Led frontend development using React and **Next.js**, delivering performant, accessible UIs across clinician dashboards, patient profiles, and admin consoles — including SSR, dynamic routing, and responsive design.
- Built modular, secure **RESTful APIs** adopted by web and mobile teams; enforced role-based access controls (**RBAC**) using **JWT**, alongside input validation and request throttling to support high-concurrency access patterns.
- Integrated Apache **Kafka** for real-time, decoupled microservice communication — powering seamless updates across chat, prescriptions, notifications, and vital alerts.
- Collaborated with ML engineers to embed a **Rasa + spaCy NLP chatbot**, enabling 24/7 automated support for patient queries, triage, and appointment bookings — delivered via both frontend and backend integration.

- Developed a robust Doctor Portal that centralized clinician workflows, including calendar management, patient record access, prescription issuance, and note-taking — powered by Kafka-based event streams for real-time updates.
- Engineered a secure, **compliant e-prescription system**, integrating with third-party pharmacy APIs for medication selection, issuance, fulfillment tracking, and real-time sync between doctor and patient interfaces.
- Automated CI/CD pipelines using **Jenkins, Docker**, and Helm, deploying to **AWS EKS** with seamless support for blue-green rollouts, environment segregation, monitoring (Prometheus, Grafana), and rollback mechanisms.

Full Stack Engineer

Blockskye | Boston, MA

September 2018 – March 2022

- Led development of **Blockskye 2.0**, a **multi-tenant SaaS platform** for enterprise travel and expense automation, powering workflows for clients like United Airlines and Kayak. Ensured full auditability using **Vendia's** blockchain fabric and **Amazon QLDB**.
- Built scalable, event-driven microservices with **Kotlin, Spring MVC, J2EE, MySQL**, and **AWS Lambda**, handling booking, ledger recording, and real-time reconciliation via Vendia webhooks and APIs.
- Developed modular **Angular** components—dashboards, transactional tools, and admin panels—with **RxJS** for real-time state and UI responsiveness.
- Designed robust **data pipelines** for ingesting and transforming multi-source financial data, enforcing business rules and enabling high-fidelity reconciliation across ledgers and internal systems.
- Architected and deployed a secure, automated **report distribution system** using AWS Lambda, **SQS, SNS**, and **S3**, delivering daily CSV data to client **Power BI** environments.
- Owned **CI/CD** workflows using **CircleCI, Docker**, and **Kubernetes**, enabling zero-downtime deploys, rollbacks, and infrastructure-as-code practices.
- Integrated **Papertrail** for centralized logging, debugging, and production monitoring, reducing incident resolution time and improving observability across services.
- Collaborated with design, product, and QA teams in **Agile** sprints, driving iterative delivery of high-impact features aligned with business needs.

Full Stack Developer

Healthvio | Tampa, FL

December 2016 – August 2018

- Contributed significantly to the **design and optimization** of a scalable **Patient Management System**, leveraging **Java Spring** and **React** to support evolving requirements and ensure long-term maintainability.
- Boosted backend performance by developing **robust, high-throughput APIs** using Spring Boot, Spring MVC and **JPA**, enabling smooth data access during peak operations.
- Optimized **PostgreSQL schema design** and fine-tuned complex queries, significantly reducing response times and improving performance under high concurrency.
- Built and deployed AWS Lambda functions to streamline data workflows, while integrating AWS S3 for secure, scalable document storage and retrieval.
- Enhanced frontend responsiveness by implementing **lazy loading**, refining **React state management**, and optimizing render logic for better user experience.
- Promoted engineering quality by maintaining strong **test coverage with Jest**, and drove efficient team collaboration through **Agile practices** and **Atlassian Jira** for sprint planning and issue tracking.

Full Stack Developer

AppForge | Dallas, TX

May 2015 – November 2016

- Played a pivotal role in developing an **education-focused web platform**, applying **MVC architecture** and **object-oriented programming (OOP)** principles in **JavaScript** and **Node.js** to boost transaction speed, lower maintenance overhead, and enable scalable growth.
- Engineered and maintained a **high-performance backend** using **Express.js**, ensuring low-latency, reliable API responses that supported mission-critical application features.

- Optimized the **MySQL schema** and fine-tuned query logic, resulting in faster data retrieval and consistent performance under high transaction loads.
- Designed and deployed **RESTful APIs** to streamline data flow, enhance system interoperability, and support seamless integration with third-party services — significantly improving overall system responsiveness.

EDUCATION

Bachelor of Computer Science and Engineering

University of California, Los Angeles, USA | **May 2015**

Relevant Courses: Data Structures and Algorithm, Object-Oriented Programming, Database Management, Cloud Computing with Microsoft Azure

PROFESSIONAL ATTRIBUTES

- **Reliable Problem Solver:** Skilled in debugging and resolving application issues to enhance stability and performance.
- **Collaborative Team Member:** Effective communicator who contributes positively to cross-functional teams, providing mentorship, and support where needed.
- **Continuous Learner:** Adopts new tools, technologies, and frameworks to stay current and ensure high-quality, modern solutions.
