

Shamel Bartleson

Technical Architect | .NET, Angular, React, AWS, Azure | Scalable Systems

Arlington, TX, US | (585) 304-2335 | amshamelbartleson@gmail.com

PROFESSIONAL SUMMARY

Innovative and detail-oriented Senior Full Stack Developer with 10+ years of building scalable web applications. Skilled in frontend technologies like **Angular, React, Next.js, Blazor, TypeScript, MUI,** and **Tailwind CSS**, as well as backend development with **C#, ASP.NET Core,** and **ASP.NET MVC**. Proficient in working with databases like **SQL Server, PostgreSQL, MySQL,** and **MongoDB**, and experienced with cloud platforms such as **Azure** and **AWS**.

Strong believer in clean code practices, following **SDLC** best practices, and collaborating in **Agile** teams. Experienced with **microservices, CI/CD** pipelines, **Kubernetes**, and tools like **Kafka, RabbitMQ,** and **Elasticsearch**. Focused on delivering high-quality, maintainable, and efficient code.

TECHNICAL SKILLS

- **Frontend:** Angular, React, Next.js, Blazor, TypeScript, Tailwind CSS, SASS
- **Backend & APIs:** C#, ASP.NET (MVC/Core), RESTful APIs, GraphQL, gRPC, OpenAPI
- **Databases & Caching:** SQL Server, PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps:** Azure, AWS (EC2, S3), Docker, Kubernetes, Terraform, Jenkins
- **Messaging & Streaming:** Kafka, RabbitMQ
- **Testing & QA:** Jest, Cypress, Selenium, MS Test, Moq, RestSharp, JMeter, Coverlet
- **Collaboration & Version Control:** Git, GitHub, GitLab, Bitbucket, Jira, Slack
- **Principles & Methodologies:** SOLID, TDD, SDLC, Agile (Scrum/Kanban)
- **Additional Tools:** Elasticsearch, SEO, ORM (Entity Framework)

EXPERIENCE

Tech Lead/Senior .NET Full Stack Engineer | Apr 2021 - PRESENT

AlfaHive, Bozeman, Montana

- Spearheaded the development of a high-performance **e-commerce platform** using **C#, ASP.NET MVC, .NET Core, React** with **Next.js** and **Angular**, handling 10k+ daily transactions and optimizing for scalability and performance.
- Designed and optimized **RESTful APIs** and database schemas using **Entity Framework, SQL Server,** and **Redis**, ensuring performance improvements by 35%.
- Built responsive, user-friendly web pages using **Tailwind CSS, TypeScript,** and advanced UI techniques to improve user experience across all devices.
- Integrated asynchronous communication using **Kafka** and **Redis** to ensure seamless event handling and maintain system performance under heavy loads.
- Led end-to-end testing efforts using **Selenium** and **MSTest**, enhancing code coverage by 20%.

- Deployed infrastructure using **Terraform**, ensuring consistent environments across development and production.
- Integrated **Microsoft Azure** services for hosting, storage, and **Kubernetes** orchestration, reducing deployment time by 40%.
- Led a team of four developers, managing project delivery from initiation to production, ensuring the successful implementation of client requirements and maintaining project timelines.

Senior .NET Full Stack Developer | Jun 2017 - Mar 2021

Pendo, Raleigh, North Carolina

- Developed scalable **SaaS platforms** using **ASP.NET MVC**, **.NET Core**, **React** with **Next.js**, **Angular**, and **Blazor**, ensuring robust performance and scalability.
- Optimized **CI/CD** pipelines with **Jenkins**, reducing deployment times by **40%**.
- Deployed applications on **AWS** to ensure scalable and reliable systems.
- Enhanced backend APIs with **GraphQL** for faster client queries and smaller payloads.
- Integrated **RabbitMQ** for reliable messaging and ensured system stability under heavy traffic, while utilizing **Docker** to standardize application delivery.
- Interacted with multiple databases including **MariaDB**, **MySQL**, **MSSQL**, **PostgreSQL**, **Cosmos DB**, and **MongoDB** to ensure efficient data management and querying.
- Implemented **gRPC** for efficient inter-service communication, improving latency by 25%.
- Wrote comprehensive unit tests using **XUnit**, **MSTest**, **Jasmine**, and **Jest**, ensuring high-quality, reliable software and minimizing post-deployment issues.

Full Stack Developer | Mar 2014 - Apr 2017

Omada Health, San Francisco, California

- Led the development of a scalable, secure **healthcare platform** using **ASP.NET MVC**, **Blazor**, **Angular** and **React**, making sure the **.NET** backend and frontend worked seamlessly together.
- Migrated the database to **PostgreSQL**, speeding up SQL query performance and cutting costs by 20%, while optimizing data retrieval with **Entity Framework** queries.
- Made collaboration smoother with **GitLab**, implementing version control and automated **CI/CD** pipelines using **Azure DevOps** and **Jenkins** for quick, consistent deployments.
- Ensured **HIPAA** compliance and kept patient data secure by applying .NET security best practices, like encryption, data validation, and developing secure APIs with **ASP.NET Core**.
- Fine-tuned backend performance through code reviews, profiling in Visual Studio, and optimizing database queries using SQL Server Management Studio (**SSMS**).

EDUCATION

BASc, Computer Software Engineering | Aug 2009 - Dec 2013

Becker College, Leicester, Massachusetts
