

Shi Li

Sr. Data Analyst

NY • lishi886699@gmail.com • +1 646-736-2960 • [GitHub](#) • [Tableau Profile](#)

SUMMARY

- **Data Analyst with 6 years of experience** in data analysis, business intelligence, ETL processes, and predictive analytics across finance, e-commerce, and consulting industries.
- Skilled in **SQL, Python (Pandas, NumPy, Matplotlib), R (ggplot2, dplyr), SAS Programming**(SAS Enterprise Guide, SAS PROC) and **Power BI**, leveraging data-driven insights to improve business operations and reporting efficiency.
- Experience in **building and optimizing ETL pipelines** using **Apache Spark, AWS Glue, Alteryx, SSIS, and Talend**, improving data processing efficiency for large datasets.
- Developed **interactive dashboards and reports** using **Tableau, Power BI, Looker, and Google Data Studio**, supporting decision-making for stakeholders across multiple departments.
- Expertise in **cloud platforms** such as **AWS (Redshift, S3, Athena), Google Cloud (BigQuery, Dataflow), and Azure (Data Factory, Synapse)**, managing scalable data solutions.

PROFESSIONAL EXPERIENCE

Sr. Data Analyst

NY

McKinsey & Company

Jan 2025 – Current

- Built an data pipeline using **SQL, Python, and AWS Glue**, reducing data processing time from **8 hours to 2 hours** for reports covering **10M+ data points**.
- Constructed a **Tableau dashboard** tracking **50+ business KPIs**, enabling real-time decision-making for **20+ stakeholders across 5 departments**.
- Conducted **A/B testing** in **R** for marketing campaigns, leading to an **increase of 12% in customer retention** over **6 months**.
- Integrated **Google BigQuery** with existing databases, consolidating **3+ terabytes** of raw data for unified analytics across global teams.
- Led a **data quality initiative** using **Alteryx ETL validation checks**, identifying and correcting **over 15,000 data inconsistencies** in financial reports.
- Created a **predictive analytics model in Python (Scikit-learn)** that reduced forecasting errors by **30%**, improving financial planning accuracy.

Sr. Data Analyst

NY

1800Flowers.com

Jan 2022 – Dec 2024

- Enhanced **data cleansing workflows in SQL and Talend**, cutting manual processing from **6 hours to 1.5 hours** for **weekly inventory reports**.
- Constructed a **Tableau dashboard** tracking **50+ business KPIs**, enabling real-time decision-making for **20+ stakeholders across 5 departments**.
- Created a **predictive analytics model in Python (Scikit-learn)** that reduced forecasting errors by **30%**, improving financial planning accuracy.
- Formulated a **time series-forecasting model in R**, reducing seasonal demand forecasting errors by **25%**, optimizing supply chain planning.
- Migrated **2 years' worth of transactional data** from **SQL Server** to **Google BigQuery**, improving query speeds for **analysts by 4x**.
- Designed a **real-time Power BI dashboard** tracking **10M+ sales transactions monthly**, reducing stockouts by **20%** across **120+ store**.

Data Analyst

NY

BNY Mellon

Nov 2019 – Jan 2022

- Engineered an **ETL pipeline** using **Apache Spark**, automating daily processing of **200M+ financial transactions**, reducing reporting delays by **4 hours**.
- Designed a real-time **Power BI dashboard** tracking **10M+ sales transactions monthly**, reducing stockouts by **20% across 120+ stores**.
- Created a predictive regression model in **Python**, assisting investment teams in optimizing **\$2B+ in portfolio** assets.
- Implemented **SQL-based fraud detection**, identifying **1,000+ suspicious transactions** monthly and enhancing **risk mitigation** strategies.
- Defined data governance rules in **AWS Redshift**, improving financial data accuracy and reducing reporting errors by **35%**.
- Built an automated **Power Query** solution for reconciliation processes, cutting manual auditing time from **20 hours per month to 5 hours**.

Jr. Data Analyst

NY

Epsilon

July 2018 – Oct 2019

- Cleaned and standardized 5M+ customer records using **SQL** and **Excel (Power Query, VLOOKUP/XLOOKUP)**, improving **CRM** data quality.
- Designed **Google Data Studio** reports for marketing analytics, enabling performance tracking for 10+ client campaigns.
- Conducted trend analysis using **R (ggplot2, dplyr)**, identifying customer behavior patterns that improved ad targeting for 300+ campaigns.
- Automated weekly **Excel** reporting using macros, reducing manual work by 40 hours per month.
- Assisted in developing **SSIS-based ETL workflows**, ensuring seamless **data integration** for 30+ marketing projects.
- Create interactive **pivot tables** in **Excel**, simplifying campaign performance reporting for non-technical teams.

EDUCATION

Towson University

MD

Master of Science in Applied Information Technology

Jun 2012 – Sep 2014

Qingdao University

China

Bachelor of Science in Computer Science

Jun 2008 – Apr 2012

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Trend Analysis, Root Cause Analysis, Power BI, Tableau, Google Data Studio, Excel (Pivot Tables, Charts)
- **Programming & Databases:** SQL (MySQL, PostgreSQL, SQL Server), Python (Pandas, NumPy, Matplotlib, Seaborn), R (dplyr, ggplot2), NoSQL (MongoDB), SAS Programing(SAS Enterprise Guide, SAS PROC)
- **Statistical & Predictive Analytics:** Regression Analysis, Hypothesis Testing, A/B Testing, Probability, Forecasting, Time Series Analysis
- **ETL & Big Data:** Extract, Transform, Load (ETL), Apache Spark, Alteryx, SSIS, Talend, Hadoop, Google BigQuery, AWS Redshift, Azure Synapse
- **Business Intelligence & Reporting:** KPI Dashboards, Performance Metrics, Ad-hoc Reporting, Executive Reporting, Looker, QlikView
- **Cloud & Data Warehousing:** AWS (Redshift, S3, Athena, Glue), Snowflake, Google Cloud (BigQuery, Dataflow), Microsoft Azure (Data Factory, Synapse)
- **Excel & Advanced Functions:** Pivot Tables, VLOOKUP/XLOOKUP, Macros, Advanced Formulas, Power Query
- **Certification:** Data Analytics Career Track Certification
