Professional Summary

8 years of experience in Oracle HCM, where I led, developed and delivered projects exhibiting qualities such as leadership, integrity, and continuous learning. Seeking a position in Oracle projects to broaden and apply my skills and knowledge while making a significant contribution.

Professional Experience

IEEE

Senior Fusion Lead

New Jersey, US | April 2023 - March 2025

- I lead and manage Oracle Fusion Technical team. Oversee the implementation, customization and maintenance of Oracle Fusion applications, ensuring projects are delivered on time and within budget.
- My role involves collaborating closely with clients to understand their business needs, translate requirements into technical solutions, and ensure client satisfaction. I am overseeing Oracle Cloud Benefits, Compensation, ADP Payroll, HCM, Finance module enhancements and customization.
- I also handle and prioritize incoming service requests, incidents and change requests related to Oracle applications. I analyze the technical and functional issues reported by end-users and timely resolve and adhere to timelines
- Currently I am overseeing Benefits Open Enrollment, Benefits enhancements and Payroll enhancements which is part of my year-end responsibilities
- I closely work with the development team from requirement gathering phase to post go-live phase, I work in requirement, technical/functional and deployment document creation, designing the solution and code development and code review stages of development activities.
- So far I have delivered 4 HCM to EPM integration modifications, 7 Reporting changes in HCM Extracts and BIP. Created HDL transformation formula to load 401k element entries into Fusion from Trowe for Benefits module.

Deloitte

Consultant

Mumbai, India | May 2020 - November 2022

- Lead and delivered over 6 M&A (Mergers and Acquisitions) projects which involved designing/modifying various HCM objects (BIP, HCM Extracts, Common lookups, UDT, HDL, PLSQL packages, FF) for over 40+ integrations
- Integrated Avature to Fusion load of pending workers and employees on daily basis which automated new workers hiring process using SOA middleware integration and HDL transformation formula (6800 Workers loaded so far)
- Created over 25+ HCM Extracts and BIP reports for integration and reporting purposes
- Worked on fast formulas for HCM extracts scheduling, extract rule type, benefits, payroll, transformation formulas for UDT load and calculation cards load
- Have working knowledge in Fast formulas, BIP reports and HDL in Core HR, Oracle Time and Labor, Payroll and Benefits modules
- Interacted with client during the implementation process, involved in requirement gathering, preparing process requirement documents, business requirement documents, understanding current business process and mapping with Oracle Cloud HCM and application
- Involved in End-to-End implementation and testing of Core HR, Benefits, Payroll and Time & Labor
- Handled data migrations and conversions of data from Taleo to Oracle HCM Cloud using HDL and BIP reports

- Created HCM extracts for Third party system interfaces and updated field after extracting data by integration HDL with Extract
- Participated as part of a teamwork effort for SDLC principles and the development of documentation for new procedures and processes for technical projects

Cognizant

Senior Software Engineer

Pune, India | August 2019 - May 2020

- Maintained a complex Oracle EBS-Fusion coexistence environment with continuous monitoring. Enhancements were made using Oracle provided data sync tool that leveraged OTBI reporting
- Implemented 4+ PLSQL packages for seamless integration between EBS and Fusion
- Designed reports and resolved existing bugs in BIP reports and HCM extracts which enhanced the performance by 15%

Infosys

Senior System Engineer

Pune, India | March 2017 - August 2019

- Responsible for collaborating with clients to understand their needs, translate requirements into technical solutions and ensure client satisfaction. Perform root cause analysis and providing solution by making use of various features provisioned by Oracle Saas and Paas
- Developed conversion scripts, PLSQL packages, unix scripts to load daily transactions into Oracle GL for over 7 integrations
- Created an automated testing tool using PLSQL and Control-M to monitor over 500+ finance related integration jobs running in production and provide realtime statistics which reduced the recurring errors in production by 30%. Tool was presented to Infosys management which was applauded
- Implemented 5+ end-to-end integrations which posted finance related transactions into Oracle EBS-GL
- Have 3 years of experience in Python, have worked on creating a job portal using Python

[Skills](#)

Oracle HCM, Cloud Time and Labor (OTL), Cloud Benefits, Cloud Payroll, Cloud Finance, Oracle EBS-Finance/GL, HCM Extracts, HDL, BIP, OTBI, Fast Formulas, PLSQL, SQL, TOAD, SQL-Developer, Oracle Datasync Tool, Control-M, Oracle SOA, WinSCP, Unix scripts, Python, Google forms/Java API, Send Grid

[Education](#)

B.Tech in Information Technology, Graduated in 2016 from UMIT, SNDT University
