

Shilpa Anugula

SAP MM Functional Consultant

shilpachowdary34@gmail.com | +1 (813) 531-2247 | Tampa, Florida | [LinkedIn](#)

SUMMARY

- SAP MM Functional Consultant with 8+ years of experience in procurement transformation, ERP implementation, and process automation across FMCG and consulting domains.
- Proficient in SAP S/4HANA MM configurations, data migration, and cross-module integration with FI, SD, and PP to streamline procurement operations.
- Delivered measurable results by improving P2P efficiency by 25%+, optimizing vendor performance, and reducing manual intervention through workflow enhancements.
- Strong communicator and problem solver with proven success in fit-gap analysis, UAT, and end-to-end ERP deployment for global clients.

PROFESSIONAL EXPERIENCE

SAP MM Functional Consultant, PwC

03/2025 – Present | USA

- Leading SAP S/4HANA Material Management implementations across global clients, focusing on procurement transformation, vendor integration, and cost optimization initiatives.
- Partnering with cross-functional business units to align SAP MM configurations with evolving procurement policies, enabling seamless purchase-to-pay automation and visibility.
- Designed and deployed optimized Purchase Requisition and Purchase Order approval workflows that reduced manual intervention and improved approval turnaround by 27%.
- Conducting detailed fit-gap analysis to identify process inefficiencies and delivering functional solutions that enhance data transparency and reduce redundant procurement cycles.
- Managing end-to-end master and transactional data migration using LSMW and BAPI tools, achieving 100% data validation accuracy before production cutover.
- Collaborating with finance and logistics teams to resolve MM-FI and MM-SD integration issues, ensuring consistent material valuation and invoice reconciliation accuracy.
- Developed and configured Fiori apps and analytical dashboards to improve tracking of procurement KPIs and supplier performance metrics across multiple business regions.
- Facilitating UAT, end-user training, and post-go-live hypercare support activities that improved user adoption rate by 35% within the first 3 months.
- Engaging with business process owners to translate operational KPIs into SAP-based insights, improving strategic sourcing and spend management performance.
- Supporting PwC’s internal SAP center of excellence by creating reusable configuration templates and accelerators that reduce client onboarding time by 20%.

SAP Business Analyst – Procurement, Unilever

09/2017 – 04/2023 | India

- Served as the primary functional liaison between procurement, finance, and technical teams to ensure SAP MM solutions aligned with evolving business strategies.
- Re-engineered purchase requisition and procurement workflows, reducing manual touchpoints and improving average PO cycle time efficiency by 22% across business units.
- Supported SAP S/4HANA rollout across India and APAC markets, leading requirement gathering and user acceptance testing for critical procurement modules.
- Authored detailed functional specification documents and collaborated with ABAP developers to automate approval hierarchies and improve procurement compliance.
- Worked closely with finance teams to resolve MM-FI discrepancies, ensuring accurate goods receipt and vendor invoice matching during monthly financial closing.
- Designed procurement performance dashboards using SAP Query and Excel automation, enhancing spend analysis accuracy and supplier evaluation by 18%.
- Conducted comprehensive end-user training programs for over 150 global users, leading to improved MM module proficiency and reduced dependency on IT support.
- Supported SAP Ariba and MM integration to streamline supplier onboarding, purchase order synchronization, and contract lifecycle management processes.
- Contributed to SAP data governance by validating material master and vendor master data, ensuring seamless readiness for S/4HANA migration phase.
- Collaborated with cross-functional procurement teams to standardize global sourcing templates and achieve measurable improvement in cost control efficiency.

ERP Implementation Support Analyst, Accenture

04/2015 – 08/2017 | India

- Supported multiple SAP MM and SD implementation projects across FMCG and manufacturing sectors, ensuring smooth transitions from legacy procurement systems.
- Participated in requirement workshops to map client procurement processes into SAP MM configurations that aligned with business objectives and reporting standards.
- Assisted in end-to-end material master and purchasing configuration, enhancing system accuracy and reducing repetitive manual data entry activities by 15%.
- Resolved L1 and L2 support tickets related to pricing errors, GR/IR discrepancies, and release strategy failures within established SLA timelines.
- Collaborated with ABAP teams to validate enhancements for vendor performance and consumption reporting, improving transparency for business stakeholders.
- Conducted system integration testing and coordinated with finance and production planning teams to ensure smooth cross-module functional dependencies.
- Supported SAP data cleansing and migration initiatives, validating vendor and material master data accuracy before final production go-live.
- Documented configuration steps, process flows, and support resolutions to standardize knowledge transfer across multiple client engagements.
- Assisted in improving procure-to-pay process efficiency through workflow optimization, achieving measurable enhancement in vendor payment accuracy and timeliness.
- Recognized by project leadership for exceptional client collaboration and maintaining 100% on-time ticket closure rate during the go-live stabilization phase.

EDUCATION

Master’s in information technology and management
Indiana Wesleyan University

Indiana, USA

SKILLS

SAP Modules & Functional Areas: SAP S/4HANA MM, SAP ECC 6.0, Procurement & Sourcing, Purchase Requisition (PR) and Purchase Order (PO) Management, Goods Receipt (GR) & Invoice Verification (IV), Inventory & Warehouse Management, Material Valuation & Pricing, Vendor Master Management, Consumption-Based Planning (CBP), Procurement Lifecycle Optimization, Logistics Execution, Subcontracting & Consignment Processing.

Cross-Module Integration: MM–FI Integration (Automatic Account Determination, GR/IR Clearing), MM–SD Integration (Third-Party Order, Intercompany Scenarios), MM–PP Integration (Material Requirements Planning, BOM Explosions), Material Ledger & Valuation, Batch Management, Output Determination, Service Procurement, and Integration with SAP Ariba and SAP Fiori.

Tools & Technologies: SAP GUI, SAP Fiori Launchpad, SAP Ariba, LSMW, BAPI, IDocs, ALE, RFC, SAP Query, Solution Manager, Jira, ServiceNow, Power BI, Advanced Excel (Pivot, Macros, VLOOKUP), SQL (Basic Queries), and SharePoint for documentation and collaboration.

Data & Reporting: Master Data Governance, Data Migration & Validation, Spend Analytics, Supplier Performance Dashboards, KPI Monitoring, Procurement Compliance Reporting, and Real-Time Business Intelligence using SAP Query and Power BI.

Implementation & Project Practices: AS-IS / TO-BE Mapping, Fit-Gap Analysis, Business Blueprinting, Functional Specification (FS) Documentation, Configuration & Customization, SIT & UAT Testing, Cutover Planning, Hypercare Support, End-User Training, Post-Go-Live Support, and Continuous Process Improvement.

Business & Domain Expertise: Procure-to-Pay (P2P) Automation, Strategic Sourcing, Spend Management, Cost Optimization, Supply Chain Analytics, Contract Lifecycle Management, Global Procurement, Audit & Compliance, and Vendor Relationship Management.

Methodologies & Collaboration: Agile and Waterfall Methodologies, Stakeholder Management, Requirement Gathering, Client Presentations, Knowledge Transfer, Global Rollouts, Change Management, and Cross-Functional Collaboration with Finance, Logistics, and Production Teams.

Professional & Interpersonal Skills: Analytical Problem Solving, Clear Communication, Team Leadership, Process Ownership, Attention to Detail, Adaptability, Knowledge Documentation, and Commitment to Delivering Value through Technology-Driven Solutions.
