

SHRAVANTI KONETI

+1 (251) 895-6020 | skoneti.snow@gmail.com | [LinkedIn](#) | PA, USA

Professional Summary

Experienced IT Professional with 10+ years in the industry, including 4+ years specializing in ServiceNow development and administration. Skilled in customizing ITSM modules, building workflows, and integrating systems via REST/SOAP APIs. Strong background in QA testing, automation, and Agile methodologies. Proficient in JavaScript, SQL, and tools like JIRA, Selenium, and Azure DevOps. Certified ServiceNow System Administrator and ITIL v3 certified. Known for delivering scalable solutions, improving service delivery, and collaborating cross-functionally to drive digital transformation and operational efficiency across enterprise environments.

Education

Master of Science in Computer and Information Systems

University of South Alabama, Mobile, AL

Dec 2011

Bachelor of Technology in Computer Science & Engineering

VJIT, JNTU, Hyderabad, India

May 2009

Professional Experience

Windstream Communications, ServiceNow Administrator/Developer - PA

July 2020 – Present

- Spearheaded the customization and enhancement of ITSM modules including **Incident, Change, Problem, and Service Catalog**, resulting in more streamlined and automated IT processes.
- Designed, developed, and deployed **Record Producers, Catalog Items, and multi-level workflows** using Flow Designer and Workflow Editor to support enterprise request fulfilment.
- Created and maintained complex **Business Rules, Client Scripts, Script Includes, and UI Policies** for advanced logic implementation and front-end form enhancements.
- Implemented **role-based access control (ACLs)** and scoped applications to ensure secure data access aligned with compliance policies.
- Managed **data integration pipelines** using **Import Sets, Transform Maps, and REST APIs** to import and sync external datasets.
- Developed customized **dashboards and reports** using Performance Analytics to track KPIs like MTTR, SLA compliance, and incident backlog.
- Collaborated closely with Product Owners, Stakeholders, and Developers to refine requirements and implement scalable solutions in Agile sprints.
- Built **ServiceNow update sets** and managed deployments across dev, test, and prod environments using **Git and Jenkins** for versioning and CI/CD.
- Conducted peer reviews, code walkthroughs, and contributed to knowledge base articles to improve team efficiency and documentation.
- Actively involved in **platform upgrades, patch testing, and regression testing** to ensure smooth transitions and zero downtime.
- Led ServiceNow enhancement and support initiatives for end-users and L2/L3 support teams, reducing ticket volumes by 30% through automation.

Windstream Communications, QA Specialist/ServiceNow Administrator- PA

Feb 2015 – June 2020

- Played a hybrid role bridging QA and ServiceNow administration to deliver high-quality platform customizations with minimal defects.
- Designed and executed test plans and test cases for Incident, Problem, Change Management, and Service Catalog modules.
- Performed detailed functional, regression, integration, and user acceptance testing (UAT) to validate system updates and reduce production defects.
- Conducted backend data validation using SQL queries to ensure data integrity across ServiceNow and external systems.
- Leveraged tools like HP ALM, JIRA, and Azure DevOps for test case management, defect tracking, and sprint progress reporting.
- Participated in all Agile ceremonies: sprint planning, daily standups, demos, and retrospectives, contributing QA perspectives and risk assessments.
- Automated repetitive tests using Postman and created reusable test collections for REST API endpoints in ServiceNow.
- Collaborated with developers to test and debug scripts in real-time and provide rapid feedback during sprints.
- Mentored junior QA team members in test strategy development and ServiceNow navigation best practices.

HSBC, QA Tester - Buffalo, NY

Feb 2014 – Feb 2015

- Delivered high-impact testing solutions for core banking software through detailed test planning, scripting, and execution.
- Performed integration and regression testing for new and existing functionalities, focusing on user authentication, transactions, and loan processing.
- Automated frequent tests using Selenium IDE, accelerating the test cycle and increasing coverage.
- Worked with global teams to ensure alignment on testing objectives, timelines, and resource utilization.
- Participated in mobile application testing (iOS/Android), validating cross-device compatibility and responsive behaviour.

JP Morgan Chase, Test Engineer – Wilmington, DE

Apr 2013 – Feb 2014

- Conducted comprehensive manual testing and backend validation for enterprise financial applications with a focus on secure transactions and core functionality.
- Created detailed test plans, test scripts, and scenarios based on business and functional specifications.
- Used Tivoli Work Scheduler (TWS) to test job executions and backend workflows, ensuring end-to-end process integrity.
- Performed extensive SQL-based data validation for database consistency, accuracy, and audit compliance.
- Tracked bugs and test progress through HP ALM and JIRA, maintaining transparency across QA and Dev teams.
- Contributed to Agile scrum teams by providing daily test status and actively participating in retrospectives and demos.

Epicor, QA Consultant – Newburgh, NY

Aug 2012 – Mar 2013

- Led QA efforts for web-based POS and inventory management applications, including UI/UX testing and backend validations.
- Coordinated with offshore teams to assign tasks, monitor progress, and consolidate test findings using JIRA.
- Facilitated UAT sessions with business stakeholders and incorporated feedback into the final release cycles.
- Executed full-cycle testing (system, regression, and smoke) for frequent feature releases in a fast-paced Agile environment.

Skava, Software Tester – San Diego, CA

Mar 2012 – Aug 2012

- Validated e-commerce platforms for large retailers, focusing on shopping cart, checkout, and payment gateway flows.
- Authored and executed test cases for frontend and API-based workflows, ensuring end-to-end feature readiness.
- Collaborated with developers to log, reproduce, and resolve defects efficiently using JIRA and internal tracking tools.
- Ensured compatibility testing across major browsers and devices to support a seamless customer experience.

Technical Skills

Languages & Scripting: JavaScript, Python, SQL, HTML, CSS, XML, JSON.

ServiceNow Platforms: ServiceNow Studio, Scoped Applications, Update Sets, Flow Designer, Business Rules, Client Scripts, Script Includes, UI Policies, GlideRecord, GlideAjax.

ITSM Modules: Incident, Problem, Change, Request, Knowledge, CMDB, Service Catalog.

Integration & APIs: REST APIs, SOAP, MID Server, Import Sets, Transform Maps, IntegrationHub.

Automation & Testing Tools: Selenium, JMeter, Postman, QTP, TestNG, UFT.

CI/CD & DevOps Tools: Jenkins, GitLab CI, Bitbucket, Azure DevOps, SVN, Git, TWS.

Cloud Platforms: AWS (EC2, S3), Microsoft Azure (VMs, Functions).

Databases: MySQL, Oracle, SQL Server, PostgreSQL.

Agile Tools & Project Management: JIRA, Trello, Asana, Azure Boards, HP ALM.

Operating Systems: Windows, Linux, Unix, macOS.

Documentation Tools: Confluence, SharePoint, MS Word, Excel, PowerPoint, Visio.

Web Technologies: HTML5, CSS3, RESTful APIs, SOAP, Bootstrap.

Performance & Load Testing: LoadRunner, JMeter, Blazemeter.

Collaboration Tools: Slack, Microsoft Teams, Zoom.

Certifications

Certified ServiceNow System Administrator (CSA)

ITIL v3 Foundation Certified
