VA, US

SKILLS

Python · Kotlin · JavaScript · TypeScript · Elixir · Flask · Angular · GraphQL · Microservices · Selenium · Pyramid · Webpack · SciPy · Swagger · Next.js · Vue.js · Pytest · Jest · Cypress · Bootstrap · NumPy · Hugging Face · Django · React.js · FastAPI · RSpec · TestCafe · Hibernate · Tailwind · Pandas · Airflow · MongoDB · DynamoDB · MySQL · Redis · PostgreSQL · NoSQL · Elasticsearch · Elasticache · Docker · Git / GitHub / GitLab · GCP · Azure Container Services · Maven · Gradle · Kubernetes · Terraform · Heroku · Apache · Jenkins · AWS (Lambda, EC2) · Digital Ocean · RabbitMQ · Scrum · CI/CD · Kanban · PyCharm · Eclipse · Workbench · Postman · Agile · TDD

PROJECTS

Signos

- Built a scalable full-stack solution integrating real-time data pipelines, microservices, and ML driven insights to support personalized health monitoring

Dealty

- A real estate platform for listing, buying, and selling homes. Upgraded React.js and Rails to latest versions and refactored the codebase with ES6 for better performance and maintainability.

Good Today

- A nonprofit platform for daily charitable giving. Integrated Slack for organizational engagement and Stripe for secure, seamless donations.

QueueDr

- An AI-driven scheduling system for healthcare providers. Migrated infrastructure to AWS, built new API integrations, and improved adoption by 30% while reducing wait times by

SID DANIEL

SENIOR FULL STACK DEVELOPER

SUMMARY

FULL STACK ENGINEER Full Stack Engineer with 7 years of experience delivering scalable, production-ready applications. Expert in Python, modern frameworks, and JavaScript libraries to build end-to-end solutions. Skilled in microservices, API development, database management, and cloud deployment. Passionate about creating high-quality, user-focused software with clean, maintainable code.

EDUCATION

Comsats

2016 - 2018

Masters in Computer Science

EXPERIENCE

TheBitSoft

Location

Senior Full Stack Developer

2023 - Present

- Led a dynamic team of engineers in developing and maintaining web applications with Python, Django, Flask, and React, boosting productivity by 30% and shortening development cycles by 15%
- Designed and optimized database architectures using PostgreSQL and MySQL, improving query performance by 25%
- Implemented DevOps practices and CI/CD pipelines with Jenkins, increasing code quality by 35% and cutting deployment time by 70%
- Developed serverless solutions with AWS, Azure, and Lambda, enabling scalable operations and reducing infrastructure costs by 45%
- Applied Agile methodologies and object-oriented design principles across Python, REST, SOAP, JavaScript, and React projects, accelerating development velocity by 25% and reducing time-to-market by 15%
- Streamlined collaboration with Git and GitHub, lowering deployment errors by 30% through effective version control and project management
- Delivered performant frontends with React.js and optimized data management using DynamoDB, enhancing application performance and efficiency by 15%

Truveta

Location

Full Stack Developer

2021 - 2023

- Contributed to AI and machine learning projects with Vicarious via Agile 17, strengthening expertise in automation technologies
- Led REST API development in Python, improving data transfer efficiency by 25%
- Built and scaled full-stack applications with Python (Django/Flask), React/Next.js, and MongoDB, boosting development efficiency by 20%
- Streamlined deployments with Docker and Kubernetes, cutting deployment time by 60% and improving reliability by 50%
- Enhanced quality with automated testing frameworks, reducing bugs by 40% and increasing system stability by 35%
- Deployed applications on AWS, Kubernetes, and Heroku, achieving a 40% gain in scalability

EXPERIENCE

Abridge

Location

Python Developer

2018 - 2021

- Applied Agile practices and object-oriented design with Python, REST, SOAP, and JavaScript, accelerating project delivery by 20% and improving maintainability by 10%
- Collaborated with cross-functional teams to profile and optimize applications, boosting system efficiency by 20%
- Enhanced security with advanced authentication/authorization (OAuth, JWT, Spring Security), reducing vulnerabilities by 60% and unauthorized access by 30%
- Designed and deployed engaging UIs with Bootstrap, Tailwind CSS, Material UI, AngularJS, and React, improving user engagement by 15% and lowering bounce rates
- Optimized data management with MySQL, PostgreSQL, MongoDB, and DB2, improving query performance by 25%
- Integrated cloud storage solutions (AWS S3, Google Drive), reducing file handling times by 25% and improving efficiency
