

SRILAKSHMI THRIVENI K

Cloud & DevOps Engineer | CI/CD | Kubernetes | Terraform | AWS Practitioner-Level Expertise

thrivenikolla.v@gmail.com | +1 509-210-0543

Professional Summary

Cloud DevOps Engineer with 6+ years of experience in building and automating scalable CI/CD pipelines, managing cloud infrastructure (primarily AWS), and deploying containerized applications using Docker and Kubernetes. Hands-on expertise in tools like Jenkins, Terraform, Ansible, and Git. Experienced in writing automation scripts in Python and Shell for infrastructure tasks. Proven ability to drive DevOps solutions that enhance system reliability, performance, and delivery speed.

Core Skills

- DevOps Tools: Jenkins, Git, Maven, Docker, Kubernetes
- Cloud Platforms: Amazon Web Services (EC2, S3, RDS, IAM, VPC, EKS, ECS, Lambda)
- Infrastructure as Code: Terraform, CloudFormation
- Configuration Management: Ansible
- Monitoring Tools: Zabbix, Nagios, Site24x7
- Scripting: Shell, Python, YAML
- OS: Linux, Windows
- Other Tools: Postman, Sisense, VMware

Professional Experience

Persistent Systems Ltd., Hyderabad | Engineering Lead (Oct 2021 - Present)

- Leading DevOps practices for multiple platforms (Analytics, Telecom, Platform Services, etc.)
- Developed and maintained CI/CD pipelines using Jenkins, integrated with Ansible and Docker
- Automated provisioning of infrastructure with Terraform and Kubernetes (EKS)
- Handled patching and upgrades across 100+ applications, ensuring high availability

SRILAKSHMI THRIVENI K

Cloud & DevOps Engineer | CI/CD | Kubernetes | Terraform | AWS Practitioner-Level Expertise

thrivenikolla.v@gmail.com | +1 509-210-0543

- Implemented security controls in Jenkins including role-based access control (RBAC)
- Integrated dashboards and reporting using Sisense; automated report exports via scripts
- Monitored systems using Zabbix and Site24x7, troubleshooting infra and deployment issues

Capgemini, Bangalore | DevOps Engineer (Nov 2018 - Oct 2021)

- Supported end-to-end DevOps lifecycle, including SCM with Git, builds with Maven, and deployments with Jenkins
- Deployed Docker containers and orchestrated them using Kubernetes
- Automated infrastructure tasks using Ansible and Python scripts
- Managed AWS resources including EC2, S3, IAM, and ELB
- Participated in Jenkins job migrations, improving build efficiency and reducing manual effort

Key Projects

IMT Jenkins Migration (Client: Elli Mae)

Automated migration of 100s of Jenkins jobs across multiple teams. Optimized job structures and integrated Git workflows.

IT Carve Out (Client: Tangoe)

Deployed builds via Linux and automated infrastructure with Terraform and Ansible. Configured alerting and health checks using Zabbix and Site24x7.

Insurance Templates (Client: Genetic Alliance)

Developed automation scripts for deployment using Shell and Ansible. Supported version control, builds, and CI/CD pipelines using Git and Jenkins.
