PROFESSIONAL SUMMARY

Data Engineer with 9+ years of experience in designing and implementing analytical systems. Proficient in Microsoft technologies, including **Azure Data Factory, Azure Databricks, Azure Synapse, Azure Analysis Services, SQL, Power BI, SSIS, SSAS and SSRS**. Skilled in data engineering with **Python, PySpark, Snowflake** and **dbt**. Expertise in ETL processes, data modeling, query optimization, and distributed database environments. Strong background in Power Apps and Power Automate. Delivered analytical solutions for e-commerce, gaming, marketing, insurance, and data center management industries. Adept at building scalable data models, performance tuning, and optimizing Power BI dashboards for enterprise reporting.

SKILLS

- **BI & Reporting:** Power BI, SSIS, SSAS, SSRS, Power Automate, SharePoint, Excel
- **Azure & Cloud:** Power Apps, Data Factory, Synapse, Databricks, UnityCatalog, DataLake Gen2, Logic Apps, SQL DB, Analysis Services
- **Databases & Tools:** SQL Server, Snowflake, dBt, SSMS, Visual Studio, VS Code, PyCharm
- **Languages & Scripting:** SQL(Advanced SQL, query optimization, window functions), PySpark, Python
- **Version Control & Agile:** Git, TFS, Jira, Confluence

PROFESSIONAL CERTIFICATIONS

- Certified Scrum Product Owner
- Perform Cloud Data Science with Azure Machine Learning
- Analyzing and Visualizing Data with Power BI
- Querying Data with Transact-SQL
- Implementing a Data Warehouse with Microsoft SQL Server 2012
- Querying Microsoft SQL Server 2012/2014

EDUCATION

California State University Fullerton

Master of Computer Science

Fullerton, CA

Graduation Date: May 2024

Jawaharlal Nehru Technological University Hyderabad

Bachelor of Technology in Computer Science Engineering

Hyderabad, India

Graduation Date: Apr 2014

WORK EXPERIENCE

Data Engineer, Algebra IT – Dallas, TX (Client: CyrusOne)

Jun 2024 – present

- **Power BI Development:** Designed interactive dashboards & reports using Pie Charts, Bar Charts, Tree Maps, Line Charts, Area Charts, and Scatter Plots.
- **Advanced DAX & Data Modeling:** Built complex DAX expressions, calculated columns, and measures to extract key business insights.
- **Power Platform Integration:** Connected Power BI reports with Power Apps & Power Automate, enabling real-time user inputs & workflow automation.
- **Role-Based Security:** Implemented PowerApps Role-Based Access Control using SharePoint Groups & Power Automate Flows.

- **Process Automation:** Automated data refresh and data approvals using Microsoft Power Automate workflows.
- **SQL Performance Optimization:** Refactored SQL stored procedures & functions using CTEs, window functions, and query tuning.
- **Report Optimization:** Restructured poorly performing Power BI reports, reducing refresh time from 2 hours to 3 minutes through query folding & dataset optimizations.

TechLead, TechMahindra – Hyderabad, India (Client: NBFC Canada)

Oct 2021 – Jul 2022

- **Migration & Modernization:** Led the migration of legacy SSIS ETL pipelines to Snowflake using dbt, optimizing data transformations and reducing execution time.
- **Power BI Development:** Created semantic models in Power BI, leveraging direct query, composite models, and dynamic parameters for real-time insights.
- **Azure & Power Platform:** Integrated PowerApps, Power Automate, and SharePoint to automate business workflows. Implemented scalable and sustainable data engineering solutions using tools such as Databricks, Azure, Apache Spark, and Python.
- **Data Engineering:** Built SCD Type 1 & 2 models in Snowflake, ensuring historical data tracking with incremental load strategies using dbt.
- **Automation & Workflow Optimization:** Automated data ingestion using Control-M jobs and monitored production failures, improving reliability.
- **Cloud Integration:** Implemented Azure Data Factory pipelines to ingest and transform data from multiple sources.
- **Performance Optimization:** Tuned Power BI dashboards using query folding, indexing strategies, and performance analyzer to enhance report loading times.
- **Security & Compliance:** Enforced row-level security (RLS) in Power BI to restrict access based on user roles.
- **Collaboration & Leadership:** Engaged with onshore managers for project scoping, mentored junior developers, and conducted code reviews.

Senior Software Engineer, Zenoti – Hyderabad, India (SaaS Company)

Jul 2019 – Oct 2021

- **Data Warehousing:** Designed fact & dimension tables with SCD Type 1, 2, 3, and accumulating snapshots for analytics.
- **ETL Development:** Built SQL Server-based ETL pipelines with CDC, stored procedures, and triggers for seamless data ingestion.
- **BI & Reporting:** Developed Power BI reports for sales trends, customer retention, and referral analytics with advanced DAX measures.
- **Query Optimization:** Tuned SQL queries by indexing, partitioning, and fixing parameter sniffing issues for improved performance.
- **Cloud & Data Integration:** Maintained Redshift analytical DB, used AWS S3 for data storage, and built Python ETL pipelines.
- **Automation & Monitoring:** Implemented SQL Server validation frameworks to identify anomalies and automate reconciliation.
- **Agile Development:** Worked with global teams, partnered with QA & business analysts, and participated in scrum ceremonies.
- **Documentation & Knowledge Sharing:** Created Confluence docs, mentored new engineers, and conducted peer code reviews.

Consultant II, Neudesic – Hyderabad, India (Client: Assurant USA)

Apr 2018 – Jun 2019

- **SSIS Development:** Built ETL pipelines for slowly changing dimensions (SCDs) using Merge, Lookups & Sort transformations.
- **SSIS Automation:** Used Script Task to trigger child packages dynamically, reducing manual intervention.
- **Production Support & Logging:** Created logging & checkpointing mechanisms to handle package failures & restarts.
- **PowerShell Deployment:** Automated SSIS package deployments across multiple environments with PowerShell scripts.

- **SQL Performance Tuning:** Created non-clustered indexes, partitioning, and stored procedures to enhance query performance.
- **BI Analytics:** Developed SSRS paginated reports with parameters, drill-throughs, and dynamic filtering.
- **Collaboration & Agile:** Worked in cross-functional teams, provided stakeholder demos, and followed Scrum methodologies.

Senior Software Engineer, MAQ Software – Hyderabad, India (Client: Microsoft US) Jul 2015 – Apr 2018

- **Enterprise Data Warehousing:** Designed & implemented end-to-end data warehouses using SQL Server, SSIS, and Power BI.
- **BI & Advanced Reporting:** Developed Power BI reports with hierarchies, drill-downs, bookmarks, and RLS.
- **Azure Cloud Migration:** Lifted & shifted on-prem SQL & SSIS pipelines to Azure Data Factory & Databricks, optimizing performance.
- **Performance Tuning:** Improved ETL execution times using query optimization, indexing, and parallel processing techniques.
- **Advanced ETL Processes:** Implemented incremental data loads, CDC, and Change Tracking for real-time insights.
- **Azure Analytics:** Used Azure Synapse, Databricks, and Cosmos DB for big data processing & ad-hoc analytics.
- **Power Platform Integration:** Integrated PowerApps & Power Automate for workflow automation & process optimization.
- **SSAS Development:** Designed tabular & multidimensional cubes, created DAX/MDX expressions, and optimized cube processing.
- **Mentorship & Best Practices:** Trained junior engineers, conducted code reviews, and enforced coding standards.

Software Engineer, RandStad India – Hyderabad, India (Client: MAQ Software) May 2014 – Jul 2015

- **SSIS Development:** Created ETL workflows for fact/dimension tables, ensuring data accuracy & consistency.
- **SQL Optimization:** Improved query performance with non-clustered indexes, query execution plans, and temp tables.
- **SSIS Automation:** Implemented dynamic SSIS packages to load data from multiple file sources.
- **Report Development:** Created SSRS reports with parameters, aggregations, and export functionalities.
- **Agile & Collaboration:** Worked closely with senior developers, learned ETL best practices, and contributed to team success.
